Welcome to our Golden Opportunity III Female Sale. We have a tremendous offering of proven cows and bred heifers with potential built into their pedigrees.

Over the past few years, we have sold different groups of cows, and this year it is predominately the cows that were born in 2011. You will see the ‘Springcreek’ prefix for generation after generation. We have tried to be consistent in our thoughts over the years, and this leads to more consistency within the cows and their prepotency to breed true in the future. The vast majority are homozygous polled, a trait that will become increasingly important. These cow families are the factories that we have used to build our successful bull sales and a long list of repeat buyers. It is very gratifying to hear many testimonials about how pleased buyers have been with their purchases.

The bred heifer package will definitely have individuals that will go on to become foundation females for their new owners. The cow families behind them ensure this. The hybrid heifers offer two different scenarios. Some will go into upgrading programs and others will go into top commercial programs. When you combine top genetics from the two most popular breeds in the country, good things are bound to happen. The upgrading process played a vital part in Spring Creek Simmentals history.

Please take note of the sires and service sires. They are bulls that are unique to the Simmental business. We are very proud to offer the services of our homo polled, homo black ‘LFE McDavid 413C’. His calves have tremendous performance and are the type I was wishing for. There will be several sale features by him in our upcoming Bull Sale. There are also services to the popular ‘Springcreek Liner 56U’, ‘Springcreek Spark Plug’ and ‘Springcreek Blue Chip 9D’ our high selling, homo polled, blaze faced bull from last year’s sale. Many of the hybrid heifers are bred to ‘MRL Warrior 19B’ who is homo polled and black, blaze faced and very easy calving. The Simmental heifers are bred to easy calving Black Angus bulls. The resulting calves whether they be male or female have been very valuable.

After over 40 years in the business much work has been done, so let this be your opportunity to take advantage of the advances we have made and put them to work in your program. Over all those years, we have always kept the top end and have had only a few production sales. This has allowed us to make substantial genetic improvement, improvement that brings us much pride.

We are very happy to have our friend Craig Davidson, Black Sand Cattle Co., consign an excellent group of commercial black heifers.

Please feel free to plan a visit prior to the sale, enabling you to further discuss and study the cattle. Plan to stay around after the sale if possible for some fellowship and cheer! We hope to see you all on Dec. 19th here in our sale barn.

The year of the “Y” females is a group of females we have been patiently waiting to come to auction for some time. We welcome you to one of the deepest and most impressive groups of bred females to sell in the Simmental sector in 2017. The Spring Creek program is consistently loaded for shear quality and have done an impressive job in combining maternal strength with udder quality, structural soundness with strong feet and performance with being very cognizant on calving ease. Many of the most influential bulls in the business are sourced right here and this is an opportunity to acquire the great genetics behind them.

Throughout the many visits we have had through the impressive Spring Creek program over the years, the “Y” cows have always stood out and they are extremely deep in quality. This group is backed by the great 56U sire that is one of the most sought after maternal giants within the breed. Not to play second fiddle to 56U but the Hart All In W382 ranks as high as any sire in my books for maternal strengths as his daughters are beautiful uddered and extremely productive. On the red side, Crosby has been a very influential sire in the breed for consistently siring equally as strong sons as daughters. Other feature females are direct Surge, Knockout, Empire, Club King and Rebel daughters that all have impressive histories of production females. For a high ROI, please note that a high percentage of these females are bred to the great McDavid bull who is currently off the open market and his marketability will skyrocket after selling his first daughter at FNL and sons next spring for Spring Creek. The Angus cow division is always strong at Spring Creek and has been developed for the most astute commercial cattleman to acquire front end bulls from. These females are bred to work and can be invested in with the utmost confidence that they will produce for you into the future.

The bred heifers in 2017 are impressive to say the least in both the purebred and commercial division. We really feel that this could be the strongest group of Simmental bred to date from Brian. When studying the pedigrees, some of the freshest and most sought after genetics are represented and bred back to leading herd sires with strong calving ease. The Angus division of bred are also backed by some prominent herd sires that will add maternal and calving ease merit to any program. BlackSand has always been a program that we have the utmost amounts of respect for whether in the purebred or commercial sector. Craig is a talented individual that spares no expense in sourcing the best females to market and mates them with excellent calving ease sires. If you are in the market for commercial bred heifer, these are amongst some of the best in the country.

The Golden Opportunity is always one of our most enjoyable sales to attend and we encourage you to do the same. The quality of cattle are impressive and combine that with great hospitality, you have a sale that should be on the short list of every progressive cattleman to be at in the fall of 2017. If sale day conflicts with your hectic schedule, feel free to utilize our integrity-driven order buying services. See you in Moosomin for a Golden Opportunity to add progressive genetics to your program.

Best Regards,
The Bohrson Marketing Team

I refer to the 'Mickey' cow family as the cow family that has been on the farm for 100 years. I really don’t know when it began but my Dad got it started when he got a cow from his uncle (whose farm was incorporated into ours many years ago), so it has been on the farm for a very long time. 46Y is a big volume cow who has caught the eye of many visitors to the pastures, including Darryl Snider. She has daughters at Charles Fafard’s and Van De Velde Cattle. I will retain her 2017 heifer calf to continue her line. Her early calf by ‘Blue Chip’ will be very exciting.

It is really hard to sell 62Y as she is the quietest cow on the farm and she has never had a daughter for me to keep. If she has a ‘Blue Chip’ heifer calf, I would definitely be interested. Her bull calves were purchased by Chad Baglole, Mitchell Cattle Co., Werstroh Farms and Fourie Farming along with another to sell in our next Bull Sale.

Bred to Blue Chip 9D on April 26, 2017.

67Y's granddaughter sells as Lot 50 and a daughter sells as Lot 41. She also had a daughter sell to Kevin Clarkson. The maternal grand dam was a very good 'Line Drive' flush cow. Her 2017 son is a 'Liner 56U' son (inset) that will be very popular in the 2018 Bull Sale. Look forward to her 'Blue Chip' calf.

Here is a ‘Liner 56U’ daughter that will catch a lot of attention. Note that she was a fall calf and is therefore selling with the ‘Y’ cows. She has a daughter in the JP Simmental herd and a son is a high seller to EDN Simmentals. Two daughters have been retained. I have had very good luck with the ‘Gold Standard’ x ‘Liner 56U’ combination and so I will look forward to this mating.

This is one of my favorite cows in the sale. She is a ‘Liner 56U’, going back to the famous ‘7P’ flush cow that was last owned by Sun Rise Simmentals and Black Sand Cattle Co. Her 2017 ‘McDavid’ bull calf (inset) was picked out by Taylor Richardson and Darryl Snider on a recent visit. A full brother was the high seller in a past Bull Sale. Sons have sold to Gord Gerrard and Brown Ranch. I would be interested in sharing a flush on this cow if the new owner should desire to do so. I had the misfortune of losing her bred heifer this morning from pneumonia. I would be hoping for a heifer calf from this mating.
This beautiful feature cow has a perfect udder and was Garth Rancier's pick of the first calf heifers when he was through the herd in 2013. Her 'McDavid' bull calf (inset) is my pick of the 2017 black bull calves. If her next 'McDavid' calf is as good as her 2017 calf, it will more than pay for this cow. A daughter sold to Greg Alexander and I have retained her bred heifer.

This heavy bodied ‘Liner 56U’ daughter has been selected many times on pasture tours. Her udder is the kind that you want on the dams of herd bulls. A son was sold to Circle 7 and Cow Trax Cattle Co. I am also using semen on this ‘All In 155Y’ son. I only have one daughter from 103Y and would like to share in a future flush on her if the buyer so desires. She also has a daughter at Dugdale Ag and a son at Indian River Cattle Co.

Bred to LFE McDavid on May 12, 2017

This beautiful blaze faced cow will be easy to find. She has a very nice udder and is carrying a potentially very valuable ‘McDavid’ calf. Black blaze faced cows as good as this one are hard to find.

Son - MBJ 25E

Bred to Springcreek Liner 56U on May 26, 2017

138Y had four consecutive bulls that made our Bull Sales. They sold to Brock Thompson, Nu Horizon, Haupstein Farms and Michael Lundago.

Here is another cow that dates back to ‘Line Drive’, the great cow maker. Scoop up these cows that are bred to ‘McDavid’.

This feature cow is very thick and deep bodied. Her dam was a high seller to Dugdale Ag. Her super 2017 ‘McDavid’ calf may be the quietest bull we have ever raised. I have retained her bred heifer and would certainly be interested in her calf if it was a heifer. She is the ninth generation of her cow family on our farm.

A really nice heifer that carries the red gene. Breed her Red Angus, get a red calf and the resulting pedigree would be very popular.
I am very happy with my 'Vision Unanimous' first calf heifers.

A 'Tiger' x 'Motive' combination should make for a very maternal female.
