Sales Management

When our BMS Team visited prior to touring in this summer, we discussed the Agribition Simmental Sale and its past strength and how to make it even stronger into the future. We all agreed that we need to concentrate on two very important things to continually make this sale successful ... 1) continue to incorporate new breeders that are progressive and give this sale an outlet to market the very best of their program 2) dig deeper and demand the very best cattle to sell in the Agribition Sale and make it one of the most elite sales with depth of quality in the breed. We are proud to say that the consignors to this years sale stepped up and it will be one of the deepest offerings we have had in recent years.

As we approach 49 years, this special sale has withstood the test of time and continues to be one of the most enjoyable events that breeders from throughout Canada attend and thoroughly enjoy. This years edition has something for the most critical of cattlemen with depth of quality in the live and frozen sections. The genetics are elite and the breeders that stand behind them are the future of the breed and offering their very best.

Agribition is world-renowned and is an ideal place to attend to visit with fellow breeders, watch an impressive cattle show and take in this awesome sale that is loaded with top genetics to enhance your program. The ROI has proven to be as strong through this ring as any in years past and it is loaded once again from front to back this year. We look forward to visiting with you at Agribition and taking in the 49th Annual Simmental Sale.

Saskatchewan Simmental Association

SASKATCHEWAN SIMMENTAL ASSOCIATION | PRESIDENT | WWW.SASKSIMMENTAL.COM

On behalf of the Saskatchewan Simmental Association, our board of directors and members I am privileged to welcome you to the 2019 edition of the Canadian Western Agribition Simmental Sale. Each and every year we host an enthusiastic group of exhibitors and visitors to Agribition. It truly is a world class event that showcases Agriculture as well as our diverse and progressive Simmental breed for people worldwide.

This year we have an excellent offering that has been compiled by Scott Bohrson and his team at Bohrson Marketing Services. We would like to thank them for investing their time and efforts into continually selecting the high calibre of cattle you will find within the catalogue. Thank you to all of the consignors of this year's sale, without you none of this would be possible!

Thank you to McIntosh Livestock for donating this year's SSA Scholarship Donation heifer and to all previous donators. Our Scholarship Program continues to be a great way to support our youth involved in our breed by offering post-secondary scholarships. If you are a Saskatchewan Simmental Association Member and have children that are or are going to be attending post-secondary schooling in 2020, don't miss out on these opportunities, which are available on an annual basis.

We look forward to hosting you for our Simmental Show Wednesday November 27th and pizza supper in the John Deere Sales Pavilion prior to the sale. It is an event you will not want to miss!

Kirsten Fornwald, Saskatchewan Simmental Association President

donation lot MCINTOSH *Chloe* 41G Hetero Black / Homo Polled / 1281121 / SBMC 41G / Jan 24, 2019 / bw-102 / ww-900

We have planned for a long time that one day we would be donating a heifer for this great cause to support the youth involed with the simmental breed. The heifer we decided to donate comes right out of the top end of our heifer pen. McIntosh Chloe 41G is an embryo transplant baby out of a very successful flush here, you will see more full siblings campaigned this fall. A direct daughter of the late great Captain Scream and out of our Stubby X Liner 56U bred donor. Chloe carries exceptional growth numbers ranking in the top 1% for weaning and yearling weights! These numbers are reflected in the amazing mass and volume she possesses, and in her actual weaning weight of 900 lbs. In our opinion Chloe is going to make a great momma cow that can go any direction you wish.

BLACK GOLD GR *Cream Soda* 844 Homo Black / Homo Polled / 1283960 / VCC 844F / Mar 15, 2018 / bw-81 / ww-
We are excited to offer this elite pedigreed female in the annual CWA Simmental sale. The Cream Soda cow family has been making waves every year since the "Soda Pops" debuted at Friday Night Lights in 2014. When we acquired Cream Soda herself in 2016, we knew the combination with Loaded Up had great potential. The first Cream Soda daughter we have ever offered comes to us with a combination of a unique look and build, with still an abundance of power from behind. Very bold ribbed and muscular up high, 844 also offers an attractive, up headed presence. All while stepping down on a soft ankle and correct foot. Bred to the no miss "Cobra", we feel her first calf has the chance to be very profitable. We aren't sure if or when we will consign another Cream Soda daughter to the public, so come find 844 in Regina this fall. The majority of our fall string will go back to Y010 herself!

HPF *Cream Soda* Y010 / stored at Bow Valley Genetics / exportable to USA & AUS

When discussing "great ones" in the Simmental breed, Cream Soda Y010 would rise to the very top with very few in the same league as her. She is impressive in her appearance but her track record is what sets her apart from the others. She is the dam of the outstanding flush at the FNL that fetched \$92,000 which included the great show cow from Black Gold that has been dominant in the 2017 Show Circuit. She is also the dam of 2 females that sold to Windy Hill that have entered their flush program and they are building their program around. Her production goes on and on and on with many other accomplishments in her short career such as a herd sire walking at LaBatte Simmentals.

SVS Jewel 955G comes to you with a fresh, exciting pedigree. Her sire, Classified, is the \$70,000 high seller out of the Hudson Pines dispersal. Her dam, 135D, is a \$43,000 high seller out of the LaBatte program. 135D is a donor female that you will hear a lot more from in the future. 955G herself is extremely attractive, well balanced and sound structured. Her disposition is excellent, she has a great hair coat and will be very competitive in the show ring. Jewel 955G is loaded with potential and is one that we hate to part with!

lot 2a

135D comes from the highly respected LaBatte program where she was a \$43,000 high seller. She was a female that when I first saw her, I had to have her. We teamed up with Rancier Farms & Canadian Donors to get her bought. She is an easy keeping, bold sprung female with an excellent udder. Her mating to the great Captain Scream should be an ideal cross.

lot 4 We have been really impressed with the Missile progeny and especially admire his daughters! So using him on our Soda Pop female made perfect sense. She is a member of the Poker Face/ Cream Soda flush that created the Soda Pop heifers who sold at FNL 2014 that people still talk about today! We purchased 412B back in the fall of 2015 and are sure glad we did, she went right into the donor pen. Her production record has been exceptional with 3 bulls selling in 2017 to average over \$16,000, an embryo bull calf from Outlaw sold to KT as his high seller, and her natural calf went to Jaydawn Farms and was a high selling bull for us, her heifer from 2018 is retained in our herd. Soda Pop 901G is a standout, she is exactly what we expect from the Soda Pop females - she is solid! A true beauty, she is feminine through her front end but displays great muscle expression in her big strong hip structure along with her huge sweeping rib shape. She exhibits tremendous breed character! We truly believe in this great young star and honestly believe she will be a dominant cow into her future. Trust in her to carry on the tremendous value the Soda Pop females have created for their new owners!

lot 5

When you get the opportunity to analyze this heifer you will appreciate her capacity, softness, and easy doing look. She comes to you backed by one of the best cow families we have ever had on the farm. Her granddam 37N is our now deceased Black Joker daughter who has done great things for our program. She sold 11 bulls to top end breeders and progressive cattlemen. Many daughters and granddaughter have topped sales such as Canadian Western Agribition, Friday Night Lights, Erixon Simmentals Bull & Female Sale, and are in production on our farm. We think the support pictures for 22G exhibit just a very small sampling of what this cow family has done. We have shown and sold more cattle out of this cow family than any other on the farm. In fact, Erixon Lady 68B has her own story. She raised a high seller at Simmsational in 2017 for \$23,000 who is donor female that resides at Rainbow River Simmentals The ground work has been done right here, buy into a great cow family!

Mary 1G has the genetic foundation to be a great producing female. Her dam, LFE Mary was purchased as a high selling cow out of the Cobra event last summer. The Riddler calf she had at side would have been within our favourite heifer calf in the sale, and this years calf is no exception. The Beast Mode progeny are proving to have that extra rib shape and muscle dimension, and you combine that with Cobra's influence to sire progeny with extra extension, style, and udder quality...You get Mary 1G's phenotype! She is broody made with extra depth and spring of rib, very good in her lines and structure, has beautiful teet placement and udder suspension coming, and is an absolute pleasure to be around and work with! Our son showed her this summer as his Jr project, and she was very competitive throughout shows!

This royally bred heifer is backed by one of the most famous cow families in the breed. She is flat out good from every angle and has everything it takes to be a winner both in the ring and the pasture. You can't help but appreciate her super sweet front, stylish profile and fluid movement. Her Dam is none other than RF Certainly Flirtin 202Z, who has not only dominated in the show ring but as a important breeding female. She has earned Elite Donor status with over \$600,000.00 in production sales. 202Z consistently produces powerful offspring that are highly sought after because of their ability to excel in every herd they are used in. 913G is the result of a flush mating to W/C WideTrack, he was chosen for his ability to sire calves with power, attractive profiles and superb udder quality. Here's your opportunity to own a great one, chances like this one don't come very often.

This year was our first calf crop off the LFE Night Hawk 3013D bull and we were impressed with the calving ease and growth of his calves. All the calves off of him were born unassisted and we have kept them all in either the bull or replacement heifer pen and we are excited to see them develop, including this heifer we are offering. 912G has tremendous depth of body and a striking profile that will catch your eye every time. One of her greatest features is the way she transitions from her fore rib, through her smooth shoulders and up into a beautiful head. She's a feminine, stylish heifer that is structurally sound and would be a great addition to your herd!

CMS Duchess 965G is an attractive blaze face heifer, the third maternal sister to sell at Agribition out of our impressive donor cow IPU Temptress Clair 105C. The first sister sold to Kade Earley and the second sold last year to Dunluce Farms. Duchess is a deep sided, clean fronted heifer who has a lot of power for being a mid-March heifer. She had a modest 82 pound birthweight, but has gained well with a 3.45 ADG. Her sire, Barlee Ranger Smith, is an impressive pedigreed bull who is working well at Ultra Livestock. He has stamped this heifer with the Milestone look, and we are excited to see more calves from this mating. Duchess 965G is a heifer we are proud to put on offer and we are confident she will produce well for her new owners.

"Miss Piggy" as Blake named her at 24 hours old is out of a young red baldy cow that we flushed this spring that is quickly proving to be a top producer in our herd. Miss Piggy is a sound made, long spinned female with a maternal brood cow look to her. The Twylight cow family is rapidly growing within our herd due to their tremendous udder structure, volume and ability to work however they are mated. Miss Piggy will be accompanied in our stall by her maternal sister. Stop by for a visit and to check out this absolute sweetheart.

 Sweet Marie 193G is soft made and angular, and with her bold, sweeping rib cage, she definitely has a certain presence about her. Her young dam is a fancy, clean made, Authority daughter, with lots of neck extension, that is already leaving her mark. Her son Motley 77F was a feature at last year's Southwest Showcase Bull Sale, selling to Doll Simmentals in North Dakota. He was also a member of our Champion Pen of Bulls at the Medicine Hat Pen Show last fall. A 3/4 brother to him, Motley 163E, was the anchor to our show team in 2017. A 3/4 brother to Sweet Marie's dam was a member of the Champion Pen of Bulls at the pen show in 2015 and went on to sell for \$50,000. The style, correctness, and phenotypic presence of the cattle produced from this cow family has been undeniable and we feel Sweet Marie 193G will proudly carry on her family's legacy.

At the 2016 National Western Stock Show, GVC Blackstar created tons of buzz and commanded \$60,000USD. We were excited to team up on her full sister with Black Gold Simmental for \$40,000 USD and she has proven to be a great producer. This young donor has developed into a beautifully uddered female with a bigtime look. Her first progeny have been well received, commanding \$25,000 and \$8,250 through Friday Night Lights in 2018 plus a herd sire retained at Harvie/KT that was recently selected the Grand Champion Bull. Ava is sired by the female maker Built Right, whose popularity has stood the test of time and been proven out through his daughters. The matings on offer are some of the best we can make and guarantee a happy customer when they hit the ground ... our confidence in Ava B408 is as good as any in the industry!

IPU *Bentley* 81F semen / stored at Bow Valley Genetics / exportable to Canada USA & AUS

100 doses in 10 dose packages :: no more semen available for one year and this is the only semen available for the 2020 breeding season. IPU Bentley 81F was the talk of the spring and was the \$92,000 black high seller at the 2019 Labatte bull sale to Jaydawn Farms. Since then, Bentley has become one of the most talked about baldy bulls from the spring. He was the highlight bull in an outstanding sire group, sired by the \$100,000 Wheatland Bentley. This will be the only semen offered for the 2020 breeding season and this exclusive semen is a great option to take your program forward. Utilize Bentley to add style, stoutness, hair, shape, foot quality and overall marketability to your calf crop. He is backed by a highly productive cornerstone female that is solid udder and strong footed.
