Warranty Program

We are pleased to offer a warranty program that is designed to help get your bull through the most critical first breeding season.

Duration- 6 months Rate- 5%

This warranty covers injury, sickness or death. It does not include freezing semen. Mismanagement, injury or death due to malicious, willful or intentional acts or mistreatment by you or your employees are fraudulent claims. Contact us asap when you have a problem to ensure we can handle any issues in a timely manner. A vet report will be required for claim purposes. We will have a suitable replacement bull to your yard as soon as possible if required or a credit to next years sale. Credit Only no cash refunds. Amount will be based on settlement value less salvage if possible and will not be for more than settlement amount at time of purchase. Bulls that are not covered by this warranty option at the time of settlement will only be covered by the breed guarantee standards set by the Canadian Simmental Association.

We highly recommend that bulls that remain at the farm until a later date are covered with our warranty program or a third-party insurer. Alameda Agencies, Bonnie Thompson will be available on sale day to assist with all your insurance needs.

Volume & Repeat Customer Discounts

2 bull 3%

3 bulls 4%

4 bulls 5%

5 or more bulls 6%

Discounts only apply to bulls that settlement is made on sale day. Absentee buyers have a 14-day grace period to make settlement and have discount apply. No bulls purchased in partnership with someone else are eligible for this program.

Repeat Customer Discount - 2%

Delivery

Delivery will be provided in most cases right to you, or a central point within the prairie provinces and North Dakota & Montana. Other provinces and states we will coordinate delivery with you in the most cost effective and efficient manner possible.

Horned/Polled & Color Testing

Not all polled and color test results on the heifers were received before going to print with the catalogue. Give us a call to inquire on any pending results. All updated results will be posted with sale supplement information prior to the sale.

US Exports

We are happy to complete all required health paperwork and brokerage to get to your bulls across the line with no hassle. If you have questions regarding export, please contact us. The exchange rate will be announced from the block sale day. The dollar is very much in your buying favour.

Herd Health

All animals sold are on a complete herd health protocol since birth. We work closely with our veterinarians to ensure our herd's health is optimized for our benefit and yours.

Semen Testing

All bulls sold that are 12 months of age or more will be semen tested prior to the sale. All scores and information will be available as requested. Supplemental information will be available prior to sale day.

Semen Collection

Meadow Acres Simmentals reserves the right to collect semen on any bull in the sale at the buyers convenience and our expense.

Online Viewing & Bidding

Catalog Design by Bohrson Marketing

The information printed has been supplied by the seller and believe to be accurate. Updated sheets and announcements from the block will take precedence over any incorrect printed material.

Sale Videos

Videos of all bulls and heifers will be available online at www.dvauctions.com or www.meadowacressimmentals.com before the end of February.

Sight Unseen Program

We understand that it is never easy to get away and for some of our customers distance is now more of a factor than in the past. We know these cattle like the back of our hand and are confident we can select a bull that meets your specifications. Give us a call prior to sale day and we would be happy to go through the bulls with you and identify the right bulls for your operation. Contact Dustin or Kirsten to discuss. If you are not satisfied with your bull upon delivery, we will take the bull back and refund your money, no questions asked! We also have a professional team of sales consultants to assist you if you are not able to attend the sale that will help you find and buy the bull that is right for you.

Schedule

March 12th-Bulls available for viewing

March 13th-10 a.m. bulls available for viewing

-11:30 am lunch

-1:00 pm Sale

Hospitality to follow

We always welcome visitors, if you would like to come ahead of the sale, please let us know and we would be happy to show you through the bulls anytime!

Terms & Conditions

Cattle will sell under the standard terms & conditions put forward from the breed association and Bohrsen Marketing Services. These are available upon request.

Accidents

Although every precaution will be taken to protect the safety and comfort of people in attendance, neither the Sales Management or Meadow Acres Simmentals assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.

Directions to Meadow Acres

From Estevan north on highway 47 turn east onto highway 361 we are 8 1/4 miles east of Lampman on the south side of the highway.

From Carlyle take highway 9 south to the 361 WEST junction towards Lampman. We are 12 3/4 miles west on the south side of the highway.

From Northgate, ND take highway 9 north turn east and then north on highway 9 again and take the 361 junction towards Lampman. We are 12 3/4 miles west on the south side of the highway.

-- Welcome --

On behalf of our family, it is my pleasure to welcome you to our First Annual Bull & Female Sale. This Bull sale is the start of a new chapter for our operation that we are very excited about! As we grow and work towards making our goals a reality, moving the bull sale home was something that we had high on our list of things we wanted to accomplish. Although the sale is labelled as our first, we have sold our bulls previously with LaBatte Simmentals in Moose Jaw. It was a great opportunity for us to work with Barry and want to thank him for having us as a part of the sale. After five years we felt it was the right time to make the move home. So here we are; the location is different, the date is different but the values and basis that we raise and produce these bulls on is the very same. We strive to produce bulls that are functional for commercial producers, that are built to last and help you improve your bottom line. We take this very seriously and are always working to improve what we do to ensure that it also allows others to do the same in their own operations.

We look forward to showcasing a very strong set of bulls for your appraisal in our new sale location, at the farm just east of Lampman. As always, this year we are very proud of the group of individuals we will have on offer. They are a group that is consistent in their type; sound, high quality beef bulls that are grown with the goal of going out and working for you. We utilize many key management tools to ensure that we raise these bulls to have longevity and functionality for their new owners. We feed a high roughage based TMR ration and do not push the bulls in any way. They are on a full herd health plan since the time they are born to optimize the highest quality health possible. We do all we can to eliminate any guess work for you when selecting your next herd bull.

We would like to recognize our customers and thank you for your past support of our program. We realize that distance may be a factor for you now, however we are pleased to offer a sight unseen program, as well as a repeat customer discount to offset the cost of travel etc. New this year we are excited to offer a warranty program on the bulls, please ensure you read through the sale information to learn more about it!

Our sale will be a video auction, no bulls will be run through a ring. The sale will be broadcast live and online bidding is available through DV Auctions, so if you are unable to attend, you can bid and buy online. Videos of all animals will be available before the end of February on DV Auctions and our website. We have also enlisted a professional sales team to assist with purchases if you prefer. The teams from Bohrson and Bouchard will be familiar with the offering and are very capable of providing you opinions and feedback as well as take care of your bidding for you in a professional manner.

We welcome visitors to the farm anytime to view the sale offering. We are also very happy to go through them with you over the phone if you prefer. Feel free to give Dustin or myself a call to discuss the bulls or any details pertaining to the sale. We look forward to hosting you March 13th!

Sincerely,

Kirsten Fornwald

Meadow Acres is moving their sale home and they have their deepest set on offer to date with quality running throughout. We welcome you to their Bull & Female Sale that is sure to bring in a large number of neighbours and progressive cattlemen from afar to study this impressive set of bulls. Their high production cowherd has resulted in producing many elite and influential genetics in the business and their progressive approach to annually acquiring the very best will continue to produce excellent stock for you to benefit from and add to your own herds.

The bulls are truly deep in quality and the consistency in their pen is to be commended. From start to finish in the catalogue, you'll find individuals with muscle, stoutness, depth of body, hair, scrotal, eye appeal and overall completeness that can be an asset to the industry. We were really impressed with this offering when seeing them on grass last summer, again in December and now prior to the sale in early February as they always impress with their quality. A select offering of 13 open heifers will also be available and this group is sure to turn some heads and offer an excellent ROI for the successful purchasers as they are selected out of the heart of their program.

Dustin, Kirsten, Blair and Laurel welcome you to their farm for their first annual on farm sale. We guarantee that you will be impressed with the cattle and the excellent hospitality with it the sale. We encourage you to visit with the Fornwald's on the offering, view the strong cowherd that backs these bulls and be with us on March 13th in Lampman. If you can't make it on sale day, feel free to contact them or any of the staff to represent your needs in your next bull and female selection. We look forward to visiting with you at this exciting sale as it is sure to be a highlight event of the spring sale season.

Best Regards,
Scott Bohson
Bohson Marketing Services

Welcome to the 1st Annual Meadow Acres Simmentals Bull & Female Sale. This year brings new and exciting changes to the way the folks at Meadow Acres will market their bulls. For the first time, the bull sale will be moved to the farm and will follow up a very successful female sale that was held at the farm for the first time as well. Also for the first time this year the bulls will be sold by video and will be penned on farm. You will be able to look at the bulls in their home environment which means a more accurate evaluation of the bulls. Please log on to DV Auctions to view the videos ahead of time.

The offering this year is nothing short of great. The bulls are stout, big middled, and sound. The folks at Meadow Acres work very closely with their Veterinarian and Feed Nutritionist to ensure that the bulls are developed on a herd health protocol and TMR ration that will allow them to breed successfully and last as long as possible. Whether you need a heifer sire to walk in your replacement pen, a maternal sire to keep replacements off of or a terminal sire to raise those top end steer calves, there will be a bull to fit your needs. Meadow Acres prides themselves in using a top end AI and Walking Herdsire battery as well as a herd of excellent mama cows to ensure the bulls they sell are as genetically superior as they can possibly make them. Please bid and buy with confidence as these bulls on offer are bred and developed to go out and work and are guaranteed 100%.

Also on offer will be a select group of purebred open replacement heifers. These heifers are fancy in their kind and are very soft made, stout and sound. Take them home and breed them to the sire of your choice to optimize a greater return on investment. There will also be a number of heifers that could be used for a show project as they are the kind. These heifers are the younger sisters to the bred heifers that sold in the very successful Maidens of the Meadows sale a few months ago. Do not hesitate to bid on this excellent set of heifers.

Please plan to join us at the farm on March 13th for the 1st Annual Meadow Acres Bull & Female sale. If for some reason you cannot make the sale, the team at Bouchard Livestock will be very familiar with the offering. Please do not hesitate to give myself or any one of our team a call as we will be happy to assist you in a very professional manner in the purchase of your next Meadow Acres herd sire or female. I hope to be able to visit with all of you in Lampman and wish you all the best in 2019.

Sincerely,
Danell Fornwald
Bouchard Livestock International

LRX BLACK SABRINA 90R

The Lot 1 decision must be one of the most nerve-wracking ones when it comes to the catalogue layout, but the Sailor sire group is the largest of the offering this year and this bull is a Rockstar! His sire, MAF Drunken Sailor 266C, was purchased as our high seller at the 2016 bull sale for \$25,000 to W2. We were excited to utilize Sailor in our own program and flushed our very best Poker Face daughter to him that spring. The flush was very successful, the first three bulls in the offering are ET brothers and we have 4 full sisters in the replacement pen that are equally impressive. 32F has a commanding presence to him, is wide topped, thick made and yet maintains a softness to his design. A bull that is bold and powerful with explosive rib shape and muscle pattern. He has excellent testicular development and is extremely sound made. He is backed by some of the best maternal names in the Simmental business; Poker Face, Captain Morgan and Black Joker. A bull that offers so much in terms of power, presence and pedigree.

An ET bull that offers up power and profile like his lot 1 brother. The dam, Sabrina 89B, is a beautiful black baldie cow with a fantastic udder and phenotype. We have a maternal sister to these bulls that just calved out, she will blow you away with her exceptional udder structure, femininity and overall type and kind. A female that is destined for the donor program already. 93F was hit hard with pink eye in both eyes in the last few weeks before weaning, it is the factor behind is weaning weight being lower than his brothers. I think that these ET brothers are going to be great bulls to utilize both the performance and maternal strengths that the Simmental breed is known for. They should produce pounds and fabulous replacement females that will be very productive and highly marketable.

The baldy brother of the bunch who is homo black and homo polled. He is a complete made bull, moderate framed, thick and stamped with the same look that you will find the Sailors all have. This group of Sailor bulls has been a standout with visitors since the summer time for their consistency, thickness and look they possess. I really like that the bulls in this flush are masculine made and the heifers are thick yet have all kinds of femininity and tremendous maternal look to them. A nice pedigree to compliment this guy and one that is fairly outcross on the bottom side to most Black genetics of today, the granddam LRX Sabrina was a powerful cow that was outstanding in her phenotype.

A pretty cool bull that when you talk about different genetics, he offers a unique bottom side to his pedigree for north of the border. His dam is a Pays to Dream daughter that Scott bought for us out of the Tingle Female production sale as a bred heifer from Palmer Cattle Co. I will never forget how bad I felt for that heifer showing up at the end of October from Kentucky, but she adjusted well and is a hard-working female with a very nice udder and we are really pleased with how she has crossed with our genetics. 153F is the perfect example of that. He has always been one of my favourites; he is long spined, stout made and stamped with a real herd bull look. An intriguing bull that has a lot of dimension, thickness, depth of body and overall completeness.

MADERTWISTED SISTER 25Y
JENI BLACK WHAMMY 1W

There are some bulls that are just so laid back that it is very tough to get a picture that does them the justice they deserve, 3F is one of those bulls! A bull that you need to see to truly appreciate, he is STOUT, has huge testicles, great bone and feet. A bull that really puts it all together. On paper he also reads well, an EPD profile all above average and a pedigree that brings some of the greats on the black side all together. His mother is a 680S daughter we bought from Mader's as a calf that has been a very consistent producer, raising bulls that have sold to W2, Spring Coulee Enterprises and City View Farms as well as daughters to Sunny Valley, Krueger's and Percyview Farms. A pedigree that offers up consistency and predictability in an unbelievably docile and massively made individual.

Dam KWA FLYF RED MOUNTAIN 16Z
KWA MS MOUNTAIN 12B
 KWA MS BUNDI 21Z

When this bull was only a few weeks old he gave us a real scare. Him and two other calves somehow escaped from the corral and we spent hours searching for them, finally just before dark Blair found the little guys ½ a mile from home and completely ok! It was the craziest thing! 99F is the only red Sailor son in the offering and he definitely stands in nicely with the rest of the sire group. He is long-spined, carries a bit more frame size and is very soft made in his design. I really like the balance this bull has, he has a lot of muscle shape and thickness all while maintaining clean lines and extension through his front end. Lots of middle and eye appeal bringing forth the consistency of his sire group as well as maternal strength from his excellent uddered black Red Mountain dam we bought from Ashworth's as a bred heifer.

A really long-spined Captain Scream bull that has a lot of character, thickness, rib shape and a softness to his muscle pattern. 144F is very complete made and has all kinds of great hair. This bull is backed by an outcross red pedigreed cow that has an excellent udder and has been a solid producer. The Captain Scream calves are the first available of the two-time Agribition Champion bull that is now deceased. His semen is in limited supply and continues to bring a premium. With bulls like this, it's easy to understand the popularity.

KWD MISS SONJA 105K

The first time we saw Captain Scream in Edmonton at Farm Fair as a calf we knew we had to get our name on the semen package list. He was the right kind in terms of overall completeness, thickness and style. We used up the whole semen package that first breeding season and ended up with a lot of females in the replacement pen that we look forward to having a part of our herd. A moderate framed bull here that is well balanced, thick made, sound and a practical breeding piece. His mother is a black baldy cow that always just goes about her business and produces a solid calf every year.

The Captain Screams keep coming with ideal qualities for all of us in the beef business! 145F possesses a nice muscle pattern, ideal phenotype with length of spine yet plenty of thickness all in a moderate framed, great haired package. His dam is a daughter of Springcreek Liner 56U and IPU Pocahontas 52N, that is moderate framed, excellent uddered and always produces progeny with tons of thickness and shape to them. We flushed a maternal sister to this bull last spring and have an exciting group of ET calves on the ground that we look forward to watching develop. Exceptional udders and foot quality are a given in this cow family, one of the most recognized and sought-after cow families in the breed. This bull offers up strong maternal greats throughout his pedigree that will have a positive outcome wherever he goes.

Keeping with the Dreamlady cow family we lead off the Westcott sons with 111F, this one screams herd bull! He has been one that makes you stop and take another look since he was just a few days old. He is long-bodied, smooth, stout, soggy, has nice extension yet is explosive in his overall dimension. He has that Westcott look to him and continues to be more impressive all the time. His dam is a Royal Red four-year old daughter that was one of the heifers that we kept from the picks in our inaugural Maidens of the Meadow female production sale. She is beautifully uddered, long bodied and is an excellent producer, with an exciting Springcreek Launch heifer calf this year! 111F is in the top 2% for weaning weight and top 3% for yearling weight.

Another bull off a heifer we were able to keep from the choice lots in the first Maidens of the Meadow sale in 2016. She did a fantastic job on her first bull calf that sold to Lacasse Farms last year. She has done it again and has easily come to the top of the Royal Red sire group as the most consistent bull producer with another good-looking Launch bull calf on the ground this year. These Royal Red females are really just starting to make their mark, with beautiful phenotype and perfect udders and raising bulls like these last two, it's easy to see why their future is so bright! This dark red bull is as stout and soggy as they come, offers a lot of width and depth with excellent testicular development. Like the Westcott's are known for, this bull is performance orientated and easy doing. Another big-time herd bull in the making.

Cattlemen pay attention here! This is the only Capone son and he is definitely one that you should pay close attention too. His dam, a Lotto daughter, was the high seller at our first female sale to First Class Cattle Co. She was being flushed here the spring of 2017 and there were a couple embryos that weren't freezable, so we bought them and put them in fresh. We ended up with two calves, this bull calf and a nice heifer calf as well. To say that the cross worked well would be an understatement. This bull is deep dark red, very long bodied, very thick and smooth. He weaned off heavy and since going on feed hasn't slowed down and currently is the heavy weight in the pen. He continues to impress us more all the time and has been an early favourite of visitors to the bull pen. He is impressive in person and very well laid out on paper as well. A bull that will command your attention.

I have a hard time keeping this bull until now in the catalogue layout, but here is a very special one that has herd bull written all over him! This bull has been a favourite around here since he was just little, with his super friendly and easy going demeanor. The girls always were on the look out last winter and spring while helping with chores for 7F so they could give him a pet or a scratch. What really makes him special though is his look, shape, build and character. I love the way that this bull is put together; his explosive muscle pattern and middle, the top in him and the softness. I think that you really need to appreciate how effortlessly he combines that muscle with his length and extension through his front third. This Deputy * Horizon cross is an outstanding one. His mother is a first calver that did a whale of a job, moderate framed, very good uddered and lots of muscle and femininity to her. If you followed our female sale at all you would see that the Specialist females sired some of the very best in the offering, they bring the right type and kind and this bull will follow suit being backed by some of the very best in the breed. A bull as strong on paper as he is in person, an exceptional set of EPD's to support this bull. As close as you will get to a curve bender bull here no doubt.

We begin the MRL Starter sire group with this impressive son out of a first calving fall born heifer. We purchased The Starter with Bouchard Livestock as our pick of the heifer bulls at MRL that year. He has matured into quite a bull and has been used to clean up on the red heifers for the last couple of years. The Starter son we sold last year was the right type and kind, these two sons are the same. 9F's dam is a fall born first calver. The heifers born in our fall program we hold over to breed for the first time with the winter born heifers, so they do have a bit more age and size on them by the time they calve. This dark red bull is a real meat machine with excellent testicle development and masculinity. He is thick, deep, has lots of rib shape and is an all-round herd bull in the making.

KAPPES SADIE M166

Dam KUNTZ SHERIFF 8A
MILLINGTON LADY 2D
BLCC MISS RED ROCK 148B

A bull with a calving ease pedigree and build, this bull is another Rambler out of a first calving Sheriff daughter, we purchased at Agribition from Millington Ranch as a calf. His mother was Brenna's 4-H heifer in 2017 and they had a very good year together. Princess as she is more affectionally known around here just calved out again a couple days ago with another small birth weight heifer calf. This bull has CE and BW EPD's in the top 5% and 1% respectively and when looking at the bull he still exhibits nice muscle shape and pattern.

A dark red Rambler son out of a high performing Accelerator cow. His maternal sister was a feature in our Maidens of the Meadow Sale that sold to Millington Ranch. One of the biggest drawing cards for us when incorporating Rambler into our program was the cow family behind him, the Kappes Sadie M166 cow is legendary female within the breed and brings power and proven consistency to the bull. Last year our high selling bull sold to Lewis Farms from the same cow family who is doing a fantastic job there. An individual that is more performance orientated, dark red, hairy and very complete in his design.

The Royal Red/Rambler combination just keeps coming with this dark cherry red, February born bull. Loads of length, profiles nicely and is smooth made. The Shamrock cow family is a large one here that are high productive, have good udders and phenotype. This is the same cow family that produced our high selling Riddler daughter to Crowe Bros in Maidens of the Meadow for \$16,000. This bull that ranked #1 in his contemporary group for weight and is in the top 20% of the breed for weaning weight.

 ULTRA TEMPTRESS CLAIR 12R

A really unique Alliance son to lead off the sire group. 91F is flashy in his make up, long bodied, with all kinds of extension through his front end. He pulls all this together with an impressive muscle pattern, thickness, middle and dominating herd bull presence. When looking for a new black bull to use in the heifer pen in our AI program, we came across Alliance and we are very pleased with the sire group. We always sample these bulls on heifers and a few cows just to see how they work in both directions. This bull's mother is a beautiful Exciter daughter that has lots of middle and very good uddered. We really like the Exciter females, they are the right type, moderate in frame size and huge middle and always produce. This bull will catch your attention and not disappoint the more you study him.

85F is a Homo Polled, Hetero Black Cobra son that will check a lot of boxes if you are looking for consistency, predictability and maternal strength. Another bull off a first calving Riddler daughter. Last year we highlighted how impressive the udder quality was on the first Riddler's we had calved out and they continue to impress us in production with the bulls that they have produced for this year's sale and the females we have in the replacement pen. You add to that breed staples like Cobra, as well as 680S and this is a dynamic and powerful pedigree bull. 85F is stout and made right with a moderate birthweight of 72 lbs and a strong weaning weight, it's safe to say he is the right kind. An outstanding EPD profile with all indicators above breed average.

133F is a red Sailor daughter that is as long bodied as they come and was the heaviest heifer calf at weaning time. She is well balanced with lots of rib shape and all kinds of extension. Her mother is made very similarly; very long bodied and eye appealing.

An Alliance daughter that is moderate in her type and well balanced. Clean in her lines, tons of hair and docile. These Alliance calves offer up some versatility in pedigree and EPD's. A heifer that will be a sound, functional female.

198F is another Sailor daughter that has a lot of depth, length and femininity to her. Her mother was a Combustible bred heifer that Don and Betty Kreuger purchased at the first Maidens of the Meadow sale and we keep her here for them with a few other females.

A mid February heifer out of a first calving Riddler daughter. Black Out is a Vision son we bought for a clean up bull in the black heifer pen. We got quite an impressive set of daughters last year, like this one. She has an excellent EPD profile and is very eye appealing.
