

5TH ANNUAL
RAINBOW RIVER

Simmentals

BULL & FEMALE SALE

FRIDAY, MARCH 13, 2020
1 PM CST, ON THE FARM, FISHER BRANCH, MANITOBA

YEARLING BULLS - TWO YEAR OLD BULLS - OPEN HEIFERS - EMBRYOS

Welcome

One of the most proactive programs in the Simmental breed is without a doubt, the good people at Rainbow River Simmentals. Dustin & Jennilee are very passionate about this breed and study it inside and out to better their program and offer the very best livestock to their valued customers. Their attention to detail and desire to breed the best Simmental cattle in the business comes very serious to them and you can rest assured that when you buy into this program, you're investing in stock that is bred to perform.

As the livestock industry continues to evolve, it takes strong genetics to stay at the forefront of it and you can find many of the very elite through this deep offering. The investment into Impact resulted in extreme high-quality sons and daughters that are awesome footed, structurally correct, beautiful udder and highly productive. We recognize this bull as one of the high quality breeding bulls in the industry and after his unfortunate loss last year, jump on these genetics while they're available. They have invested in exclusive genetics such as Riddler, Westcott, Denali, Captain Scream, Lawmaker for example that were offered in limited availability and the Stewart's had the foresight to add these genetics to improve their programs. They have done an exemplary job adding strong bulls to their line-up but one important asset they have done to separate themselves from a high majority of competing breeders is investing in the best females in the business. They have many of the top donor cows in the breed that are selected for udders, feet and productivity ... the key components of running a successful cow/calf program. Make note, there are some exceptional embryos featuring a couple of these donors at the back of the book on offer as well.

We thoroughly enjoy working with the Rainbow River program as they show the same passion and attention to detail that we build our values on. This sale is one that you can invest in with confidence as the quality is elite and they fully stand behind their program 100% and want to ensure that you are a happy customer. We hope you can join us in Fisher Branch but understand it may not be around the corner from you but it is worth the trip to see these sale cattle and impressive cowherd that backs them. If you can't attend, feel free to contact Dustin, Jennilee or any of the sales staff to represent your needs in a confidential manner and we will source you the genetics to best compliment your program. We look forward to visiting with you on March 13 for the 5th Annual Rainbow River Simmentals Bull & Female Sale.

5TH ANNUAL RAINBOW RIVER *Simmentals* BULL & FEMALE SALE

FRIDAY, MARCH 13, 2020
1 PM CST, ON THE FARM, FISHER BRANCH, MANITOBA

First off, Dustin and I would like to extend our sincerest gratitude to all of our past customers, under bidders and everyone who has expressed interest in our program. We are so very grateful for your continued support.

As I think back on this past year, I begin by being humbled with a very successful 4th Annual Sale last March, despite the stressful challenges we faced leading up to the sale with more Decision Deferred bulls than we've ever had before. So again, thank you from the bottom of our hearts for your support last year and thank you to our customers who purchased DD bulls for your patience and confidence in things working out. Every DD bull we sold did eventually pass their semen re-tests and we have received positive feedback on our bulls sold last year. It's always very rewarding knowing that the bulls we work hard to breed and develop go out and do a good job for our customers.

As a result of the drought in 2019, we elected to wean in mid-August, three to four weeks earlier than usual, and we were impressed with how well the calves performed despite the trying conditions. The weather smartened up later in fall, giving the bulls and heifers a chance to really perform in the milder weather. While on test, we have evaluated the bulls for performance and scrotal development multiple times to ensure they make the cut into this sale.

Dustin and I decided to change the bull's feeding program this year. I worked with our sales rep at Masterfeeds to develop a custom bull ration that meets my standards. I strongly believe in the value of a good mineral program and the Masterfeeds Blueprint chelated minerals have worked extremely well in our program over the years. Holding nothing back from our pen of bulls, I wanted to create a bull ration that would include that same, high quality, Blueprint technology. Thank you to George Hamilton for working with me on that. As you will see, the bulls have developed at an optimal rate, are in ideal body condition, and will be ready to get out and work for you this spring.

The sale offering in 2020 is our strongest to date with both power and calving ease bulls to select from, as well as the strongest group of open heifers we have offered. New this year, we decided to add in some exclusive frozen genetics from our most elite donor cows. There are some big time opportunities awaiting in the embryo section of the catalogue!

In the black bulls, the sons off our walking sire, RF Impact 601C, have been highlights all year and deserve your serious consideration. On the red side of things, the Captain Scream bulls are features again this year and represent our largest sire group on offer. We have a number of bulls sired by old faithful sires, and we also have two new sire groups with the Denali and Red Summit sons. From our embryo transfer program, there are a number of high quality embryo bulls that are sale features.

We look forward to hosting you at our farm on Friday, March 13. Come early to ensure you have enough time to view the bulls outside before heading into the heated sale barn to enjoy a delicious, hot lunch, courtesy of us. If you can't join us in person, absentee bidding is available online with DLMS or with our sales management, Bohrsen Marketing. The bulls and heifers are always available for viewing ahead of sale day, so give me a call to schedule a viewing if you'd like to come take a look. The Bohrsen crew has also been through the bulls, once in early February and again the day before the sale, so don't hesitate to contact myself or one of our Bohrsen sales reps if you need assistance making a sight-unseen selection. I would be very happy to talk you through our offering and help you select a bull that is right for your program. Feel free to give me a call or shoot me a text with any questions you might have. We hope to see you on sale day!

Cheers, Dustin & Jennilee

March
13TH
2020

LUNCH:
12:00 PM cst

SALE TIME:
1:00 PM cst

DIRECTIONS:

From the corner of

Fisher Branch at Highway 17:

Drive 3 miles north on highway 17, turn west onto Rd 144N and go 3 miles until you come to your first stop sign. Turn north onto Rd 9W and we are the first farm on the west side, up on the hill.

**From Provincial Road 325
east of Ashern:**

Turn south off PR 325 onto Rd 9W, go a little more than 3.5 miles on Rd 9W. We are the first farm on the west side of Rd 9W after the curves.

Sale Day Information

VIEWING THE SALE CATTLE

BEFORE SALE DAY

- The sale bulls and heifers will be available for viewing anytime prior to sale day.
- We encourage customers to come to the farm ahead of sale day so we can give you a more personalized tour through the sale cattle. We are always willing to tour you through our cow herd and heifer pens to show you the dams and sisters to the bulls and heifers on offer.
- If you'd like to come see the sale cattle prior to sale day, please contact Jennilee to schedule a viewing.

ON SALE DAY

- The bulls and heifers will be penned in groups near the sale barn.
- Since this is a video format sale, the cattle will not be run through a sale ring.
- Be sure to arrive early enough on sale morning to allow adequate time for you to sort through the cattle in their pens before the sale starts.

Sale Contacts

ACCOMMODATIONS

Fisher Branch Motor Hotel, Fisher Branch: 204-372-6351
Country Harvest Inn, Broad Valley: 204-372-6618

SIGHT UNSEEN PURCHASES

If you are unable to attend the sale or unable to view the bulls and heifers prior to sale day, we would gladly assist you with making a sale selection. Please contact Jennilee to discuss the bulls and heifers in our sale offering, and your specific needs, so she can help you select a bull(s) or heifer(s) that is right for your program. Also feel free to contact a representative from Bohrson Marketing as they have been through the sale cattle and will represent your needs in a professional manner.

Offering

13 RED YEARLING BULLS

12 BLACK YEARLING BULLS

2 TWO YEAR OLD BULLS

5 OPEN REPLACEMENT HEIFERS

4 PACKS OF FROZEN EMBRYOS

DELIVERY

Option A: Take your bull home sale day and receive a \$100 credit per bull. Heifers must be picked up on sale day unless prior arrangements have been made.

Option B: Free delivery on bulls to central points in Manitoba, Saskatchewan and Alberta, or to the nearest Canada-USA border crossing. In most cases, we will deliver right to your yard. Delivery will begin immediately after the sale at the seller's convenience. If you are unable to receive your bull when we are delivering to your area, the bull must be picked up from Rainbow River Simmentals at the buyer's expense.

Option C: Bulls may be left at the farm free of charge until April 1. A rate of \$5 per head per day will apply after April 1 and bulls will then need to be picked up by the buyer at the buyer's expense no later than May 1.

If your bull or heifer is to be left at the farm after the sale, we insist that all purchases be insured while remaining at Rainbow River Simmentals. All bulls and heifers become the risk of the buyer as soon as sold. While we will always take every precaution to provide the utmost care for your animal, we are not responsible for any illness, injuries or mortality after the animal is declared sold.

INSURANCE

A livestock insurance agent will be in attendance sale day for your convenience: Keystone Livestock Services

Lois McRae | Cell: 204-573-5192 | Home: 204-728-3058

U.S. BUYERS

- Our sale is conducted in Canadian funds. Exchange rate will be announced on sale day and will be available at the settlement desk.
- For bulls and heifers sold to American customers, Rainbow River Simmentals will assist with the necessary health testing, vet exams and paperwork required to export your animal.
- Export fees are the responsibility of the buyer.
- In order to cover the cost of veterinarian, U.S. Customs and brokerage charges required to export your animal, a fee of \$300 USD per animal purchased, will be charged for this service and is due at the time of settlement.
- Trucking to our nearest U.S.- Canada border crossing (Pembina, ND port of entry) is free of charge, assuming that all U.S. bound bulls and heifers will be transported to the border in one shipment.
- Trucking from the U.S. port of entry at Pembina, ND to the buyer's final destination will be the responsibility and the expense of the buyer, unless prior arrangements have been made.

BREEDER GUARANTEE

- All bulls and heifers are guaranteed to be satisfactory breeders in accordance with the standard guidelines set forth by the Canadian Simmental Association.
- If a problem occurs with your purchase, please notify us as soon as possible.
- A bull of equal value and quality will be supplied, if available, or a credit given towards the purchase of another bull.
- Any credit issued must be used in the following year's sale and will expire thereafter.
- No refunds will be issued.
- This guarantee does not cover death, injury, sickness or mismanagement.
- Complete breeder guarantee details are available on the Canadian Simmental Association website at www.simmental.com or under the Terms and Conditions specified in this catalogue.

SEMEN TESTING & SALE WEIGHTS

- Bulls will be semen tested, scrotal measured, palpated and inspected by a veterinarian.
- Heifers will be palpated and confirmed open by a veterinarian.
- Sale weights and semen test results will be posted on our website prior to sale day.

IN-HERD SEMEN COLLECTION

Rainbow River Simmentals reserves the right to collect semen on any bull sold through this sale. The semen collection will be at Rainbow River Simmentals' expense and the buyer's convenience. Any semen collected will be for Rainbow River Simmentals' in-herd use only.

WEANING DATES

- Bulls were weaned on August 18, 2019 using the quiet wean process.
- Heifers were weaned on August 19, 2019 using the quiet wean process.

HEALTH

All bulls and heifers have been on a total herd health program since birth. They have been vaccinated and treated with:

- Pyramid 5 + Presponse in March 2019 and at weaning
- Tasvax 8 in March and May
- Fermicon 7/Somnugen at weaning
- Safe Guard oral paste at weaning
- Injectable Ivermectin and injectable Vitamin AD in November
- Saber pour-on for control of external parasites in January and February

NUTRITION

Bulls

- Bulls have been developed on free choice alfalfa haylage and native grass hay.
- A custom Blueprint bull ration from Masterfeeds is limit fed daily. The custom ration is formulated to balance energy requirements without overfeeding protein, and also provides the highest quality Blueprint mineral pack which includes vitamins, 100% chelated minerals and a combination of Alltech technologies that help with gut, hoof and coat health.
- Loose Masterfeeds Blueprint mineral (containing salt) is also fed free choice.
- Their diet has been formulated to balance protein, energy, vitamin and mineral intake as they develop throughout the fall and winter. The bull ration is limit fed daily to control concentrate intake and encourage forage intake, while promoting growth and longevity.
- As we approach sale day, we gradually step our bulls off their bull ration, very slowly, over several weeks. We do this to gradually re-adapt our bulls to consuming a 100% forage diet. We realize that our bulls may not receive concentrate supplementation after delivery to our customers. If they do, great! But if not, our step-down approach prevents our bulls from falling apart due to abrupt changes in diet after delivery to our customers.

Heifers

- Heifers have been developed on free choice alfalfa haylage, native grass hay and loose Masterfeeds Blueprint Mineral (containing salt).
- They have been limit fed the custom bull ration at 1% body weight from mid-September until mid-January, then reduced to 0.5% body weight from mid-January onwards.

GESTATION LENGTH

- The heritability of gestation length is moderately high.
- Gestation length influences a calf's BW and a cow's calving interval.
- All bulls and heifers have their gestation length specified in this catalogue, except for embryo transfer (ET) calves. This is because the age and genetics of the recipient dam could influence the ET calf's gestation length, making it a potentially inaccurate indicator of the ET calf's actual inherited gestation potential.

HOMO POLLED & COAT COLOUR

- All bulls and heifers have homo polled and coat colour results specified in this catalogue.
- If their polled and coat colour status could not be determined through parentage, then DNA testing was performed to obtain their results.
- "Homo" is short for Homozygous, i.e.) Homozygous Polled
- "Hetero" is short for Heterozygous, i.e.) Heterozygous Polled
- A red animal born out of two black parents will be diluter free.

What do the results mean?

Bull	Cow	Resulting Calves
HOMO POLLED - the bull carries two copies of the polled gene		
Homo Polled	Homo Polled	100% Polled
	Hetero Polled	100% Polled
	Horned	100% Polled
HETERO POLLED - the bull is polled, but carries one polled gene and one horned gene		
Hetero Polled	Homo Polled	100% Polled
	Hetero Polled	75% Polled, 25% Horned
	Horned	50% Polled, 50% Horned
HOMO BLACK - the bull carries two copies of the black gene		
Homo Black	Homo Black	100% Black
	Hetero Black	100% Black
	Red	100% Black
HETERO BLACK - the bull is black in colour, but carries one black gene and one red gene. Black is dominant to red, so the red colour is not expressed when it is paired with a black gene.		
Hetero Black	Homo Black	100% Black
	Hetero Black	75% Black, 25% Red
	Red	50% Black, 50% Red
RED - the bull carries two copies of the red gene. This example assumes the bull is diluter free.		
Red	Homo Black	100% Black
	Hetero Black	50% Black, 50% Red
	Red	100% Red

Customer Appreciation

VOLUME BUYER DISCOUNT

We will reward our customers with a 2% discount off their total purchase if they spend a minimum of \$15,000 and purchase two or more head. For each additional \$15,000 spent, another 1% will be added onto the discount rate, up to a maximum of 5%.

The volume discount only applies to bulls and heifers that are paid for in full on sale day. Absentee buyers will have a 14 day extension to make settlement in full. Partnership bulls and embryos are excluded from the discount.

\$1250
in Sale Credits

We value our customers and everyone who expresses interest in our cattle.
To show our appreciation, we would like to reward you with a few sales credits to be drawn as follows:

PRE-SALE CREDIT

- Register for a bidder number on sale day and be entered to win one of two pre-sale credits in the amounts of \$500 and \$250.
- The credit will be applied as a discount on any lot the winner might purchase during the sale.
- The winners of these credits will be announced at the beginning of the sale.
- The credit is only applicable to this year's sale. If the winner does not make a purchase, the credit expires at the end of the sale.

BUYERS CREDIT

- At the end of the sale, we will draw one lot number that sold.
- The buyer of that sale lot will win a \$500 credit to be applied as a discount on their purchase.
- Embryo lots are excluded from the buyer's draw.

If the winner of the buyers draw also won one of the pre-sale credits, then it's their lucky day!
You could potentially win up to \$1000 off your purchase.

PLEASE JOIN US FOR A COMPLIMENTARY LUNCH ON SALE DAY

Thank you
FOR YOUR INTEREST IN OUR PROGRAM!

TERMS & CONDITIONS

TERMS: The terms of the sale are cash or cheque payable at par at the sale location. Settlement is to be made immediately after the completion of the sale. The right of property shall not pass until after settlement is made. All settlements must be made with the clerk of the sale before any cattle will be released. All monies are in Canadian funds.

BIDS: Every animal in the sale will be sold, by auction, to the highest bidder. No by-bidding will be permitted.

DISPUTES: In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK: Each animal becomes the risk of the buyer as soon as sold.

INSURANCE: We insist that all animals remaining at Rainbow River Simmentals after the sale **MUST** be insured.

ANNOUNCEMENTS: All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to any such announcements.

CERTIFICATE OF REGISTRATION: Each animal will carry registration papers issued by the Canadian Simmental Association. A certificate of registration will be transferred to the buyer for each animal purchased after settlement has been made in full.

SHIPPING: Assistance will be given in arranging trucking after the sale but no risk is assumed by the seller or any sales staff. Expenses incurred are the responsibility of the buyer. Buyers are requested to furnish shipping instructions when settlement is made. If you need assistance, please contact the seller.

GUARANTEE: All animals are sold under the standard terms and guarantees as set forth by the Canadian Simmental Association (CSA). The CSA Breeder Guarantee Guidelines can be found on the reverse side of any registration paper belonging to a bull or female registered with the CSA, or on the CSA website at www.simmental.com. At no time will the seller's liability exceed the purchase price of the animal.

EXCEPTION TO GUARANTEE: This guarantee does not cover death, injury, sickness or mismanagement. No guarantee is given that a bull's semen will freeze. In cases where the animal is subjected to any hormonal or surgical reproduction techniques (i.e. embryo transfer) after the sale, the guarantee shall be null and void. Animals cannot be returned to Rainbow River Simmentals if not in a sound, healthy condition.

HEALTH: It is the buyer's responsibility to determine health requirements for importing any animal into their province or state.

ACCIDENTS: Although every precaution will be taken to protect the safety and comfort of buyers, neither Rainbow River Simmentals, or any sales staff or Association assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss of property.

LIABILITIES: All persons attending the sale do so at their own risk and the seller assumes no liability, legal or otherwise, for any accidents occurring in or about the premises.

RIGHTS AND OBLIGATIONS: The above terms and conditions of the sale shall constitute a contract between the buyer and seller, and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction, and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

We purchased RF Impact 601C for \$30,000 as one of Rancier Farm's high sellers in 2017. Other than his impressive phenotype, I was drawn to him because of the incredible Flirt cow family that backs him, his excellent foot quality, and his curve-bending performance where he started out 10 days early at just 84 lbs. We were tempted to use him on heifers, but felt he was likely built too powerfully to serve as a calving ease sire. After his first calf crop, I was back to wondering if he could work on heifers with how small they came and often with short gestations. After his second set of calves arrived in 2019, I was convinced that Impact is a calving ease sire. In Impact's first three calf crops born from cows, his heifer calves averaged 86 lbs BW, 282 days gestation, and 60% came with a short gestation. His sons have averaged 94 lbs BW, 285 days gestation and again 60% have come with short gestations. Because of his impressive consistencies, he has earned himself a CE EPD at the top 2% of the breed and a BW EPD at the top 15%. Since his progeny also perform so well, his WW and YW EPDs are at the top 50% and 25%. Impact's first daughters are also now in production and they are ideal with excellent feet and beautiful udders that milk very well. He is exactly the kind of sire we strive to utilize, but his kind is hard to find. Impact will continue to see heavy use in our program, plus the majority of our heifer pen will see his service this spring.

We start our 2020 catalogue off with the Impact sire group. Collectively, this is the most impressive sire group we've ever had. The ability of these Impact sons to start off small, often with short gestations, then develop into bulls with so much mass and substance, is a rare and valuable thing to find. Most significantly, these Impact bulls consistently correct hair and foot quality better than any sire group we've ever used. There's just so much good to these Impact sons. They do so many things right that the commercial cattle industry demands and are certainly the most deserving group to kick things off this year. The Impact progeny in this catalogue can be found as Lots 1 to 4, 27 and 32.

Arguably the most complete bull in the offering, this bull deserves the prestigious Lot 1 honour. From day one 58G had a special look. At a few months of age, he had a herd bull presence that stole the show. Over the summer, he developed into an impressive meat machine and stood at side of a big, beautiful, perfectly uddered cow; they really looked the part together on pasture. He is as sound footed and as sound in his leg structure as they come. With his perfectly shaped foot and deep heel, 58G will continue his sire's legacy and be a foot improver. 58G is stout with the thickest hip in the pen, plenty of natural muscle expression and added dimension. He is docile, has a beautiful hair coat and big testicles. Overall, a bull with a tonne of power and presence, I promise you will love him in the flesh. In terms of performance, 58G has far out-gained every other bull, posting a 365 day weight of 1565 lbs and a ratio of 113. His EPD profile is one of the best in the sale. This bull gets even better when you look at the cow families that back him. Flirt, Jenna and Linne - three of the most desirable cow families in the breed. 58G's maternal granddam is the proven Linne 10R donor and dam of Springcreek Teddy 72U. We have a 3/4 sister to 58G that is a feature in our heifer pen. No matter which way you analyze 58G, everything adds up to a bull that is very special with a world of breeding potential. Is there any way this bull could get any more complete? Yes, there's one more thing. Just like his sire, he has a super short gestation of 275 days!

This impressive bull resembles his great sire very closely. 17G is a moderate framed, stout tank with a flashy look and huge scrotal. He demonstrates the typical Impact stamp with big rib, softness, thickness, awesome hair coat, sound leg structure and a very high quality foot. He comes by his foot quality honestly because in addition to his sire, his dam 11A, Yukon and Dakota on the bottom side of his pedigree are also excellent footed cattle. Actually, that Dakota 154L cow built one of the strongest footed cow families in our program. 17G's dam is a larger framed, deep ribbed cow that has raised a feature bull before. Her only other son to date, which she raised as a first calf heifer, was our high selling black bull in 2016 to Lach Farms of Plumas. 17G has been a stand out from a very young age and has been popular with visitors all year. We love his look so much that we halter broke him with intentions to show him this fall. He was the easiest bull I've ever broke thanks to him being so docile and good natured. With the way the weather went this fall, we never did make it out to any shows, but we believe 17G would have been competitive. More importantly though, we believe he will be a valuable breeding bull that will breed true to his type and can be looked upon as a foot improver. Gestation 286 days.

Calving Ease. This feature bull offers an attractive look in a real soft made package, great hair coat and a good foot typical of all Impact progeny. With his 87 lb BW and EPDs for CE and BW in the top 10% and 15% of the breed, he will make himself at home in your heifer pen. He could also be used on some power cows that need a shot of calving ease and some extra look. 15G is a 3/4 brother to Lot 4, hailing from our good Domino cow family. His dam is a very fertile cow that has always caught to her first service. 17A has raised two feature bulls in the past, and last year she gave us a full sister to 15G that was very good. To our misfortune, we lost his sister early this past summer, but she had the makings to be one of the top bred on the farm. 15G's quality is no accident and his depth of quality is hard to find in a calving ease bull. Something pretty special here, made even better with his short gestation of 283 days.

One of the most complete bulls in the offering. Backed by a productive cow family and a beautiful, big capacity, perfectly uddered dam who ranks as one of the most ideal cows in the herd. He is a 3/4 brother to Lot 3. 69G is stout with a deep heeled, high quality foot. His curve-bender performance is something to take note of. In his contemporary group, he is the second heaviest adj YW bull at 1509 lbs, coming in second only to his brother, Lot 1. If you like EPDs at all, he also has a very useable set of numbers. This bull is awfully hard to fault and after you see him in the flesh, I'm sure not very many of you would disagree with that statement. If you can look past his two partial socks on his back feet, you will see a true beef bull. One that will leave a great set of heifers, add pay weight to his calves without sacrificing calving ease, and make a positive influence on any herd. Think outside the box and invest wisely here. Short gestation of 284 days.

This very quiet bull is mothered by a big bodied, soggy, easy doing cow with an ideal udder. She raised four feature bulls over the years, a daughter sold to Sun Rise Simmentals in SK, and I have two very good daughters retained in herd, one of which raised our \$16,100 high selling bull to Crossroad Farms in 2017. 11G is one of the first sons to sell from the \$46,000 Springcreek Denali, a new sire that has been held exclusive to only a few breeding programs in Canada. 11G should add hair and pounds to his calves through extra length and depth of body. He was born unassisted and was extremely vigorous at birth. Gestation 289 days.

This bull has always had the look of a good one, right from the day he was born. All year long he's always ranked in the top handful of bulls. His thick hip and extension through his front third make an eye appealing combination. 21G's dam raised a feature heifer that we sold in the 2018 Keystone Connection Sale to Drew Don Simmentals in Ontario. She just gave us another full brother to 21G that is really stout and looks promising. The maternal granddam of this bull, 21Z, was one of the most beautiful cows that ever graced our pastures. Add in the Heaven Sent and Lima donors on the top side of 21G's pedigree, and you have a bull packed full of maternal merit. Gestation 285 days.

This performance bull comes to you from our embryo transfer program. His dam is the highly regarded Blacksand Linnette 934W donor that was a \$20,000 high seller at the historic Blacksand dispersal and now walks the pastures for our friends at Come As U R. 934W is an impressive blaze faced cow that has produced many feature offspring over the years. She is a paternal sister to our own leading donors, Blacksand Linette 823U and LRX Red Reeba 41D. The Liner 104S females are some of the best cows in the industry and we know from experience just how good this mating of The Riddler x Liner 104S is. We also have a beautiful flushmate sister to 56G in our replacement pen that we would be very happy to show you. We just wish 56G would have inherited his dam's blaze face, but the money stripe is in his genetics so he might pass the blaze down to some of his progeny. He has breed leading EPDs in almost every category and curve bending performance that we've come to expect from Riddler progeny. A very complete bull that will increase performance in his calf crop without sacrificing calving ease and you will want to keep every one of his daughters.

This embryo bull is the only son we have this year from our leading donor, Blacksand Linette 823U. To our good fortune, all of our other ET calves from Linette were heifers in 2019 and we've retained every one of them. We have two flushmate sisters to 29G in our replacement pen that we would love to show you. Their power and overall mass and capacity will blow you away! Linette's natural calf in 2018 was also a full brother to 29G. He was a big, impressive bull that ended up as one of our high sellers last year and now resides in North Dakota. We've received very positive feedback on that bull from his owners. Like his brother, 29G is a feature bull in his own right. He's not as big framed as his brother, but is softer made, bigger barreled and nicer haired, yet similar in terms of overall performance. With moderate calving numbers and performance EPDs at the top 5% of the breed, this bull strikes a nice balance. You will also appreciate the quality of foot and leg structure on this bull as he is very flexible in his joints and sets down on a square foot. We really can't say enough good things about this cross between Linette and the \$165,000 Westcott. It is an extremely consistent mating and you can have confidence in the quality and predictability that is bred into this bull. 29G has been a stand out all year and he will surely stand out on sale day.

 SUN RISE BLACK 33A

This soggy, deep ribbed, huge nutted bull is proof of the power of strong cow families. He hails from a stellar cow family that is going to become very influential in our program over the next few years. His dam is an ET daughter of our tremendous donor cow, IPU 56U Ms Morgan 41C, who we purchased for \$19,000 as an open heifer but heartbreakingly lost only a year and a half later. When we flushed 41C, it was a no brainer to cross her with The Riddler to stack his maternal merit with that of Captain Morgan and Liner 56U. The dam of 46G is one of two beautiful daughters that we got from that mating and she is the first of the two that is slated to be flushed, hopefully this spring. 24E is a moderate framed, good footed cow with an udder that is absolutely perfect in every regard - tightly suspended, level, with small teats - it's perfect. Like 41C, she's proven to be a very fertile young cow and she sure raised a good one on her first try. Based on the production record of 24E and 41C, the maternal attributes of this bull should be extremely strong. I could go on and on about the maternal merit of the Morgan cow family, but we can't forget that the top side of this bull's pedigree is also stacked with maternal greatness. I believe this bull will be a female maker and I can just imagine the stout, soggy set of calves that he will sire. He will serve to moderate frame size and add sogginess, substance and docility to his calves. He also offers a very useable set of numbers with an EPD spread that is strong right across the board. Gestation 288 days.

BPG1283375 JNB 13G Jan 17, 2019 Homo Polled Hetero Black Purebred

This power bull was raised by a first calf heifer. Think about that as you analyze his performance data. He ranked 6th out of a group of 22 at weaning and was the third heaviest adj YW bull in his contemporary group, being outdone only by the Lot 1 and Lot 4 feature bulls. This bull should calve well and increase pay weight in your calves. If pedigrees mean anything to you, you will notice that this bull is good for a reason. His mother is a blaze faced cow that came to us in-dam when we purchased the great 33U cow for \$12,000 when she was 8 years old. Linne 23R and Brooke 68Z are also two of the most beautiful and productive donors from the Spring Creek program and they both grace the bottom side of 13G's pedigree. Gestation 288 days.

This is an all around complete bull with extra length, thickness and a great disposition. He has been one of the heaviest bulls in the group all year, plus with performance EPD's at the top 5% of the breed, he will add pay weight to his calves. 40G's dam is a never miss cow that has raised some feature bulls before. With the likes of Bodybuilder and Prime Cut in her pedigree, it's no wonder 9X has been such a good cow over the years. My dad bought the great Prime Cut bull from Barry Labatte when he was 5 years old and Prime Cut walked our pastures until he was 12. He was an incredible footed bull and sired the best cows that dad ever had. 9X always brings home a heavyweight in the fall and always stamps her calves with a little extra frame and stretch. 40G's maternal sister is also one of the top cows in our herd. She has earned her fair share of praise too as she raised a feature bull in 2019, a feature daughter who sold in our 2018 sale to Drew Don Simmentals, plus two top end daughters that we've retained in-herd. 40G's dam and sister are both great milking cows with ideal teat size and strong feet. It's a cow family that you should be confident tying into. If you admire his dark red colour, I can tell you that every animal on the entire bottom side of 40G's pedigree is also dark red in colour. Gestation 289 days.

The dam of this feature bull is one of the most beautiful red donors in the breed. I had the honour of seeing her in the flesh last spring and my love for her only deepened. Her genetics are in high demand for good reason. She flat out produces, having already raised two Grand Champion bulls and numerous high selling sons and daughters. Her highest selling daughter to date was an open heifer that sold at FNL for \$40,000 in December, and last March a full brother to these three bulls, SVS Betts 808F, fetched \$120,000. In 2017 and 2018, I invested heavily into 8 Captain Scream x Sage embryos. I paid a small fortune for those embryos because I believed they would be a genetic explosion. Those embryos yielded me a total of three gorgeous heifers and these three bulls. Two of those heifers have developed into stunning two year olds with excellent udders. I plan to flush one of them in short order. The third is in our replacement pen and she too is beautiful. These three flush brothers have been popular all year and I've had my fun watching them grow, trying to pick my favourite as they developed. In my opinion, 57G has surfaced as the highlight of the three with his attractive profile, moderate BW and good performance. He is long and strong in his topline, stout, good haired, big nuted and puppy dog quiet. His phenotype makes him a standout and his pedigree is the cherry on top. There is an incredible amount of consistency bred into this bull with having two breed legends as his parents. If the daughters from 57G end up anything like his three sisters, they will be the herd-building kind.

45G is the most moderate option of the flush brothers. If you love this genetic combination of Captain Scream with Sage, but are looking for something with a little less power than his brothers, 45G might be the ticket. He is moderate in performance and in size, but maintains a desirable, balanced, show ring kind of look. Really docile, hairy, deep ribbed, and sound on his feet and legs, you'd appreciate the angle of the hind pasterns on this bull. A genetic gem on paper with all the potential to leave you some gorgeous daughters.

Rainbow River
Rainbowriver SCREAM 55G

PTG1285809 JNB 55G Jan 31, 2019 Homo Polled Red Purebred

This big, stout, soft made, thick hipped bull is the performance powerhouse of the three brothers. His overall dimension, and the softness and capacity through his middle third, reminds me of his famous full brother, the \$120,000 SVS Betts. 55G had a big time weaning accomplishment with a 205 day adj WW of 931 lbs, making him the #1 heaviest adj WW bull for 2019. His high performance never slowed down as he also earned himself one of the highest 365 day yearling weights. 55G will sire a group of powerful sons and if you keep any of his daughters, they will make beautiful, broody cows.

If you're a believer that elite herd bulls stem from elite cows, then take a good look here. This bull is the second natural calf from our \$26,000 donor, Reeba, who is proving her worth in a hurry. Her first natural calf was our high seller last year going to Pheasantdale Cattle Co. for \$16,250. In her first year of production, we flushed Reeba before breeding her to Captain Scream, that's why 76G is the youngest bull in the offering. Reeba has been truly outstanding in her first couple years of production. She is ideal in her type, being a feminine, dimensional, big capacity, easy keeping cow with an excellent udder and good foot. She is proving that she makes them right and gets the job done with raising them too. When you blend the unmatched power and consistency of Captain Scream with all that Reeba has to offer, you get a high performance, huge hiped, structurally sound and balanced bull in 76G. He ranks at the top 1-2% of the breed for WW, YW, carcass weight and ribeye area, validating his physical attributes and expected ability to add pounds and muscle to his calves. 76G also has respectable weaning gains, being ranked the third heaviest for 205 day adj WW, and despite his age, he is just as big as the other bulls in the pen. In addition to a powerful set of sons, the daughters from this feature bull should make excellent cows. Gestation 287 days.

Dam: AMOUR 37A

Maternal Sib: JNB 6C

A dark cherry red bull with a tonne of eye appeal and strong muscle expression. His dam is a dark red, moderate framed, deep ribbed cow with a tidy udder that has been a consistent producer over the years. His granddam was a big, long bodied, freight train of a cow. She had a successful show career as a calf and I purchased her as a high seller at Agribition that year. An impressive full brother to 67G sells as Lot 26. Gestation 287 days.

Dam: MISSY 428E

Dam's Udder

Calving Ease. Lots 19 & 20 are sired by MRL 67X, a proven, calving ease sire who we have used on our heifers for a few years. We have very limited semen on 67X, so we use him selectively, but we regard his calving ease abilities and daughters very highly. 67X progeny are always born unassisted, are always dark red in colour and his daughters are some of our most productive young cows with impeccable udders that milk very well. The dam of 18G is also a beautifully uddered young cow that is new to our program. 18G is a smaller framed bull that showed a lot of maturity at a very young age and ranks at the top 2% and 10% of the breed for CE and BW. This bull will shine in the heifer pen. Short gestation of 284 days.

Dam: COVERGIRL 9E

Grandsire: RED MOUNTIAN

Calving Ease. Another bull that will work excellent on heifers. As I said in Lot 19's footnote, these MRL 67X sons make bomb proof calving ease bulls and they should lock in the udder quality and dark red colour. This bull is double bred calving ease with both MRL 67X and Red Mountain in his pedigree. His maternal granddam is our Covergirl 27C cow who we purchased for \$10,250 as an open heifer after she won Junior Heifer Calf Champion at the Toronto Royal. A maternal sister to 32G's dam is a beautiful feature heifer in this sale, she sells as Lot 29. Gestation 286 days.

Big time pedigree on this sound structured bull. He is the first natural calf out of our newest donor, MAF Sprinkles 189E, who we purchased in 2018 as a \$27,000 high seller from Meadow Acres. She is going to have a huge influence on our program going forward. We have five ET calves out of Sprinkles on the ground now and I'm not exaggerating when I say they all make the short list of some of my favourite calves born this year. Every one of them came moderate at birth and are stout, soft made, good haired with a tonne of look. A really exciting bunch and I'm impressed with how strongly Sprinkles has put her stamp on them. Sprinkles is a beautiful young cow with an impeccable udder and excellent foot quality. She's moderate in frame and very sound, just like 54G. Red Deputy, Law Maker and Ms Rock 14X stack up the maternal merit and excellent udder quality backing this bull. He was handled a lot alongside his dam in 2019 as she was being flushed in our ET program, so he's become a very quiet bull that likes attention. 54G will calve easily on cows and second calvers. I would look to him to moderate frame, improve structural soundness and produce a beautiful set of replacement heifers. Short gestation of 283 days.

Calving Ease. This feature bull is a unique combination of calving ease and performance. He should be universal enough to use on heifers or cows. 34G has a big time EPD spread right across the board, including the top 3% and 4% for CE and BW, and top 35% for Milk. When you examine his pedigree, you will see that there are very strong maternal genetics bred deep within this bull. His dam is a maternal sister to our Lot 1 feature bull and high seller from last year, Rainbowriver Finalist 3F. She is a beautiful young cow with an excellent udder and we think she has a very bright future ahead. Her maternal instinct at calving time was very, very impressive. 34G was very vigorous also, and with his dam's assistance, he was nursing in under 30 minutes. 34G's maternal granddam, 50X, cranked out three impressive progeny in her first three years with us, not to mention a high selling bull for Springcreek when Brian still owned her. We were so impressed with her production ability and excellence of udder quality at 9 years of age that we flushed her in 2019. That should give you an idea of how strongly we believe in 34G's cow family. He's a calving ease bull with all the bells and whistles, and I'm pretty sure he will make you want to keep all of his daughters. Gestation 290 days.

Dam: **TIMELY 11E**

Full Sib to Dam: **JNB 5D**

A long bodied, dark red, performance bull that was often found by visitors who toured our summer pastures. He ranked first out of 22 bulls at weaning, weighing in at just under 900 lbs. That's an impressive feat for a bull that was raised by a first calf heifer in a drought year! The strong maternal ability of his dam is no surprise as the Timely cow family has been very productive, with both 4A and 106L raising their fair share of feature bulls over the years. His dark red colour should be locked in as it is stacked generations deep on both sides of his pedigree. Gestation 288 days.

Dam: **NUGGET 15Z**

Granddam: **TESS 11T**

A bigger framed bull with a solid build that started to look like a herd bull at only a few months of age. You'll appreciate him for his dark red colour that he's inherited from his dam. I liked him so much at 3 months of age that I bred his dam back the same way for 2020. I have my fingers crossed for a heifer. He was born unassisted from his good dam who is a fertile, excellent milking cow that demonstrates lots of longevity and excellent foot quality. Gestation 291 days.

Calving Ease. 11F is part of the feature sire group of Impact sons. His brothers lead off this sale as Lots 1-4. He is docile and easy to handle, good haired and has a very high quality foot under him, like all of the Impact progeny do. He is double bred calving ease as his dam is sired by our previous \$12,000 walking sire, Overdrive, who we used successfully on both heifers and cows. Overdrive's sons were highly sought after by our commercial customers. 11F will calve easily on cows and first calvers, and I wouldn't be surprised if he could be used successfully on well-developed heifers too. Short gestation of 284 days.

We have dug deep to offer this feature heifer. In addition to her beautiful profile, I admire the size of her foot and the base width through her chest. She is backed by generations of beautiful cows, blaze faces and perfect udders. Judging by her teat size and placement, I predict 50G's udder will be impeccable also. 50G's maternal sister is the dam of Lot 31. Together, 50G and 72G demonstrate the production quality that the Classy family is capable of. Last year, 50G's full brother was our second highest selling black bull going to Randy Geisler, and this year her dam blessed us with another beautiful, blaze faced full sister to 50G. It's never easy parting with heifers this good, but having her full sister now will make it a little easier to let 50G go. Short gestation of 284 days.

This feature heifer is very quiet and always comes over for a scratch. She's a big barreled heifer that has performed really well. I love how much capacity she carries in her moderate frame. I purchased her dam for \$10,250 after she won Junior Heifer Calf Champion honours at the Toronto Royal in 2015. I have one maternal sister in herd who raised the Lot 20 bull. The injection of maternal strength from Blue Chip makes this heifer very intriguing. We calved out our first Blue Chip daughters in January and they met our high expectations with good udders that milk really well. Short gestation of 276 days.

GCF MISS ELSA
DRAKE POKER FACE 2X
SPRINGCREEK LINNE 6R

This heifer is very sound and balanced with an eye-appealing, show ring look. She's a moderate framed, tanky, easy fleshing female that should have a nice udder. The Classy cow family is leaving their mark in our program with their great udders and ability to consistently produce the good ones. The dam of 72G is a maternal sister to Lot 28 and she did a good job with 72G being her first calf. Her second calf is an Impact bull calf that was born in January and he is one of the most impressive bulls born this year. This cow family is proving itself quickly and is one that's worth tying into. Short gestation of 283 days.

This heifer encompasses three of our most significant genetic investments into one fancy package. Her \$17,000 maternal granddam, Linette 823U, was the first donor cow I purchased to seriously advance our program. I bought into the \$170,000 LFE The Riddler just a few months after buying Linette, knowing he was the bull that I just had to flush our new donor to. A result of that flush is 32D, the dam of this heifer. We invested in 74G's sire, the \$30,000 RF Impact 601C, for a walking bull and in three short years he's proven to be a genetic marvel beyond our highest expectations. If you study Lots 1 to 4, and come tour our replacement and two year old heifer pens, you will see the genetic value in these Impact progeny. We won't be letting many of these Impact daughters go, so take advantage of this one that is royally bred. Gestation 288 days.

LOT 33A | 3 EMBRYOS - sired by SVS TYCOON 841F

MAF Sprinkles 189E is our newest donor who we acquired for \$27,000 from Meadow Acres in 2018. Sprinkles is a beautiful young female that looks exactly like her photo. Moderate in size, balanced, feminine, sound and soggy with an udder that is as perfect as we hoped for. Sprinkles' pedigree also makes her a 3/4 sibling to the popular A.I. sire, IPU Lieutenant 24E. Her first natural calf sells in this sale as Lot 21 and she has been flushed over the last year to some of the hottest bulls available. We have her first ET calves sired by the \$75,000 SVS Tycoon on the ground already and they look really promising. Stout, soggy, solid made calves that came moderate at birth and really carry her stamp. A very exciting bunch. We intend to keep Sprinkles' embryo bank fairly exclusive so there won't be many (if any) other opportunities to purchase her embryos going forward. This is a powerful genetic opportunity out of two high quality, elite individuals in the breed. Opportunities like this don't come along often and we are excited to offer these genetics to the industry.

Embryo Sire: SVS TYCOON 841F

Embryo Granddam: SVS RED ANNIE 411B

EMBRYO GUARANTEE:

1 - 90 day pregnancy per pack of three if implanted by an accredited veterinarian. Replacement embryos will either be the same embryos as purchased or those of equal value. If no replacement embryos are available, then a credit will be issued. In the event that your conception rates of the purchased embryos do not meet the minimum guaranteed, please notify us of inadequate conception within 120 days of implanting.

Reeba was the \$26,000 high seller at Checkers 2017 and has matured into a beautiful, tanky, easy keeping cow. Her sire is one of the greatest maternal giants of all time and her dam is one of Robb Farms most proven cows. Reeba's dam is the granddam of LRX The Godfather 141Z, the dam of LRX Uncle Jeffrey 56A who walks for Westway Farms, and she also raised a \$23,500 full sib sister to Reeba, as well as another full sister that is a donor for Robb Farms. Reeba herself is quickly proving her worth, having raised a \$16,250 high seller with her first natural calf, and then another feature bull that sells in this sale. We now have a variety of her ET calves on the ground that look really exciting, plus we are awaiting her natural calf by Tycoon in February. Since Reeba flushed so good when we sent her to BVG for IVF, we set aside three embryos from each flush to sell. These embryos on offer are the last of that inventory. The Lot A and B embryos are full sibs to Reeba's feature son that sells as Lot 17. He is proof that this mating works! We also expect great results from the Westcott mating. We believe in these matings and will be implanting these same embryos in our program this spring. Again, this is your last chance to invest in Reeba's embryos as we plan to keep her future inventory exclusive. Reeba's early production record indicates that these matings could pay big dividends, so invest wisely while you have the chance!
