Bull Sale

 **ANCHOR D**
Simmentals Ltd.

Friday, February 12, 2021
Anchor D Ranch - Rimbey, AB • 1:00 p.m.

*We invite you to join us for lunch, hospitality
and viewing the bulls prior to the sale!*

February 12, 2021 • Lunch 11:30 am • Bull Sale 1:00 pm

Every year one of the things I look forward to the most, and dread the most at the same time is the welcome letter. I look forward to it in the aspect of a reflection as to what we have accomplished through the year, as well as it's the completion of the catalogue for us. However I find it a task to say something new that also reflects our goals, our vision and our dreams, without just sounding repetitive. This fall I was able to be a part of a sale that really stood out for me personally. In 30 years in the auction business I think the opening speech Bill delivered at the WLB Dispersal sale was probably the most energized and heartfelt speeches I have ever heard. One of the things that really stood out was, "Don't give up on your dreams!" You could tell the passion, the desire and dedication he and his family took to get to where they were in the business, and you wanted to be a part of it. As I was preparing to write this year's letter I was thumbing through our old catalogues, and just reflected back on how much our program has evolved in time. I remember being that 10 year old kid that wanted to one day host our own bull sale. Then fast tracking to that first sale of 20 plus Fullblood bulls, and reading through the footnotes the sense of accomplishment that was written on every one. That's when Bill's speech hit me, "Don't give up on your dreams!" We've all heard the saying do what you love and you will never work a day in your life, and it is so true. Sure there are days we are beat up and tired, but honestly stop and reflect where else would you rather be? This fall we witnessed one of the greatest falls in the cattle industry. Production sales were at a new level of high in all breeds, the fall commercial calf market was extremely good, the commercial bred cow market was a new level, and for the most part the crops were in the bin and selling at high prices. Amidst the economic chaos and political and media mayhem we still have a booming industry. So I ask you, "Where would you rather be?"

As we welcome you to our 22nd Annual Bull Sale, I can honestly say we are as excited about this class of bulls that we have ever been. This year's group of bulls will see our largest offering of Full Fleckvieh Bulls ever catalogued, including a small group of two year olds, as well as a very solid set of Purebred bulls that may not be high in numbers, but certainly showcase the next level of commitment we are seeking. We have been very fortunate to raise bulls such as "Raptor, Viper, Outlook, Imax and Ego" to name a few that when you hear their name you associate them with Anchor D, but ever so important are the bulls out there working in the dedicated commercial herds that maybe people aren't as aware of but display the Anchor D brand proudly. As a seed stock producer we feel it is our job, to not only produce the best product we can, but to add value to you our customers as well. A statement you would have heard us say before is, "We don't just want to sell you one bull today. We want to sell you many bulls over time." We are very proud of the fact we have a very large repeat clientele, and we want to build that relationship of trust, and be able to add value to your program as well.

We invite you to attend our 22nd Annual sale Friday, February 12 – 1:00pm at the Ranch. You are certainly welcome to come view this year's offering any time prior to the sale, and if you are unable to attend sale day certainly don't hesitate to call and discuss your needs. Please call myself or our family, or any of our very capable sales staff to help you out.

Dan, Karen, Mackenzie & Garren Skeels

Welcome to the Genetic Edge 22nd Annual Bull Sale that showcases the Skeels family passion and dedication to their Simmental program. They are in tune with every aspect of the livestock industry including breeding, cow/calf, auction markets, feeders, processors and beyond which has aided them to build a versatile program. The advantages of investing in an Anchor D bull goes well past sale day as the daughters they produce will advance your program and the sons have excelled for purebred and commercial programs alike. Commercially, the Anchor D Influenced Calf Sales have seen premium prices and is just another advantage to purchase your bull(s) through this sale with an opportunity to increase your bottomline.

When we toured through the bull calves in the summer time, we were impressed with the offering as it is as deep and consistent of a group that we have seen to date. It is reassuring to see these impressive bull calves in the summer beside their productive dams as the power and maternal strength is evident in the program. Longevity is built into these genetics with a highly productive cowherd that pulls their weight each and every year. Whether it is fullblood or purebred that you seek, the highly-respected Anchor D program has a deep set of bulls that will fit your bill. We encourage you to stop by the Anchor D Ranch at your convenience to tour through the program with the Skeels family as we are certain you'll be impressed with the offering.

Danny, Karen, Mackenzie and Garren are all heavily invested in this program and it is truly a family oriented family farm. They have built their Simmental Ranch to benefit its customers and they spare no expense to acquire the very best herd bulls or replacement females in order to enhance their herd and give you, the valued customer multiple options of high quality cattle to select from. If we can be of any assistance on sale day, please contact us and we will represent your needs in a professional manner. We look forward to visiting with you about the stout offering and encourage you to invest with confidence into this leading program.

Best regards,
 The Bohrson Marketing team

Feed

Our bulls are raised on a TMR ration, consisting of 2/3 cereal silage and 1/3 corn silage, as well as 12 lbs. of Bull Ration, free choice hay, and free choice mineral. They are raised in a 5 acre yard so they have lots of room for exercise, and are able to go out and cover the ground. We also are very proud of the fact we have bulls still out working well into their early teens. The bulls will remain on the same ration up until delivery so they remain on a steady balanced diet to ensure proper development.

Health

All bulls are under the watchful eye of Gull Lake Veterinary Services. They receive Vitamin AD&E as well as MUSE at birth. Express 5 and Covexin Plus prior to grass, as well as Express 10 and Covexin Plus, and boosters after weaning. BOSS and Safeguard in December. All bulls will receive their initial shot of Fusogard (Foot rot vaccine) prior to the sale, with the booster administered before delivery.

Sight Unseen Purchase Plan

We appreciate your bull purchase is a significant investment and can be very time consuming as well. We spend a significant amount of time with our cow herd, and the development of our bulls and are extremely confident in being able to match you with the bull/bulls you require for your own program. Please call us to discuss your options and needs for your herd, as we have a large selection and variety of bull suited for your individual program. We guarantee our sight unseen purchase program 100%. Call Dan to personally discuss your needs.

Anchor D Ranch Simmentals Influenced Calf Sales

One thing we are always trying to do is figure out ways to add value for you, our customers. For the past several years we have been hosting the "Anchor D Simmental Influenced Calf Sales", the first Friday, Tuesday & Wednesday of October. This allows feedlots to purchase large groups of calves with similar genetics, and health protocol in a timely fashion or producers wanting to capitalize on acquiring top end replacement females. This also allows for maximum dollars to be realized as it is added value for both buyer and seller. For anyone interested in becoming a part of these sales please contact Dan for more details.

"Shazam" was one of our feature bulls in "French Attack's" very first calf crop for us. Unfortunately prior to the sale he suffered a severe leg injury, so was forced to be pulled from the sale. We knew he was extra special, and rather than running the risk of further injury we sent him directly to Alta Genetics, where we knew he would have his very own pen and time to heal. We were able to draw semen on him late in the year after he recovered, but essentially too late for breeding season. Mackenzie then showed him that same summer in the National YCSA show where he was named Reserve National Champion Bull. The following year he covered a group of cows for us, and we had plans on him being an anchor in our bull battery. Starwest Farms asked to purchase him that fall, and after a lengthy family discussion we decided to send him to their operation. I can't tell you how proud we are of this sire group. He has done everything we asked of and more. His calves have excellent muscle shape, lots of hair, great feet, performance and all seem to possess his incredible disposition, not to mention the majority came polled too. This essentially will be his only calf crop for us as we didn't AI any cows to him this spring to allow Starwest to be the only ones with his calves next year. We will see more in our program in the future but not next year, so step into his sons with confidence they are phenomenal.

 LITTLE CREEK TOMMIE 021T

As most of you know our program has really focused on the strengths of cow families over the years. One of the fortunate things in my travels is to be able to see top end cow families in so many other herds as well. "Heineken" comes from a prominent cow family in "Tommie" who was influential in the Little Creek herd in Mississippi. Her daughter "Winsome" became every bit as influential in the Buzzard Hollow, now Simmentals of Texas. So when we had the opportunity to import "Ellen" from Texas we took it. Not only to add another prominent cow family into our herd but also complete outcross genetics for us. "Heineken" is "Ellen's" first calf as we elected to get a quick flush on her before she made her way North and adapt in her new environment. Not bad for her debut. "Heineken" possesses his sires' impeccable disposition, has tremendous rib shape and muscling and not only comes in a polled package but is **HOMOZYGOUS POLLED**. There are endless opportunities for this young stud. He will influence the breed.

If there was one bull that I really struggle with being in the sale it's "Arsenal". We have thought long and hard about retaining him for our own use, but will offer him for sale. His dam "Gjenna" exemplifies my thoughts on the strengths of cow families. I don't think it's a secret the contribution his grandmother "Dorothy Jane" did for our program, and if you follow my footnotes you also know I rank "Gjenna" as her #1 daughter. That's no small feat considering there are 77 direct registered progeny from her!! "Gjenna" has a couple daughters working for us as well as progeny at McMannus Simmentals in Manitoba and "Morocco" who worked in our herd for a season and now is a permanent resident at Craigmyle Colony. This big power bull has all the tools and is also polled. He will demand attention sale day, and I'm certain as bull sale season progresses will only increase in value. Herd Bull Time.

"Zam" is yet another polled bull in this sire group. We did test him for the Polled gene but he is only Heterozygous. His dam is a phenomenal polled "Entourage" daughter, who is in show shape 24/7. This is a bull that has the who's who in his pedigree, "French Attack, Barbossa, Mojito, Stride, Razzmatazz, and Viper" to say he is stacked is a gross understatement. "Zam" is a bull with huge potential, and as I've previously mentioned in this sire group you have to appreciate the body mass and muscle shape in this set of Polled bulls, they are wicked good.

"Hocus Pocus" is already a bit of a celebrity. Karen happen to snap a quick picture of him and his dam the frosty morning he was born as he was catching a sleigh ride to the barn. She posted it on Facebook and I remember several people commenting on how picture perfect his dams udder is. I was really hoping he would have come back Homo Polled as this is a complete different twist in a polled pedigree. Tracing back to the "Herlinde" cow family, the cow that likely had the second biggest impact in our herd. I do think "Hocus Pocus" has an incredibly bright future and will no doubt work magic wherever he is used. This is a bull I think will just gradually get better and better. Remember the name "Hocus Pocus" he will be talked about in the future, I'm certain of it.

When we purchased the Rocking R herd of mature cows, "Dolly" was one of the cows we were very excited about. Her dam was a female that I still have non buyer regret about (yes that's a thing), so to have one of her daughters we were super stoked about. We unfortunately lost her bull calf last year in late spring, so she ran dry for the summer, and to say she was obese is an understatement. There is zero doubt in my mind a portion of "Hadley's" birth weight is because of that, but just look at the way he is put together. This is a super long bodied bull, with lots of shape and muscle mass. He comes in a dark red, heavily pigmented hairy package. I can only imagine the steer calves this big monster is going to produce. High hopes, me thinks YES!!

"Franchise" has been a favorite of mine from the day he hit the ground. His dam "Zula" has been a solid producer for us over the years. It's no secret we have a love hate relationship. Whenever we move cows she has her own opinion on which direction she should be going, but she is very good for training dogs, young horses, and your patience. All kidding aside she can produce right at the top of the herd every year, and has a pedigree equal in strength. When I said "Franchise" was a favorite day 1, that's partially because we know what to expect from this exceptional productive cow. His steers will be stellar, and keep every daughter you can, the shot of "Antonius" will shine bright in this aspect.

Because we are pushing early to have our bull sale catalogue done you will notice our yearling weights were taken December 10, due to the young age some of the bulls will not have Adj. YW, but without the numbers trust me when I tell you "Shambo" is a performance bull. He too has been a standout as a baby, and was quick to make people friends, as his mom is also a people lover. His dam "Lois" comes from our "Desiree" cow family, who the entire cow family has just incredible dispositions. This has also been a highly productive cow family producing notables like "Twenty X, Squire & Aztec" to name a few. "Shambo" is a bull who gathers attention when we have viewers, but also keep in mind when looking at him, he is one of the youngest in the pen. He is a deep bodied, thick heavy muscled bull in a smooth polled package. He's worth a serious look.

We have a small group of 2 year olds on offer this year. "Conquest" was catalogued last year, and he is a bull we pulled from the sale, sale day morning. As a yearling you could work him up and I just felt more comfortable with him not in last year. We kept him back as a spare as I do really like this bull. He has behaved like a gentleman so we decided to add him in the mix this year. Keep in mind we know he could pressure up as a calf so there is an element of heat in there, but just handle him with respect (as you should with every bull) and I think you will be fine. He is a virgin 2 year old so he will cover a bigger group, and you have to appreciate this bull in every dimension. Picture perfect, big broad top, huge 1/4 and great feet and legs. He will be a breeding machine that will produce a wicked set of performance calves.

"Godfrey" was also catalogued last year, but was semen deferred and we felt was just too far away sale day to offer him. Little did we know on retests he would move well into the 90 percentile, so hind sight we should have sold him last spring. It's also good knowing that we have back up for our valued bull customers should a wreck occur, so a handful of spares are certainly not a bad thing. Like the other 2 year olds he too will be a virgin bull, so buy with confidence. He is the last "Intuition" son we have, so look for an extremely sound footed, easy keeping bull that will transmit ease of fleshing, and strong maternal traits, while packing on the pounds. Very good cow family backing him as well. Just a very solid rancher bull that will do a bigger job.

"Godfather" was also catalogued last year but we had decided pre semen testing to pull him from the sale. He is an Embryo calf, and well not every recip cow is created equal, and what he did as a baby he pretty well did on his own. When we analyzed after the catalogue came out we felt he was a bull that may just get lost in the shuffle. He would have barely been a year old sale day and we felt he was too good of bull to get missed. We also thought he was a bull that if needed as a spare could work in any situation, heifer pen, cows, British, exotic, red, black or tan he covers all the bases. Note he is a direct son of "Kael". This young cow has already made a big impact on the breed with her two most notable sons being "Outlook", owned by Crossroads & Canadian Sires & "Rubicon", owned by MAVV Farms, also having offspring at Springside Colony, 4M Cattle Co, City View Simmentals, Dean Smith & Mark Land & Cattle. A Polled 2 year old Virgin bull with a pedigree equally as good as he is himself.

"Gio" was purposely held over last year, due to age. We felt if we needed a big ticket bull to fill in somewhere he was the guy. I was excited when he didn't have to go to work as we only wanted to offer Virgin 2 year olds. His dam was a solid producer for us, and his grand dam has been one of our no miss cows (her son sells as Lot #12). Similar story to "Godfather", in that he certainly looked the part last year, but we decided to hold him simply because of age, so that he didn't get overlooked. I dare you to find another Fullblood bull as dark as him. Regardless of where he goes or the type of cows he's used on, I am super confident whoever is fortunate enough to own him sale day he will pay for himself in very short order. Use him on any color of cow you desire, and any style as well. If he breeds like his father he will put his own stamp on them.

Where to begin? To date the feedback we have had on the "French Attack" sons working is excellent. When I tell you this is one of the best bulls we have ever owned, that is a statement I don't make lightly, and can be backed by facts. To date on three calf crops his sons have averaged an impressive \$11572! But further to the numbers of his sons are his daughters. They might very well be the best uddered, soundest footed, highly productive cows we have ever produced. This is only their second year in production but they are outstanding. We often get asked when we are done with a mature bull if he is available for sale. Another statement, "French Attack" has earned the right to retire here, but he's still young and has many more years ahead of him. He is an absolute gentleman to work with. He is a breeding machine servicing a large group, always maintaining flesh, and extremely sound footed. He is hardly ever in a scrap in the bull pen, and awaits his much loved back scratches. He pulled a big shift last year filling in for injuries so his sire group is a little larger and a bit more spread in age. I think that speaks volumes of the confidence we place in this bull. Buy his sons with confidence.

"Guinness" is a full brother to "Yeti", one of our feature bulls in last year's sale, selling to Crystal Springs Ranch, BC. His dam is one of those cows who makes our job easy. I swear we could breed her to a goat and it could still make the top of the pen. She has had 9 calves to date only calving after Jan 10 once, due to a bull wreck, had that calf Feb 10 and bred right back for a late December calf. Highly productive and fertile, absolutely. Out of her 9 calves everyone has made the sale pen unless retained in our own herd. Quite honestly this is a cow that should be in the donor pen and hasn't been just due to numbers. "Guinness" has everything going for him. If you are looking for that next level bull he could be the one. This is a breeder bull, but first and foremost he will be a money maker.

When Garren showed "Jezebel" as a calf & bred heifer in 4-H and YCS and she stood middle of the pack, I said don't worry just wait until she's a cow, she will get noticed. In my mind out of 450 cows she ranks in the top 10 in my opinion. Her Daughter "Giselle" has been spotted near and far, and just so happens to be a Full sib to "Kuzco". This bull was an absolute stand out all summer with his dam, and suffered a slight set back in early October, but has turned it around and is coming on like a house on fire. Take it for what it's worth but one of my personal favorite cows mated to my favorite bull, I just have a feeling that he is going to be extra special. The stars have lined up here.

If you were to draw a picture of the ideal cow, I imagine that picture would look very much like the dam of "Heston". Perfect udder, perfect feet, perfect body type, easy keeping, simply flawless. I remember Darren Tyler calling me about her, and it didn't take much of a sales pitch as her Grand dam was one of my favorite cows when I first saw her at LaBatte's, and I liked her that much more as she matured in their herd. As you know I am all about the power of cow families, and this is a dandy. Last year "Heston's" full brother was also a high seller, going to Walt & Val Hedges, BC. "Heston" is equally good, I expect him to do great things for at his new home.

"Hidalgo" is another big powerful bull that was a standout all summer, coming from one of Garren's 4-H cows. "Abby" is a great young cow, with the typical "Mr. Gibbs" stamp. This is a cross we don't have a lot of, but I would say we need to do more often. "Hidalgo" will be a power bull, based on genetics alone, but these two great herd bulls have left every bit as powerful of females in our replacement pen. "Hidalgo" actually almost reminds me more of "Mr. Gibbs" in his makeup than "French Attack" but the great thing is you can't go wrong with either one. This is a big time bull that can get you to the next level.

I know I am beginning to sound like a broken record, but the "French Attack" calves were plumb impressive with their dams this summer. "Helmsley" is a bull I absolutely adore his pedigree. The bottom side is such a solid blend with "Barbossa, Legend & Rogant" and then add the "Ashante" cow family, WOW! A blend of performance, with enough calving ease to keep them honest, built in color, and BAM, we have "Helmsley". He is a legitimate contender. I know there are a lot of bulls here but have an extremely serious look here, this bull is rock solid.

We had the misfortune of losing the dam of "Billie" shortly after calving with hardware. Although she was a relatively young cow she has already done a great job for us leaving a spectacular daughter in our own herd as well as offspring working for Stuart & Karen Shaw, Newton Creek Ranch, and last year's son going to Randy Chubak. A bit of a different twist on the bottom side of the pedigree combining a couple more solid cow families in "Herlinde & Meesha". For dollars invested I think this will be one of the really solid purchases this spring. "Billie" is a bull you appreciate just that much more every day.

"Domingo" comes from a solid young cow we purchased from Virginia Ranch. This is only her third calf with her other two working for Dobbie Simmentals, ON & Arnold Daling, BC. "Domingo" isn't the first bull you find in the pen, but a bull you keep noticing over and over again. He doesn't just blow you away at first but when you stop and analyze him he just does everything right. He may very well be the sleeper in this particular sire group and he is a bull that needs to have a second look. I also feel he is a bull that will age like fine wine and just get better as time goes on. You have to appreciate his exceptional length, broad top, great hair coat and color pattern. Whether you want to use him on British or Exotic cows, he's as versatile as they come and will do a great job wherever he is put.

Sad day this fall when the dam of "Dynamic" came in open. This has been a very productive cow for us over the years. She has been one of those bomb proof individuals that we just expect will give us a good one, and she always did. She started with a bang as a first calver producing a high seller going to Walt & Val Hedges followed by two more sons to Crystal Springs Ranch & Jordan Livestock. She then went into a heifer phase most of which stayed here, and now "Dynamic" her final son. He is "Dynamic" in what he can bring to your herd. This will be a power bull too use on your mature cows to boost pounds, but certainly lots of merit to retain the females for replacements. He will be a good one, and a calf I have appreciated all along.

"Marlin" comes from one of the family favorite cows, "Becca". This old cow is as ugly as a mud fence, with her stumpy ears and short tail, but she just can't help but produce good ones. She is an absolute sweet heart to work with, and one of the cows we typically rob some colostrum from when she calves. Last year she was a bit under the weather and because of her naturally docile disposition we weren't on it as quick as we should have been so "Marlin" got a little extra love for about a week until we got her back on her feet. I think he naturally has her disposition, but he is pretty laid back for sure. Her past 4 mating's have all been to "French Attack" and "Eisenhower" was the feature son in his first calf crop, selling to South Peace Colony, followed by another son going to Poole Arrow Ranch, both in BC. We have an outstanding daughter that we retained, and now "Marlin". Don't be surprised if whoever gets him that Mackenzie may come for a visit as the two of them developed a very close bond in those first few days. A bull I score very high on my list.

As I had mentioned in "French Attack's" write up there is a lot more spread in his group due to him pulling double shift. The dam of "Herman" was to be bred to "Entourage" but unfortunately a hip injury for him proved to be worse than we thought, hence he has no sons in the sale. "Herman" is one of the younger bulls in this year's offering, but I feel he will certainly add value for his new owner. This will no doubt be a sale sleeper, as he is a bit smaller due to age, and no extra chrome on him just straight goods. "Herman" comes from a solid producing cow family, and his dam's last bull sold to Corey Mack in ND. This is a bull that will produce both very desirable steers and a set of replacement heifers that will be flat out good.

"Mishu" comes to you from Garren's top cow family, "Tyra". His dam "Sarah" just so happens to be a full sister to "Mr. Gibbs", as well as she is the great grandmother to "Santiago" (lot #56) who is Garren's feature lot this year. This has been a highly productive cow producing "Moloka'l" as a first calver, who was one of our high sellers selling to Red Willow. This is the fourth mating to "French Attack" resulting in two outstanding daughters, one of which is the dam of "Salizar" (lot #79). She also produced another top end bull in last year's sale selling to Graff Simmentals, BC. Not a lot of guess work here this bull should be extremely productive.

"Calipso" is absolutely one of my favorite bulls in this year's offering. Due to age he doesn't have an ADJ YW, but please note the WPDA on this calf. This is a big time performance bull from a big framed power cow. Regardless if you are selling your steer calves right off the cow or putting them in the feedlot his calves will absolutely crush the scale. "Calipso" is super balanced, very capacious, and has a thick heavy hair coat. I know I am promoting him as a performance bull, which he certainly is, but I also think he will produce an outstanding set of replacement heifers as well. Use him on your mature cows and your banker will think you are a genius.

"Henderson" has been a calf that I honestly never paid much attention to until late summer when he just kind of appeared, and we then realized how good he really was. He is an incredibly smooth long bodied bull, and I guess partially he was over looked due to being a bit younger, but he's certainly a bull you see in the bull pen now. A very different pedigree for us on the bottom side tracing back to "Takar, King Arthur & Tino". He is a bull that just grows on you more and more each day, and he is certainly no slouch in the performance department. I think this bull will calve extremely well also as you notice how smooth his shoulder blends in. A problem free bull with a bit of extra punch.

"Hershel" is another bull that comes to us via the Rocking R cows. This is probably one of the cows I was most excited about putting to work in our own breeding program. Even though "Hershel" is one of the younger bulls, this is the mating we were shooting for as his dam was a little later calving but from the moment I seen her I imagined how she would work with "French Attack" and work she did. "Hershel" has the same body type that his sire typically throws. He is a big soggy bugger that just ties everything together perfectly. I think he is going to be as bomb proof as they come, and be a bull you can use on any style of cow you desire.

We have typically held these March bulls back for 2 year olds or spares, but there are a couple of these youngsters we decided to part with now. This is another of Garren's bulls and goes back to his "Tyra" cow family. This is a royally bred bull that is as dark red as they come, and colored right down to the hoof. The "French Attack x Barbossa" combination has been an excellent cross for us. These two just seem to complement each other so well, and bring out the best in each other. "Pumba" will be a bull that will keep birth weight in check, provide good growth and performance, but truly his strongest attribute just may very well be the daughters he leaves behind. He is the real deal, and I dare say if he were a January calf he may be right near the top of the pen.

"Heisler" is a pen favorite for me. Even as a March baby, this young fella gets picked out by most who visit. It's a tall order for these young bulls to stack up with the pack this early in the season. "Heisler" sits back for no one. You have to completely appreciate his pure natural muscling and overall shape and power he possesses. He is going to be extremely impressive come sale day. From the day he hit the ground he had the look of herd bull. A great pedigree, superb color pattern, everything is right about him. This is another bull that I can only imagine where he would sit if he was two months older. Have a serious look here, this is a serious contender.

If I was to offer any advice in this year's sale, it's going to come right now. This is a bull I would not let slip under the radar. His dam "Cher" has had a huge impact on our herd. She has had 12 natural calves, 10 heifers of which we have been greedy and retained every single one for our own herd. Her 2 sons have sold to Rod & Brenda Snopek & The Prediger family in Ponoka. Predigers just sold their bull last year at 10 years of age. He has left a ton of daughters in their herd. In last year's bull sale 10 bulls in the sale went back to this cow family. This is the same cow family responsible for last year's high seller "Ozark" going to Wolfe Farms & Silver Lake Farms. Not to mention notables like, "Mazorotti, High Noon & Wasabi". I am a huge believer in cow families and cow power. When building a program build a good foundation to work from. "Razzmatazz" will build as solid of foundation as you can find. These aren't new genetics but as tried tested and proven as you will ever find.

We are really excited to have added "Fort Knox" into our bull battery. I have really admired the job that his sire "Bryck" has done so we were hoping to acquire a son. "Fort Knox" was not only the type of bull we were in pursuit of, but then when we looked at the bottom side of his pedigree, everything lined up. His dam is flawless, with an impeccable pedigree. Although there is not a large group of sons in the sale we expect big things from him in the future and the three sons are very nice representatives. His daughters in our replacement pen look extremely good as well. He will have a much larger pen next year, as he bred a group of fall calvers for us (something new) as well as a big group of cows this spring. Look to "Fort Knox" to add length, and growth. He calved very well for us, and did an amazing job on color. A future star in our bull band.

I feel as though "Knoxbury" could be a secret weapon. When I'm writing these footnotes, we had already done a group of November pictures for our ads, of which "Knoxbury" was one of those bulls. We did repicture him for the catalogue as he has just matured that much more. He is a long bodied, deep sided bull with great muscle, excellent feet and legs, he moves like a cat, is smooth polled, and comes from an exceptional cow family. For "Fort Knox's" first group of calves we can't help but be excited when you see the caliber of these bulls. A very workable birth weight with tons of performance. This is an exceptional Polled bull.

"Hamilton" is another real soggy made bull. Very similar story to "Knoxbury" in the fact that he too comes from another very strong cow family. The "Desiree" cow family has been a favorite for many years. We only have a couple "Rawlins" cows left in our herd but he was a great bull that bred into his early teens. Lots of longevity in this pedigree. If you search back generations you will appreciate how stacked this pedigree really is. Another bull with a very nice birth weight, and followed up by lots of performance. Great rancher bull here.

"Knoxberg" has been a standout for me all year long. Yes he is one of the younger bulls, and will not quite be a year old come sale time, but he has been a calf that has been a standout since birth. His dam had an excellent heifer in our sale this fall, and if you read those footnotes you will know how high I am on "Knoxberg's" dam. She is as flawless as they come, and a female admired by many. She is a direct daughter of "Elexis" who was one of our main donor cows here for many years. I think this bull has huge potential, and as I stated is really young. Be sure to look close at him sale day he could very well be a bull that could cost double by the end of sale season.

This is just the second calf crop for "Ulysses" and he has really put a stamp on his calves. He is a bull that will make them super thick and hairy. They have huge broad tops, and possess lots of muscle. "Ulysses" is a big powerful bull with huge feet and is extremely easy keeping, much like his dam "Precious". She is a cow that has had a huge impact on our program producing many high sellers for us, as well as adding 2 herd bulls into our bull battery. Although "Ulysses" himself has a larger birth weight he has been extremely easy calving for us, averaging 91 lbs to date. He is a bull that typically runs short on gestation. We even considered using him in the heifer pen, but opted out just due to his sheer size. Look to his sons to add thickness, muscle pattern and extra hair.

"Guardian" is a very typical "Ulysses" calf, he has the look. Please note the moderate birth weight of this guy. He is a bull that will be very versatile and will be extremely user friendly, use him wherever you want to. I can't say enough good things about his dam. She is a beautiful young female we purchased from Marc Boisvert. She had the misfortune of losing her first calf about three weeks prior to when we were supposed to start calving. We milked her for close to a month before we had a twin to graft onto her, and she bonded with it instantly. She is a sweet heart to work with and just wants to be a mom. She is also a beautiful put together cow, with a very strong pedigree. In the words of Karen, he's super good.

"Courage" is a bull that you appreciate much more with time. Many of these "Ulysses" calves start out super small, and then turn on the jets, "Courage" fits that profile to a 'T'. With the shot of "Windsurfer" in the back this is a bull that will mature and be an extremely stout, easy keeping bull. The dam of "Courage" is just a second calver with last year's bull selling to Colin Foster, AB. I think this bull will be a pretty legitimate calving ease contender as well, as her first calf was under 70 lbs at birth. With her being a direct daughter of "Barbossa" I can almost guarantee he will calve great.

"Haggard" is a maternal brother to "Gibraltar" our second high selling bull last year going to DJ Farms, ON. This is a bull that has stood out all along. This is a big time performance bull that comes with a great cow family that has proven time and time again how productive they really are. 5 cows in a row (Dakota, Zeon, Neon, Hera & Herlinde) that have not only produced sale toppers for us, but their offspring have gone on to do the same thing. Very little guess work here, just a big time performance bull with a huge list accolades that are longer than a Joe Farris smoke break. This is one of the bulls we pictured in November which we didn't get repictured again in December. He has really matured since this photo was taken.

Another very typical "Ulysses" son. Very stout made, extra thickness, big top, big hip. This has been a pretty solid producing young cow for Garren. This is her third calf, her first selling to Wyatt Dahm, second was slated to be in the fall production sale but had to be removed due to a back injury and now "Dartanian". This young cow has done a nice job in moderating birth weights (89, 90, 92). Her mother is very similar being super productive, and all tracing back to the "Star Gazer" cow family. "Dartanian" may not be the first bull you notice in the bull pen but I think when you stop and analyze him you will really appreciate him, right down to his dark pigmented hooves.

Perhaps one of the thickest made bulls in the whole sale. "Hampton" comes from a line of huge performance (see lot #2 for grandmother), as well as a bull with a very different pedigree. We were fortunate enough to get semen on "Orange River" you will not find many of these in Canada. When I first seen this bull in person in Texas, I was immediately impressed. Then when we seen his offspring just that much more so. Because it is not easy to find we used it very sparingly on a few top end cows. Hampton will be one of the youngest in this year's sale, but is a bull that you will notice. Huge potential here, don't pass him by.

For the record you can't judge a book by its cover. We need to start the story of "Guinness" off by you knowing he was orphaned the end of May, so keep in mind he has done pretty well. He is our only "Elevation" calf to sell and his dam is none other than "Ziley" making him a maternal brother to "Raptor". Yes he is small, and a little behind his classmates, but with his pedigree and story in mind I do think he is a diamond in the rough. His numbers don't tell the whole story as he has certainly kept pace after coming off grass. Also note the birth weight and this pedigree. He very well could be a bomb proof, polled bull that will work on your heifers for years. His pedigree certainly says so. This could be a better investment than going to Vegas, you can't go there now anyways, let it ride right here with "Guinness".

"Hobbs" has a little different make up and structure than the bulk of our pen. He is a much larger framed bull in my opinion that is just really starting to find his groove now. This is a bull I would certainly steer towards someone looking to add some stretch and frame in either a set of straight British cows or smaller framed exotics. He comes via our ET program from our old "Unique" cow. This is a cow that has been super productive for us and we actually just shipped her this fall as she was beginning to get a bit arthritic. She left some great cattle in her time and the cross with "Raptor" I think this bull will really turn into something special.

The sire of "Hulk & Habenaro", "Jahari" is a bull we have always really admired. He is a bull we used for many years to add thickness, power & performance, all in a very attractive package. We aren't blessed with an abundance of semen inventory on him so we do use it rather sparingly. The dam of these two bulls, "Kael" is a former high seller in our production sale that is now co-owned with Canadian Donors. This young cow has already made a significant impact in several herds, and she boasts 4 sons in this year's sale. This will be a great cross and no matter who ever buys either of them, I think they will be super happy with the job they will do. I realize there is a bit more birth weight and keep in mind they are embryo calves which always tend to be bigger at birth. We aren't really as focused on what the actual birth weight is rather than calving ease itself. Much like you we don't like pulling calves, so we are confident these bulls will calve well on mature cows. With that in mind I point you towards "Ulysses" a larger birth weight ET bull who has produced a 91 lb. birth weight average to date. This pair will be great purchases.

"Hi Tech" is a bull with a very bright future. "Mr. Adonis" has done a tremendous job in many herds, and once again "Hi Tech" comes from the great "Kael" cow. He will be a bull that should moderate birth weights and still give ample growth while maintaining style, and add plenty of thickness. He will be a bull that will produce superior replacement females and a wicked set of males. You have to really admire his thickness, and look at the tremendous hair coat he possesses, as well as his great color pattern, red to the hoof. A set of steer calves by him in the feedlot would be awesome. This is just a great bull that can work anywhere for anyone on any type of cow.

This will be our final calf crop for "Aegon", as he is now working the pastures at Diamond Rio Ranch. The Predigers have been great bull customers and friends over the years so when they were needing a mature bull to fill a gap "Aegon" was let go. He is a tremendously sound bull, who moves like a cat. He is extremely easy keeping, with tremendous thickness and natural muscling. This summer when I was in Quebec I had a look at both his dam and grand dam again who are 8 & 11 years old and neither show any sign of slowing down. His sire also bred until I believe age 10, so look to his sons to add longevity into your program. They will also add strong foot structure, ease of fleshing and muscling to a calf crop. They will be a bit more moderate in frame, and be as functional of sire group as we offer. The "Aegon" daughters we have producing in our herd are superb, and have absolutely flawless udders. These will be female producing bulls.

"Hayden" comes to you from a favorite cow of mine "Bria", I know every herd has one just like her, the unsung hero of the group. She is a beautiful cow to look at put together perfectly, great feet and udder always in show condition, and is yet one of the cows that just somehow never really show up on the radar, but ALWAYS produces a top calf. The full sister to "Hayden" sold in the production sale this fall as one of the high sellers to Croft Creek Ranch. "Hayden" is a bull I appreciate more and more each day and I feel he is going to develop into a carbon copy of his sire. This will be a great bull.

"Haegon" has been a calf we have paid close attention to right from birth. He is a cool calf and has always had a special look about him. He is a bit different in pedigree, especially for a Polled bull, and he certainly possesses a little extra thickness and muscle shape as well. "Haegon" comes from the "Elexis" cow family, and although his dam is just a youngster she already appears to be very productive. Her first calf was sold this fall in our production sale to the Ford's in Irma. Lots of potential with "Haegon".

"Harry" is another of Mackenzie's bulls, coming from a very nice young cow she purchased from Ralph Burns. She is a direct daughter of "Molson" from a "Rusty" cow so there is no lack of performance there, and we have really come to admire the cattle produced from Lazy RS as they are no nonsense highly productive cattle that just flat out work, besides they are super great people. I think "Harry" is another bull that will mature into a pure beef machine much like his sire, that will have just a titch more performance in him.

This may be the sleeper of this particular sire group. "Remmie's" dam has been a very good producer for Garren, and comes from a great cow family that goes back to one of our very best if not the best "Native Son" daughters to ever work here in "Mesquite". This cow was like a license to print money. She had 12 natural calves, 8 bulls every one of them making the sale pen and 4 daughters, who have carried on right where she left off. This will be a bull that I would use on a set of cows you don't want to make many changes with but just maintain the type they are. Then when you sort your calves off in the fall slip as many of his daughters in to the replacement pen as possible. I'm certain they will do nothing but make you money.

"Hagan" is another youngster in this year's sale. His dam is a really nice cow that came to us in the Rocking R herd. She unfortunately had a set of twins the year before last so it slid her back considerably in calving, but she bounced right back and bred up early again this year. "Hagan" is a very honest bull and like the other "Aegon's" will be a bit more moderate in frame and possess a little extra thickness. He's a bull we actually notice quite often in the group, maybe because of his unique marking on his tail, but I think more so because of how complete he really is. I dare say this is one of those bulls that if he was an early January born individual you would quickly gravitate to. He is virtually 2 months younger than the majority of the pen so keep that in mind when you look at him, he's pretty darn good.

A bit of sadness to report with "Mr.Gibbs" he has bred two groups of cows every year ever since he was a yearling, so he is a bull that typically breeds 70-80 cows per year. Last year for some reason he shot blanks for us, but very happy in the fact he recovered enough to breed the second group of cows at Sanderson's. So there will be no "Mr. Gibbs" bulls in next year's sale, but let's cross our fingers and hope to see more in the 2023 Bull Sale. "Mr. Gibbs" has done an amazing job for us. He provides extra growth, length, adds hair, extra thickness, tremendous dispositions, and it appears both his sons and daughters are passing those traits on as well. For whatever reason when used on single polled cows we get about 75% coming back polled. He also boasts having sired last year's high selling bull "Ozark" and was the grandsire to the second high seller "Gibraltar" and also averaged \$11,435 on his sire group. This group of sons will certainly give you extra power, a solid set you can wedge into with confidence.

"Garrison" would be the only calf in the "Mr. Gibbs" group that doesn't typically fit his style and profile. He is a bit more moderate in make-up and doesn't have quite the performance his brothers do, likely a bit more calving ease going back to the "Legend" on his dams side. He does however possess the same great hair coat, and heavy pigmentation most of them do have. Although his dam is an older cow she is new to our program with this being her second calf for us. She produced a stellar heifer which we sold in the production sale this fall to Kindred Spirit, SK and if you search her progeny you will see she is a cow that will moderate birth weights. I think "Garrison" is a bull that will certainly keep the birth weight number in check while still maintaining a degree of extra performance. Pretty useful bull for a wide variety of herds.

The dam of "Harper" isn't a cow we raised but a cow family we really admired. So much so that we ended up buying her, her mother and her grandmother "Dulcie" who was then entered into our donor pen. If you see one of these cows, then you seen them all as they were carbon copies of each other. Big broody capacious cows, with huge tops, extremely gentle, and huge feet. If a twister rolled through they could be the only cows left still standing they were that solid. "Harper" is a bull that can be overlooked somewhat in a pen of 120 bulls, but trust me when you find him and truly pick him apart he's all there. This is a bull I really think whoever gets him will look like an absolute genius by the end of sale season. A little more common in the color department but has all the fixins' to make him good. One of the bulls I highly suggest you make the effort to look at he will be right.

"Gibbson's Finest" I feel is the finest of the "Mr. Gibbs" sons this year. (See what I did there, little play on words.) He too has been a standout right from birth. He is a bull with not just a different pedigree on the bottom, but a pedigree that has a little extra marketability in it, "Pasta, Solway Adonis, Iglhoff, Bavarian, Bold, Panzer" yep there is some uniqueness to this one. As a first calver his dam produced one of our high selling bred heifers by "Raptor" who sold to Javier Jauregui in Mexico. This little cow can get it done, and the grand dam of "Gibbson's Finest" is "Patty", the former high seller in the Eastern Harvest sale for \$36,000 who we fast tracked into our donor pen. This bull is bred to work and bred to be good, he is the finest.

"Hito" is a full brother to the bull who was to be Lot #1 in last year's sale. We ended up pulling him due to being deferred semen, which is really a shame as he is a phenomenal individual, but was sold later last spring to Walt & Val Hedges. The dam of "Hito" is a cow that always gets it done and has additional sons working at Waterton, OB & Camrose Colonies. This is a bomb proof cow and you know my thoughts already on "Mr. Gibbs" very little guess work here. This guy will sire groups of sought after feedlot steers.

I have to admit we typically don't care if we have a bull or heifer calf as long as they are alive and healthy, but there is always that odd cow you cross your fingers hoping for that special one. I was really hoping that "Huntley" was going to be a heifer. His dam "Zeon" is one of our unsung heroes, and the daughters she has in production are out of this world. "Dakota" produced our second high seller in last year's sale going to DJ Farms. Her next daughter "Edwinna" was a former lead off lot and high seller in our fall production sale, selling to Ferme Gagnon, PQ. She then turned around and delivered a high seller for them in the calf she was carrying, selling to Mark Land & Cattle. Her bull calves have be no slouches either. Somehow "Huntly" came straight white faced but trust me when I tell you he will be damn good. Don't get caught sleeping when he sells, he will be worth the chips.

We quite often rename bulls when we buy them but this is the name "Precision" came with. If I was to rename him today it would be "Secret Weapon", as that is just what he is. He is a bull that doesn't receive the credit he deserves. He has worked in our heifer pen right from day one, servicing a handful of cows as well. Next year it looks like he will receive all cows just due to his size, but my goodness this bull has been a great addition to our bull battery. He calves great but WOWZERS are the calves good. We are greedy and don't just want a calf off of our first calvers, we want them to measure up in the pen. "Precision" certainly does that. (see the footnotes on lot #55). He has the second largest sire group in this year's sale, a pretty big statement as well considering the bulk of his group is first calvers. Dig in with confidence this is a string of bulls that will moderate birth add thickness, and man do we ever like his daughters. He's the real deal.

There are zero questions that "Santiago" is one of the studs in the pen. This is another of Garren's bulls, and man does he have a wicked set of calves and "Santiago" could be the quarterback. Garren has 10 bulls in this year's sale 6 of which all trace back to this cow family, not to mention the fact this is the same cow family that produced "Mr. Gibbs". I absolutely love this calf, and as I mentioned we did utilize "Precision" on a few cows as well. This cow was bred this way last year as well and had an awesome bull calf which unfortunately was culled after weaning due to injury. That's how much we liked that calf at birth to make sure she went back in the same pen. Be sure to have a good look at this bull he's all there. He's thick and beefy yet still will maintain enough calving ease combined with performance. One of my top picks.

"Cruise" is a bonafied calving ease bull in my mind. His dam was absolutely one of my favorites in the first calvers group last year, and still looks the part. This is a stacked pedigree of calving ease bulls with performance. "Precision, Epic, Barbossa", then back to the great "Cher" cow family. I think this is a bull that could very well breed every bit as good as his sire maybe even better, and with his pedigree there is no doubt in my mind he will be consistent. The maternal merits of this bull are outstanding as well. This is an incredible cow family, you can't go wrong on this one. Put him in your heifer pen and they will be on "Cruise" control.

"Farkel" is from just a first calving heifer, and is a very legitimate contender to see a pen of heifers. Once again coming from a great cow family. We have always been big believers in when we source a cow family to do what we can to try and incorporate them into our program. When I first saw the "Ashante" cow at BHR in Texas I was awe struck. She ended up being the anchor of their program so when the opportunity was offered to purchase a flush on her we took our shot at it. "Farkel" is four generations removed from this great cow but every generation has been great. This is a bull that is really turning it on now here in early December. I think you will really appreciate him that much more come sale day, and even that much more come spring. He blends into his shoulder so well and with his birth weight I am super confident in his calving ability. His color pattern is tremendous and red to the hoof and will be a bull you can use on you black, red or tans, he'll do a job.

"Helix" is another dark red calving ease bull from a first calver. I always find the toughest bulls to source are the legitimate heifer bulls. For one we naturally gravitate to the performance bulls, especially when they are all in the same pen, it's pretty tough to look past those big powerhouses. The second thing is to find the bull that will calve, but also give you some bang for your buck. As I stated before I tend to be greedy and want just a little more. These "Precision" sons are just that. They will calve, but leave you a set of calves you will be super proud of in the fall. Another bull that comes from a very strong cow family. The old "Peach" cow also came to us via an embryo purchase from a cow we quite liked. The old girl is coming with her 12th natural calf this year, and has produced some dandy's in her time. "Helix" is a great choice.

"Hoyt" had a minor setback after weaning so is a little behind where we were expecting him to be at this time. Having said that with our sale being as early as it is he will be more than ready come game time. This is another of the calves that I appreciated the job "Precision" did so much with his dam as a first calver, that we stuck her back in the same pen for another round. Please note this is the same cow family that is responsible for producing "Shazam". His dam also raised our high selling heifer this fall selling to MAVV Farms. As I said at the time I am writing footnotes and we are picturing, he is a notch behind where he should be. He is just starting to come around now, we can see him making a move and he is going to be good. It's not a sprint, it's a marathon and he's in the game.

This will be the third "Precision" bull tracing back to the "Cher" cow family. All three come with moderate birth weights, all possess extra thickness, are extremely sound footed free moving bulls with lots of depth and capacity. "Hossa" will be another bull you will want to keep several daughters from, and with him tracing back to "Mr. Gibbs" there will be a bit more performance as well. He is a plainer colored bull but do study him closely this will be a great bull. He is going to sire some fabulous steer calves as well. Very rounded bull.

Dark red, thick and hairy. Same story these "Precision" sons come with more moderate birth, and are bulls that will be very user friendly. You can't go wrong with this guy as "Hemingway" is a baby brother to a former high seller, "High Noon". I know I am sounding very repetitive on this group but they are bulls that will work such a broad spectrum. Step in on them with confidence, if you just want a down right honest problem free bull that you don't have to over think where or what to use him on these are good solid picks.

"Dr. Nivario" is easily another feature in this sire group. Please note his birth date, as he is a late February born bull, but is all there. He has been a standout all summer long, and at weaning bellied up to the bar with the big boys and never looked back. His dam has not produced a sale calf for under \$7000, and produces them one after another. She has offspring working at McMannus Simmentals, MB, Erskine Colony, AB & Ferrybank Colony, AB. Garren showed "Isabelle" as a yearling heifer in the YCS where she was the champion bred and owned female. She is highly productive and an absolute gem to work with. If there was ever a bull we have raised that was as comparable to his sire "Precision" I think he's the one. "Dr. Nivario" could very well be just what the doctor ordered.

The last guy born in February, this is "Harlan". We are moving into some very proven genetics now. The dam of "Harlan" has been a favorite cow of ours for many years. She is one of those females you can't have too many of. Low maintenance, easy keeping, docile, and a cow that always moderates birth. Her largest calf was 99 lbs but she's typically in the mid 80's. Her daughters have all been retained in our herd and have done a great job for us. Her sons have sold to Pool's Arrow Ranch, Graff Simmentals, both in BC as well as last year's full brother selling to Northway Farms, AB. "Harlan" will be a bull to moderate birth weight, add lots of pigmentation, be very easy fleshing and will be a rock star at making momma cows. I'm a huge fan of this bull.

"Huxton" is one of the few March calves we have put in the sale. He is a full brother to "Disco" another former high seller, going to Yellow Rose & Hampton Simmentals. This bull has done a masterful job for their herd, and they have utilized him on both their Fullbloods and their Red & Black Purebreds. This is the last "Precision" son in the catalogue and I can't express enough about the versatility of this sire group. They are honestly bulls you can use anywhere. If you run multiple bulls in a pasture this is a sire group I would say pick away at as they will be bomb proof. With "Huxton" the guess work is already taken out when you look at his full brothers' track record. Buy with confidence.

"Omaha" is from a first calving heifer we purchased from Donovandale Simmentals. This is another female that stems back to a foundation cow in which they have had huge success with in "22P". Same philosophy here, source females from foundation cows and develop a new line around them. I really like the job this heifer did on "Omaha" as a first calver, and I'm really excited about her future. "Omaha" is a "Gurrero" with a whole lot more punch, but still comes with the built in calving ease, and being Polled is purely a bonus. Remember the cows name "Faith" I have a feeling she is going to make a significant contribution to our herd in the upcoming years.

Well I certainly wasn't expecting that the first write up on "Radioactive" for our bull sale catalogue that he would no longer with us, but unfortunately that is the case. We lost this great young herd bull this year at the end of breeding season with a broken foot. We were hoping for him to have a recovery, but we ended up having to euthanize him. In a short period of time though he has already left an amazing impact. In 10 progeny sold this spring and fall they have averaged an outstanding \$10,250. Not to mention in the past three production sales his semen has averaged \$630/ straw. He was an incredible breeding bull for us servicing 36 heifers this spring with only 4 repeats on the first breeding. He will leave a huge void in our pen, and truly be hard to replace. The first year we used him solely on heifers, but we thought let's see what he can do when we throw some power at him. Check out lot #72 specifically, I think he will answer all the questions. Once again the Polled factor is an absolute bonus on this bull.

A true calving ease contender in "Hugo". He comes from a beautiful first calving heifer of Mackenzie's going back to "Angelica". She made her mark as a first calver producing "Ego" who sold to Hairy Hill Cattle Co, and now has influenced many herds through semen sales. "Hugo" is a very smooth fronted bull, with very good length and nice muscle shape. It certainly doesn't hurt that his pedigree also boasts a shot of "Viper" as well. This is a bull that not only looks the part but has a pedigree that reads right too. He won't mature to be the biggest bull, nor is he bred to be but if you want a bull that should do an awesome job in your heifer pen for many, many years then please take note.

I guess I may have made a small mistake when we were pulling hair for DNA to Polled test bulls, I missed checking if "Humberto" was homozygous Polled. We knew we wouldn't have info back in time for the catalogue so we never tested him, but regardless he is polled but more importantly he is good. He comes from a very nice "Barbossa" daughter, so he certainly has built in calving ease and then traces back to Mom's favorite female "Diva 118D". I'm pretty certain if we would have sold her my own mother would have disowned me. Her mother "Barcelona" has been no slouch either producing "Sorcerer" as a first calver, yet another of our heifer bulls. Her only other son "Apex" is also a former high seller working for Stone Simmentals. This pedigree alone should give you confidence in his calving ability. I really like this bull.

"Hilsboro" is a Polled bull from a mature cow tracing back to none other than "Dorothy Jane". "Jocelyn" has been a great producer for us over the years, producing her fair share of sale cattle. She has sons working for Joe Dahm, Craigmyle Colony, Erskine Colony, Kevin Cummings, as well as a daughter at Newton Creek Simmentals. She has been super reliable, and I expect "Hilsboro" will make one happy Rancher. He will be a bull that should keep birth weight in check, have a high probability of making them polled and leave an extremely marketable set of growthy calves in the process. A bull that will work on a huge selection of cows.

"Horatio" put the "POW" in "POWER". Some of you may already be familiar with Mackenzie's show cow "Tinkerbell". This is a powerful cow that is very tough to fault. She is one of the largest cows we own, and I believe could give birth to a smart car with no effort. It doesn't seem to matter what we breed her to just expect this is the size of calf she is going to deliver. If you want to build a powerful set of feedlot steers then "Horatio" should be high on your list if not at the top. This big bugger is stylish, but has all the goods too. Look at his incredible length, and how deep his rear quarter carries on him. I'm not telling you who the prettiest girl at the dance is, it depends who's looking, but I do know this guy will give you superior growth and turn that into big dollars.

This could be a power house combination. "Happy Gilmour" comes from a very prolific cow in "Precious". We were fortunate to have partnered up with LaBatte Simmentals to own this great donor cow. She has left some phenomenal offspring behind, including two of our own herd bulls in "Ulysses & Matador". We've already talked about the attributes of "Radioactive", so I think it's fair to say "Happy Gilmour" has a pretty good resume to become someone special. As I said this is a bull that comes from our Embryo program, raised by a mature cow, but I do feel he is a bull that not only boasts calving ease but a degree of performance as well. A bull that should leave a mark for sure.

Well let's see who has studied their catalogue. "Hefner" aka "Hugh" is a homozygous Polled Full Fleckvieh bull that can hardly wait to visit your heifer pen. He is without question in my mind a calving ease candidate, but has as much marketability as any bull we will sell this year. His pedigree says he will calve, he is built like he will calve, and with the Homo Polled factor I would bet if someone wants to dabble in the semen market you could sell a bucket full of this guy. I do think the calves will be good, but I also think the added value of having a group of heifers bred to him could be substantial. Regardless of where he goes or what becomes of him I do think he will be bullet proof.

"Fame" is a very moderate framed polled bull that fits in our calving ease section. He is not bred to be a huge bull, so he is a bull that if you choose to use him in your heifer pen you will get more time and use out of him. He comes from the "Cher" cow family, so even though we are pitching his angle as a calving ease bull, he is certainly not a bull to overlook his maternal strengths on. This bull has a lot of things going for him. Another thing we haven't really talked about much in this "Radioactive" sire group is their overall soundness. These are extremely good footed, sound functional cattle. "Fame" might not be the biggest but could return you a fortune on your investment.

This guy does have a "Fabulous" pedigree. Now for whatever reason his mother wanted absolutely no part of being a mom, so this will be her only calf as we found him a foster mom who did love him. His mom was a beautiful heifer with a perfect udder, great body, and was super quiet but had zero motherhood instinct. "Fabulous" was raised by a heifer, so growth wise he is comparable to where he should have been. I have always really liked this guy, and I guess we got to know him a little better due to the extra work to find him a mom, but he has always had a look about him. Certainly not the big power blow you away look, but always a soft very correct, he's going to be somebody look. As I said his pedigree certainly reads right, and comes from a powerful cow family. This is a solid bull who will be "Fabulous".

There will be a few more "Barbossa" calves still to come but certainly be a lot more limited, as we have a very small semen bank on him. We unfortunately lost "Barbossa" this summer. He didn't actually physically breed this spring he was kept around more as a mascot, as we felt he earned the right to retire here on the farm. He left us on his own terms and was able to enjoy a few sunny days on grass this summer. This is a bull that we can't even begin to tell you the contribution he made to our program. He did certainly sire some front end contenders for us, but I think the bigger picture is the ability of his daughters to produce the super stars. If you look back at many of our past sales and see who the maternal grand sire is more often than not its "Barbossa". He was a tremendous calving bull, who still mustered up plenty of performance. His EPD's are simply impressive, but one thing that doesn't show there is the longevity and fertility he transmitted. RIP old fella, you done good, your legacy will carry on here for generations!

"Hayze & Hullcar" are a pair of Polled/Scurred twins that come from an outstanding young cow. She is only a third calver, but these two are #3 & #4 bulls of hers to make the bull sale. Her first two bulls were both standouts in my mind selling to Nickel Farms & Javier Jauregui, both working in purebred operations. We bred her back the same way again last year, hoping for a heifer, but I'm not so sure that with the loss of "Barbossa" the next one could be his replacement if it's a bull. Needless to say I am very high on this young cow, and this cross absolute works. Typically twins don't make the cut into the bull pen, but in this particular case I feel they are very worthy.

"Salizar" is unquestionably one of the feature calving ease bulls of this year's sale. "Barbossa" has been as reliable for us in that department as any bull we have ever owned. "Salizar" has a pedigree that reads right, and is stacked as well on paper as he is in person. His first calving "French Attack" dam is absolutely flawless. Her mother is a full sister to "Mr. Gibbs" so this bull certainly has a shot of performance as well. Not a new pedigree, but as proven as they come. Tried, tested and proven it doesn't get any better than that. If you want to eliminate all the guess work he is as good of choice as you will find.

Similar pedigree to the last bull, in that he is from a full sister to "Mr. Gibbs". Garren flushed "Tyra" and mom and dad managed to get one out of that flush for themselves. "Horizon's" dam is a beautiful young cow, and like her sisters, appears to be a female we can breed to just about any bull we choose and the results should be phenomenal. Keep in mind "Moloka'i" who went to Red Willow and "Churro" was owned by Lane Simmentals and now works for Connor Wiebe. These two bulls both made an impact and are full brothers by blood to "Horizon". Once again a very proven pedigree.

This is another of the handful of bulls I was really hoping would come as a heifer. His full sister "Zeon" is probably the best kept secret in our herd. She is an amazing producing cow, she certainly looks the part, but is a female that people just tend to view past when they tour the herd. I haven't calculated the dollars she has brought in for us, but its big. For whatever reason "Holtzer" came straight white faced. He is certainly going to be one of the plainer looking bulls in the sale, but I promise he will be a producer. For dollars invested this bull will have a high rate of return. He is registered as a polled bull, but we did remove extremely large scurs from him. He may very well leave you some polled calves, as I said he was definitely scurred but they were very large and quite ugly so we decided to remove them. My advice would be sort a set of cows that you want to retain daughters from. They will be very good and he will have a set of steers that certainly have some grow in them.

"Kaboom" has been a family favorite all summer long. We did consider retaining him for ourselves. He is going to be a bull I feel can be used on both cows and heifers, and you will expect great results from both. I love the depth of body and the big square hip on "Kaboom", and then when you consider the fact that this is a bull that also adds calving ease, makes him very special. He is backed by a solid cow family that traces back to our old "Romulus" donor cow "Emma". This is a bull with a great pedigree, and the "Barbossa" daughters we have in production are some of our best. I really think "Kaboom" offers a bit of everything in one complete package.

"Heinzberg" is another of the younger bulls in this year's sale, coming from a real solid young cow with a nice pedigree. "Heinzberg" comes polled, and will also offer enough calving ease to make him very versatile, but still has enough jam to bring in heavy weight calves in the fall. Certainly a bull that fits into everyone's budget, and a bull that will add value to your program. We know he will not be a high seller, but we also know bulls like this typically create repeat bull customers, as they are so useful and typically just get better and better with time. Don't overlook him.

Last year was a pretty rough year on our bull battery, and at the time I am writing these footnotes it appears as though this may be "Epic's" last year for us. He has had a huge impact on our program. We have used him predominantly on cows, but has also been used on his fair share of heifers over the years, but due to his size he hasn't been in that pen for a few years. He calves exceptionally well for us and interestingly when you thumb through you will no doubt find some bigger birth weight calves. I have always maintained calving ease is different than birth weight. If they are long and smooth with great neck extension they will calve, but you typically will wean a larger calf with more birth weight as well. I also feel if we keep pushing smaller and smaller birth weights soon we have cows that can't calve a larger calf. So when looking at these "Epic" sons know you are looking at performance bulls that do possess a balance of calving ease in them. They will be bulls you love on your cows, will add pounds into a pen of steers, and offer a set of replacement heifers that are "Epic". This is a solid sire group.

"Montaro" has been a stand out right from birth. For those of you who remember "High Noon" this is a bull that patterns very similar to him. "Montaro" was one of the top picks by visitors all summer long and you appreciate him just that much more when you see his dam. He has always had a huge broad top, lots of dimension, and rib shape. He is a stylish bull with extra thickness, backed by a superior momma cow, and cow family. He is a bull who has never had a bad day, he always looks super good! I feel he has a lot to offer and is a bull that would contribute to the breed. His full brother went to work for Bill & Jerry Orlick last year. We like "Monatro" a lot.

"Hendrix" is a big powerhouse in this sire group, and comes from a cow and cow family that always produces near the top end for us. As most of the "Epic" sons he has exceptional length of spine, and has a very nice attitude to work with. Dan did a very poor job of dehorning him, so he was done at weaning time, so he does have a bit of a square base to his head. That will not change the fact that this bull will produce an exceptional set of performance calves. I can hardly wait to see a set of steers produced by him, they are going to be awesome. This cow family has been no miss for us. His dam was bred to "Mazorotti" as a first calver, who is an "Epic" son. This is an outstanding young cow in our herd. Every other mating has been to "Epic" with full brothers at South Peace Colony & Javier Jauregui. No guess work here.

"Brewster" fits the typical "Epic" pattern. Big growth power bull with tremendous length, and muscle. His dam is a young cow we purchased as a heifer calf from Cameo farms. This is a very nice young cow that appears that she is going to be very productive in her time. This is just her second calf with her first being a very nice female we sold this fall to Eve Smith in our production sale. When you look at the pedigree on this young cow not only is it stacked solid, but also offers a lot of diversity in outcrossed genetics. This is a very good bull with lots of jam, and huge potential.

"Huxley" is one of the front end performance bulls in this year's sale. When we were taking pictures Karen's comment was, boy he sure made his daddy proud. Yep he sure did. We have mated this cow this way several times, and he has full brothers working for the Trask Family, Pinto Cow Ranch & Croft Creek Ranch. This is a bull with a star studded pedigree slammed with performance, all stemming back to the "Star Gazer" cow family. This is a big old power bull with heavy black pigmentation. I personally think if I had a set of straight Black Angus cows this would be the bull I would throw in with them, he would be a game changer in my mind. No matter who buys him or where they use him someone is going to make a lot of cash on his calves.

A true pen favorite. We sold a full sister to "Hudson" this fall in our production sale to Crystal Springs Ranch. I always get asked who's your favorite, and without hesitation I named this heifer among the top 5. Same thing with "Hudson" this bull is just right. His mother "Ava" would unquestionably make the short list of one of our best cows. This is a bull I have pondered over a lot. He is another bull that I will be keeping a close eye on as I do feel he is a bull that could contribute to our own breeding program. We have gotten away from retaining semen on bulls as we feel you have made the investment and should reap the rewards. If semen becomes available on him or the bull down the road please be sure to let us know first. There is zero doubt in my mind this is a breeder bull and will do great things. Regardless if he ends up in a commercial or purebred herd this is a bull that is right for the times.

These "Epic" sons are pretty special this year. "Pearl Harbour" is a 1/2 brother to Shazam. This cow can get'er done for sure. Both of her daughters are in production in our herd, and her sons have went to Starwest Farms, Aaron & Allan Olson & Chris Bowman. He has the same phenomenal length of spine the bulk of the "Epic" sons possess, maybe even a little more as he is one of the longest smoothest bulls we will offer this year. The fact that he comes from a "Barbossa" daughter this bull will have that much more calving ease and maternal in him. If solid color is important to you his pedigree is stacked and solid for multiple generations. He's a dandy that should be high on your shopping list.

It just occurred to me while doing these footnotes, as this is the last Fullblood "Epic" son how intriguing this sire group really is. We had a guy looking at bulls the other day by himself and texted me the numbers he liked and I didn't actually realize until now he picked every "Epic" son out in a pen of 120. I guess that is a pretty solid endorsement on this sire group. "Hillar" is probably the most moderate made in this sire group. He comes from a highly productive "Maltese" cow, who just quietly goes about her job. Her dam was one of the females we purchased from Porter Ranches herd reduction, and was a cow we added into our donor program. A stellar pedigree, and certainly has a different twist to it as well. Just an all-around solid bull in "Hillar".

ANGUS/ANGUS

"Trailblazer" has been a calf that also stood out from birth. Not that he is an accident, but his dam is an Angus Cross cow of Garren's that was to be used for a recip. She didn't stick with her embryo and when "Trailblazer" was born he just had that look, so I mentioned to Garren why don't we leave him as a bull for now, they are easy to take out but pretty tough to put back in. Good decision. "Trailblazer" is a blood red baldie bull with a moderate birth weight from a mature cow. He no doubt has a degree of calving ease but also an abundance of performance. For someone not really as focused on what the pedigree says this is a very smart choice. He also comes in a smooth polled package. We like him, hope you do too.

"Halkirk" is a bull I honestly never paid much attention to until we started clipping. When we sorted off a handful of bulls for the ads I noticed him then and questioned why we never really took note of him before that. This is a big soggy loose made deep sided bull with lots of depth of quarter, superb hair coming from a very high performance cow. Somehow I missed pulling hair on him to see if he was Homozygous Polled as we checked all the Purebred bulls for this trait, and he's the only one we missed. He may or may not be, but he is smooth Polled, but more importantly he is just plain good, and that's the one quality we can't test for but I promise is the most important one.

"Excalibur" has been a great addition to our bull battery. We were in search of a new purebred bull that could hopefully help take us to the next level, and "Excalibur" was the bull we settled on. We have had good success with the "Super Duty" cattle so that was a plus but the true selling feature was his dam, from the famous "Flirt" cow family. The production record of this cow is impeccable, and she is simply flawless. This is the second calf crop for "Excalibur". His sons were well received last year and we are very excited about his daughters that are going to be calving shortly. Look to this bull to add frame, and power while also supplying strong maternal qualities while keeping calving ease in check. He is like the Jolly Giant out in the bull pen and has an incredible disposition as well. He will make them thick dark and hairy.

"Gladiator" is my personal favorite of the purebred bulls. I may be a titch bias, as this cow family has been super productive for us so we just expect it as well, but he's all there. The dam of "Gladiator" is as picture perfect as they come, and she is a full sister to "Empire" who was our high selling Purebred bull a few years ago selling to Soderglen Ranches. Although our purebred numbers are smaller we have really been focusing hard on establishing a core of cows to build around. This is a cow family that has been very reliable for us and we would love to have many more just like them. This is a tremendous bull which I endorse highly.

"Galahad" is the 1/2 brother to the dam of "Gladiator". I can't say enough good about this cow family. They are low maintenance, always breed back early, great dispositions, easy keeping, great feet, and very productive. This little cow has added her share into the bull pen, with sons going to Kevin Olmstead, Galas Stock Farms, Ferrybank Colony and the above mentioned "Empire" to Soderglen Ranches. Each of her daughters has been retained for our own herd, to develop a strong cow family in our purebred division. This is a very good bull that should sire both great steers and replacement females. He will build cattle the feedlots love.

"Moto Moto" is from a cow that Mackenzie showed. Her full brother was one of our high selling purebred bulls last year selling to Trevor & Doug Duke, and they are very happy with how he has continued to develop. "Moto Moto" is an incredibly heavy haired dark red bull that will no doubt continue to get thicker and heavier muscled as time goes on. Tracing back to "Westcott" he may not win many ribbons, but will darn sure earn a lot of dollars as these are tremendous performance cattle that the feedlots love. For whatever reason "Moto Moto" doesn't share the same disposition as his sire and dam, he does like his space, but I do think this bull will develop into be one of the really good ones.

"Hustler" is a little smaller than his pen mates, but very correct in makeup, and should still transmit a lot of performance. For whatever reason he didn't make the same transition his pen mates did from mom to feed, so was a bit slower starting which held him back but he is starting to make a move now. His dam is a powerful female that produced an outstanding son in last year's sale selling to Kelly Battrum. I feel there is a lot more than what meets the eye in "Hustler" and could be an outstanding purchase for dollars invested. Be sure to study him closely he could be a sleeper.

I am a big fan of "Hombre". This is another cow that is as reliable as they come. She seems to alternate bull, heifer each year. Every bull has made the sale pen, and we were finally smart enough to retain a daughter for ourselves, as all the rest have ended up in the production sale. That heifer was "Fantasia" which many may remember as the "Captain Scream" daughter Mackenzie showed at the National YCS show. "Hombre" is going to develop into a tremendous bull that has tons of thickness, loads of hair, will keep birth weight in check and certainly add milk. Keep his daughters they are going to be superb.

"Heatseeker" is a phenomenal bull from and excellent young first calver. We didn't really appreciate how good he truly was until he made his way into the picture pen. This is a thick broad topped mellow made bull with lots of dimension. He has an extremely heavy hair coat, a great disposition, and moves extremely fluently. He is the very first "Red Heat" calf for us, and by the looks of it he is a bull we will use a lot more of in our heifer pen. "Heatseeker" is an incredibly rounded bull that can work in any situation, combining calving ease and growth and complimented by being Homozygous Polled.

When Beagle's had their herd dispersal "Griswold's" dam was our pick of the herd and ended up being the high selling cow. I have really admired the "Accelerator" cattle we have seen over the years, they have been highly productive with lots of performance. This is an outstanding cow, and the mating to "Amber Jack" appears to be very complimentary. We have a full sister to "Grizwold" that we will be calving this spring, and she looks very good as well. Here is a chance to buy a deep red, stout made homozygous polled bull that will offer performance, maternal and an element of calving ease in one very complete package.

This is the very first calf crop for "Matador" and we are really thrilled with them. Daring to be a bit different, "Matador" is a son of the famous "Liner 56U" bull and our old flush cow "Precious" which we owned with LaBatte Simmentals. When we decided to do this flush we were certainly hoping to create a couple females. Barry ended up with 4 bulls and we had 3 bulls, so we thought let's do the next best thing and keep a son. We are very happy we did as we are quite impressed with both his sons and daughters. Look to his sons to add extra thickness, and lots of hair. "Matador" is extremely thick made himself and very easy keeping. There will be added longevity in this pedigree, with great performance and extra maternal. A very well rounded bull that will highlight the best traits.

We purchased the dam of "Harold" as a bred from Triangle Stock Farms. We have really wanted to step up our game in our purebred division, and felt this is a female that could help get us there. Going back to "El Tigre" is a plus in this beautiful cow who is as thick and broody as they come with flawless udder attachment and a beautiful disposition. "Harold" has that same laid back attitude. He is a bull I grow to appreciate more and more each day. I love the skull structure on this bull. He is designed to be a feed converter with a big muzzle like a scoop shovel. He's just so loose made, deep, broad and heavy muscled. A feedlot full of his calves will do nothing but make money.

We have always really admired the "Charo" cow family, and Mackenzie was fortunate enough to get the dam of "Hero" via Lewis Farms gracious donation to the Simmental Foundation of her. "Hero" appears to have a typical "Matador" stamp of being very thick loose made and hairy. I have been really impressed with how well these "Matador" calves have been coming on as a group. I think you can appreciate with the time of our sale they are still basically babies when we start doing sale prep, picturing and cataloging. In this last month as a sire group this set of calves has really started to make a big move collectively. That says a lot to me as they should do the same in a feedlot environment. These bulls are grown out. We could make them a lot bigger but we choose to develop them in this manner to ensure they last. As I said as a group they have some gas. This is a solid bull.

Here is another big red baldie bull, with tremendous length great hair, and the same laid back disposition as his litter mates. "Higgins" comes from a big power cow who always puts a very marketable calf in the pen. Her son last year sold to Randy Chubak, with other siblings at Rachido Ranch, Holt Agri, Jordan Livestock, Waldron Farms, Dwaine & Ursula Miller, as well as our own herd. A very proven track record on a great old cow. "Higgins" will be a bull bought right and fit into anyone's budget. There is good value to be found here.

"Haiti" is the last of this years red bulls and a pretty darn good one to wrap things up. His great grandmother "Macenta" was a favorite cow around here and was a cow we built a nice cow family around. She was a "Robin Hood" daughter, a bull I don't think necessarily was recognized for all the good things he did. We had several of his daughters over the years, they were extremely fertile low maintenance cows that always moderated birth weights and weaned off big marketable calves. "Haiti" is a bull that exemplifies these same great qualities and will add another dimension with "Matador" being his sire. An extremely useful versatile bull.

"Ground Break" will be the last of Mackenzie's bulls in this year's sale. If someone is looking for a homo polled calving ease bull you may have just found him. He is a very smooth fronted bull that should calve exceptionally well either on cows or heifers, and give you the added chrome you desire. He is also backed by an exceptional cow family as his grandmother was part of the donor pen at Lewis Farms. I'm not going to tell you he is the biggest in the pen or the highest performance bull you can clearly see he is not. Use him for what he's designed for and you will absolutely love him.

"Home Brew" has the distinction of being this year's top performance bull. I have loved this big monster from the moment he hit the ground. His dam is one of my favorite black cows, and I think her mating to "Matador" was without question the way to go. "Home Brew" will sire those big growth steer calves that will top the local market. If you want to use him on a set of cows with a heavier British influence he will absolutely shine while smacking that big old money stripe on them. He is one of only two bulls that I did get registered as scurred as we typically enter all the polled calves' information at birth and don't discover who is polled or scurred until after we clip. Regardless if that is important to you or not the important thing is this is a performance bull that will sire big growth calves that will pay a lot of bills.

"Gonzales" is a full brother by blood to "Higgins" (Lot #102) these cows are not twins even though they are both "W" models, one is a January one a December, but they are the only two cows in our entire herd I have to read their tags to know who is who, they are identical. They are also identical in their productivity. She has offspring at Diamond B, Roy & Dariel Sroka, George & Gail Slusarczyk, Trension Farms, as well as last year's son at Jett Dairys, not to mention a couple daughters in our herd. Highly productive, highly fertile. "Gonzales" will be a great choice.

"Husaldo" is one of my favorite black calves. His brother in last year's sale selling to Charlie Kessler was an absolute standout. This young cow can produce alongside the best of them. "Husaldo" has been a calf we have noticed right from birth. He is very sharp and attractive looking, but when you really break him down there is really nothing to change on him. A bull that will work great on a set of cows to add performance, calves will work well in either the replacement pen or the feedlot, and you will likely want to pen him in the front yard for the neighbors to see because he truly is a cool guy. You too could be a cool guy if you owned him.

I am extremely pleased with the black bulls we have presented this year. I think the best endorsement on "Concord" is every fall at weaning we get Uncle Stan to come look and get a set of unbiased eyes on the pen and see what he can spot that he doesn't like. This was his favorite of 130 bull calves at weaning. I think that says a lot as we truly value his opinion. "Concord" has a modest birth weight coming from another top end "Superior" cow. She is a cow we have just come to expect good things from, and going back to our "Painted Smile" cow family. I expect big things from this bull. He is the only "Captain Scream" calf we had this year and he truly didn't disappoint.

Commercial Heifers

We will offer two groups of commercial replacement females. This year Mom & Dad celebrated their 57th wedding anniversary so they decided they should cut back. We convinced them instead of just selling their heifer calves in the fall to hold them for the bull sale, as this is an outstanding group of heifers. Anyone wishing to add some top end commercial heifers into their cow herd or want some heifers that will make phenomenal recip cows here is a great opportunity. Their cows run with our herd, under the same management and health program. These heifers will have the exact same health protocol as the bulls in the sale, and will be palpated before the sale to ensure breeding soundness. Most of the heifers are polled. A few were born in January most are February calves. (Lot #109 is from mature cows, Lot #110 from first & second calvers). We have listed their sires so you can keep track of genetics for your own records if required. Buy these heifers with confidence as they are composed of many years of great cow families.

TERMS AND CONDITIONS

Terms: The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

Delivery Options:

- A \$100 off your purchase if taken home sale day.
- B Delivery will be made to purchasers in central regions in Western Canada, at the convenience of Anchor D Ranch, and buyers risk. Any bulls going to Eastern Canada or other areas Anchor D Ranch will arrange for trucking at cost.
- C Bulls can be left free of charge until April 1, 2021, after April 1 a fee of \$4.00/ day will be charged per head. Cattle are then asked to be picked up by the purchaser, and Anchor D Ranch asks that all bulls left, to be insured.

Certificate of Registry: After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

Fleckvieh Status: All Fullblood bulls will be assumed 100% Full Fleckvieh, unless recognized differently in the catalogue.

Full Fleckvieh Fullblood will have a minimum of 5 generations in their pedigree all back to Germany or Austria. It is recommended if further research is required to check with the Canadian Simmental Association, and no assumption of Fleckvieh heritage will be guaranteed by neither consignor or the CSA

Breeders Guarantee: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales staff, auctioneer or Anchor D Ranch or consignors assumes any responsibility in the matter and disclaims any liability, legal or otherwise in the event of accident or loss or property.

Fertility & Health: All bulls have been under a full herd health program, under the guidance of Gull Lake Veterinary Services. All bulls will be fertility tested prior to the sale. Should you have any questions please give us a call.
