What a way to dive into the sales run out West, with a new event hosted by two of the most progressive operations in the purebred business. The Noble and Payne families are a natural fit for their forward minded approaches to building their programs, unwavering focus on quality, and of course, mutual love of a good time. A sale name rarely rings more appropriate than this one, as these programs have grown in recent years and matured and evolved in numbers and quality to allow the opportunity to share this set of females and genetics with the industry.

For an inaugural sale, these programs have pulled out all the stops to offer their very best and make it a memorable event. We encourage everyone to stop in for a tour prior to the sale and guarantee it will be time well spent. The farms are located nearby each other and the amount of quality in a close geographic area is quite amazing. With a focus on cow families and aggressive ET programs built around those best individuals, you can see for yourself the caliber and consistency of the sale females as well as their full or maternal siblings in the bull pens. These pages are littered with future donor females, along with exclusive, breed leading semen and embryo packages that Black Gold and Greenwood believe in and are utilizing themselves.

The Black Gold program is anchored by their famous Fleckvieh and fullblood herd and they have dug deep to offer the eleven top bred females from this group. Each fall the Noble bred females are some of the most sought after of the sale season and go on to perform for their new owners. The Nobles have aggressively built their purebred program around some of the breed's best sires and donors and the results are staggering. The open calves are as elite as you can find and the sale timing is ideal to enjoy a fall with your new show prospect. The purebred bred are complementary to the calf offering, with some different and unique genetic twists and are bred to offer strong return on their first calves. The Angus program being developed by Black Gold and Chelsie is everything you would expect, as they have settled for nothing but the best in the females and embryos they

have acquired. Despite a small Angus herd, they are still offering up their best here and they will stand in with any Angus females offered this fall. Finally, do not miss the frozen genetics from Black Gold, as they represent the best that can be made, with unique pedigrees, sexed options, and exclusivity - these are absolutely not ordinary and they represent where the program is headed.

Greenwood has built an elite Angus program as quickly as you could ever think was feasible. It goes to show what is possible in this business with talent, focus, and investing in the best genetics available to build from. Greenwood is always a player for the best females and frozen genetics offered in sales, and their foresight has paid off big time. This group of Angus females and genetics is exceptional. Just look at the famous cow families that we see them exhibit and market each year - consistently great cattle going back to Tibbie 28Z, Beauty 6R, Tibbie 22C, Black Angel 1299, Lucy 1373, Essence 17T, and on - those great cow families always reap rewards. The opportunity to partner and work together with Paynes on the untouchable Tibbie 28Z daughter is an intriguing investment, as are the group of bred and calves that is littered with show prospects and future donor females. The exclusive Sooner semen on offer represents a big time calving ease bull that still has power to spare and awesome cows everywhere in his pedigree.

With the return of live events, we encourage you to start planning your visit east of Lloydminster to take in this exceptional group of cattle backed by great people. Whether you are an Angus or Simmental breeder, the Evolution is your opportunity to get involved with these programs, work together with the Payne and Noble families, and acquire animals or genetics to move your program forward. So take a Thursday afternoon and evening to see the offering, enjoy the steak supper, and take in the 6PM sale. We know the hospitality and post sale social will be legendary. If you are unable to attend, please reach out to any of the BMS staff, as we are closely familiar with the sale offering and our entire team will be present for the sale and ready to assist in any way.

BOHRSON
MARKETING SERVICES

Well if I'm going to be completely honest, planning and organizing our first ever sale has offered both its challenges and excitement. To throw in a rather dry few months across the prairies, definitely adds to the challenges we have faced this past summer. But if there's anything we have learnt in the past sixteen months, it's that us people in agriculture, despite the adversity we face, find ways to push through and keep moving forward. Our daily chores and challenges we face don't shut down because the rest of the world is on lockdown. We continue to strive to be better and feed this world, that seems to rebel against us more and more each year.

When we finally decided to make this dream of having a sale a reality, with our good friends and partners at Greenwood, we knew the quality we would have to bring to the table. Jayden and I have had several discussions over the past couple years about what we thought our sale would look like, and our main focus was "we both have to bring our best". We couldn't be more excited to have a sale partner like the Payne family. Their passion, aggression, and commitment to high quality cattle of any breed is truly inspiring and overwhelming. We really liked the idea of a multi breed sale, as it brings different people together from all over, with different targets and goals for their operations. We feel this sale is also a unique option for breeders like ourselves and Greenwood, that are not only committed to just one breed.

We really liked the idea of having an early October sale, as we feel it gives us the opportunity to sell cattle that are an accurate representation of what they should look like in their "working clothes". It also offers a large gap from sale day to the bred females calving

dates, which should limit potential calving issues. All of the cattle in the sale have been developed on a high protein pellet and a grass/hay diet up until sale time. We truly feel that the offering we have assembled for this sale is top notch. Daughters of several infamous donor cows and exclusive sires will be on offer. An aggressive E.T. program allows both us and Paynes to offer some sisters that we feel highlight the quality of their powerful donor dams. Several of the bred females in this sale will be bred to exclusive, high selling bulls such as NAC Battle Cry and Brooking Sooner.

We strongly encourage anyone interested in the cattle to reach out to any of the contacts listed if needed. Better yet, come and tour the cattle for yourself anytime before October 7th, at either Black Gold or Greenwood. We also would like to mention of a very high quality sale on Friday, October 8th, that will take place at Anchor D Ranch near Rimbey, AB. The quality of the cattle and people will be great as always. We are excited to be working with the Bohrsen Marketing crew and their whole team for our sale, so feel free to reach out to any of them. We look forward to visiting with you and we will see you all at the farm on October 7th!

As we discuss our options for Lot 1 in the first ever Evolution sale, 143H is one that rose to the top pretty fast. For starters, this is the exact kind of colour, pigment, and hair coat that we have been trying to breed in our Fullblood cattle for as long as I can remember. Looking past that, you'll find an extremely powerful, long bodied, heavy structured Stuey daughter that looks to be setting down a great udder. 23Z was a past high seller from the respected Wells program that was purchased by Josh Rust. Her foot, udder quality, and overall easy doing powerful body shape is impressive to say the least for a "Z" model cow. Bred to an ultimate favourite around here, Battle Cry, we expect the ROI on this female to be second to none.

Our Fullblood offering wouldn't be complete without a daughter of our powerful 3W donor. 3W is one of the best looking cows on our place regardless of any colour. Her overwhelming depth of rib, awesome udder, and correct foot suggests if she was a solid colour, she probably would've seen the show ring at some point. She raised our 2016 high seller, Black Gold Crude, selling to Virginia Ranch for \$67 000. 186H is another long spined, attractive, sound structured Stuey daughter that we would be excited to see in production due to her potential brood cow attributes. We can't say enough about this cow family, as again this year one of our favourite bulls in the pen would be a 3W grandson.

Our Whisper x Stuey combination has resulted in several of the top cattle we have raised over the past five years. Whisper is responsible for cattle in the herds of Anchor D Ranch, Mark Land and Cattle, Robb Farms, Circle 7, and many more. 105C herself is a full sister to Black Gold Epic, that has done so well for the Skeels family. 55H is a blood red, heavy muscled, deep ribbed heifer that steps down on a large foot. Whisper 930W is now deceased and her genetics are getting harder to come by each year.

A polled Stuey daughter here that is a spitting image of her dam. 33D is a moderate framed, easy doing, near perfect uddered cow that we purchased from the Virginia program. We expect 8H to be very similar as she looks to be setting down an awesome udder and very good hair coat. In our 2021 bull sale our 11 Battle Cry sons averaged just over \$17 000, all of which were born off first calf heifers. I would expect a good haired, solid coloured calf off of this mating.

Our last Stuey heifer in the catalog but one with a really good cow family behind her. A full sister to 118H raised our leadoff heifer in the Border City Sale last fall, selling to Mark Land and Cattle for \$26 000. She currently has one of our top heifers again that was slotted for the replacement pen this year. 118H is an honest heifer with the right kind of body shape, performance, and colour. Stuey no longer walks at our place and this will be the last large group of daughters that we will ever offer. His semen is off the open market and small amounts will be only sold in select sales over the next few years.

All year long we said we needed to sell our top Battle Cry daughter, especially after the success we had with his sons this past March. 17H has been labelled as just that all year long and she is an exciting female to see the least. So much mass and body in this female that we would label as easy doing, although that might even be an understatement. 59F goes back to one of our favourite cows, 38W, who was a big bodied, powerful female with a very good udder and perfect feet. She raised several bulls that sold through the bull sale, including our high seller in 2015 selling for \$26 000. The daughters and granddaughters we have off 38W are quickly proving to be some of our top producers. 59F's 2021 born bull is a favourite in the pen this year as well; we look forward to getting more easy doing, deep bodied, powerful females off of this cow very similar to 17H.

**DAM****SERVICE SIRE****8****BLACK GOLD *Hotchellrae* 54H**

Fullblood - Hetero Polled - CLNO 54H - 1332817 - Jan 12, 2020

I'm not sure how many times I heard dad say that we aren't going to sell this female over the past year. Well luck fell on our side this past spring where we were able to make 17 full/maternal sib embryos, and that is the only reason 54H is offered for sale. This cherry red, perfect coloured female has been admired ever since weaning last fall. We are huge fans of her dam 58B, so that maybe helped put a label on her daughter. In 2017, a 3/4 brother to 54H was one of our high selling Fullblood bulls, selling to our friends the Tatarin family of Rafter 4T. That bull has since gone on to raise a great set of sons in their bull sale, and will sire all five of their Border City consignments selling this fall. Back to 54H, for us she's an ideal Fullblood female that combines the right kind of body shape, power, structure, hair, and colour. One of the negatives to an early sale, is some of the cattle haven't had time to hair back up at the time of pictures. 54H had a very thick, awesome hair coat this past winter and we would expect the same of her again later in the year. A definite feature in our offering.

Another daughter of our Bryck 73F bull, who was a high seller for us in 2018 selling to the Kushneriks of Spruce View Acres. We have sampled 73F in our AI and ET program over the past couple years, but he seems to see heavier use each year as we become more and more impressed with his calves. Bryck 73F's dam is getting flushed here at the age of eleven and is still near perfect footed and an impressive female that doesn't show her age. 79H is another good haired, good coloured, thick ended female that looks to be setting down a good udder. 157E is an ultra powerful cow with a very large strong foot and good udder. Her first son was a feature calving ease bull in our sale selling to Wayne Fleming.

**SIRE****10****BLACK GOLD *Ms Twist* 216H**

Another Twister heifer here that offers the same kind of muscle and body mass. 92H is a bold ribbed, wide topped female that steps down on a large foot. Her dam 99A, has been a very good producer for us. She raised a daughter selling to Riley Chalack of Ultra Livestock, and a son going to the purebred herd of Antrim Simmentals in Manitoba. She's a large bodied cow with a good foot and ideal teet and udder size. 92H is bred early to our \$165 000 Reputation. We are extremely impressed with the calving ease and performance of our Reputation calves, and are excited to showcase his first set of sons in our 2022 bull sale.

KINDRED SPIRIT MANDIE 1Y

9A is one of our best polled Full Fleckvieh donors and a consistent producer. Her massive rib shape and body mass, good udder, and big square foot are some traits we admire about her. Combine that with a great track record and she found herself in the donor pen this past spring. We don't flush many Fullblood cows, so when we do it's because we think we really need to utilize them more in our program. In 2019, 9A's daughter was one of our highlights in the Border City Sale, selling to Starwest farms for \$17,000. That is still one of our favourite breds we have ever sold, and I'm pretty sure that female had a Battle Cry heifer her first year that couldn't be pried away from Crystal. Needless to say, we have a lot of confidence in this mating and look forward to put more 9A eggs in this spring.

A definite sale feature is this powerhouse of a Frontier daughter that has been a favourite of many of the early visitors. 14H is overwhelming in terms of body and power; a heavy structured female that steps down on a large foot, and is very attractive when you study her through her head and neck. 515C is a huge volume cow with an ideal udder. Since she's been here she has always calved in the first cycle and is a cow we never have to worry about breeding a second time. She raised a Red Rocket daughter selling to Derek Westman of Westman Farms in the spring of 2020. She calved here in 2021 and is no question one of our best looking first calvers. 14H is bred to Approval 71E who has been a mainstay in our AI program whether it's on heifers or cows. We expect big things from 14H in the future and see her breeding to Approval as an awfully exciting one.

A very intriguing heifer here that catches your attention with her up headed presence and attractive look. We often get asked if we cross our fullblood and purebred breeding programs. We do at times and high quality, white faced cattle like this are one of the main reasons why. 221H is a long bodied, sound structured, good footed female that looks to be setting down an awesome udder. 221H is a younger heifer that bred early to one of our high sellers out of our 2021 bull sale. Approval 51H is an impressive calving ease bull that we were lucky enough to retain an interest in. We look forward to using this large scrotal, hairy, good looking bull in our heifer pen for years to come.

A dark red Limitless daughter here with an attractive look up front. 233H is a sound structured, big ribbed, up headed female that again looks to be dropping a perfect udder. There is no doubt in our mind that Limitless daughters are going to be consistent with awesome udders, a solid foot, and extended front one third. In 2019 a Limitless daughter was the highlight of our fall sale string selling for \$55 000 in the Friday Night Lights sale. 233H is again bred early to our Approval son 5IH, and we would expect a dark red calf off of this mating.

Very few times has there been an opportunity to purchase a direct 532C daughter, but the Evolution is your chance. We cannot say enough about 532C and the job she has done at our place. She has surpassed \$200 000 in progeny, as her twelve sons sold over the last four years have averaged \$19 750 in our spring bull sales. 230H herself is an easy doing, big ribbed, heavy structured female that steps down on a big foot and soft pastern. To us, she is very similar to her powerful dam at this stage of the game. She has always had a great hair coat and looks to be setting down a good udder. Black Rebel has been our go to calving ease sire, whose calves seem to grow rapidly and perform very well. His first group of sons were well liked at our bull sale this past spring with two of them going to respected breeders. Bred early to Cobra, the calf 230H is carrying will be closely related to our 2021 high selling black bull, the \$50 000 Coliseum.

A moderate framed, huge bodied, stout featured female that's off of one of our favourite young donor cows. 10D is a big ribbed, stout made cow that steps down on a huge, perfect foot. She's attractive from her shoulders forward and has a good udder. We see a lot of 10D's best traits in 166H, and she offers a less than common pedigree as well. KCCI Exclusive is the past \$120 000 1/2 interest high seller, that impressed me with his power, muscle, look, and foot quality when I saw him in his Denver pen. We were more then impressed with this flush, as 166H's two full brothers sold in our spring bull sale to the purebred herds of Little Willow Creek and Westhill Ranch. A full sister to 166H also sold to JK Bar Cattle in last years Friday Night Lights sale. Again bred to the calving ease king, NCB Cobra, we see the opportunity of a high quality calf coming off of this mating.

A uniquely bred blazed face female that we own with our good friend Braeden Wepler. 202H is a full sister to the promotional sire SFI Savage, and the 2017 First Lady Classic Champion for Wheatland and Schaake's. 202H is a big footed, heavy structured, good haired female with a powerful rib shape. She's bred early to Black Rebel, who again has been an awesome calver for us while still leaving us with a valuable calf. 202H definitely has some neat breeding pieces that should make her fun to breed. On top of that, she shouldn't be related to any of the popular powerful bulls within our breed.

The common question around here ever since we decided on having this sale, is "are you going to sell that big baldy?" For the longest time we didn't know how to answer that question, and honestly didn't really want to. 134J is what we have been striving to breed ever since we decided to get more aggressive on the red and black side of things. Cattle with her kind of power, muscle, body mass, and brood cow potential. Yet it's her ability to combine all that with an extremely flexible build and still a high quality, balanced image from the side that we think makes her unique. Relentless has sired more show champions and high sellers in the US than any, and really crossed well on our powerful Soda Pop. 134J has been a favourite around here her whole life and has never really had a bad day. We are excited to have her and her sisters highlight our first Evolution sale.

This one might of got lost in her sisters shadow early on, but that's certainly not the case anymore. We feel this Soda Pop daughter has as much potential as any. She's extremely striking from the side with an attractive, up headed presence. She's so big and soft in her foot and pastern at the ground and floats around the pen effortlessly. She still has the same kind of powerful rib shape of her two sisters, which makes us excited for her to grow and develop into a cow. We have only ever sold three Soda Pop daughters, where they have averaged over \$40 000 each. This one has only gotten better each day since weaning and we feel her best days are still yet to come whether that's in the show ring or the pasture.

A red heifer out of our 2017 undefeated National Champion Soda Pop donor that has had us excited for a long time. Initially we said we needed to keep her, but with this being our first sale we know we needed to bring the best that we had. The first word that comes to mind when you see this heifer is "power". So much rib, hip, and topside shape in this female that catches your attention instantly. A full sister to 139J is probably our favourite bred heifer that we have ever shown; her show career resulted in reserve divisions at Farmfair and Agribition, and a Reserve Overall banner at Stockade Round-Up. She has since turned into a front pasture donor, giving us 37 grade one eggs on her first flush. An intriguing female here that is outcross to most red genetics.

It was a no brainer for us to incorporate Structure into our ET program considering his success in the past couple of years. This past spring he was the talk of several sales, siring the 150K RF Caliber, 70K Springcreek Structure, and 50K Black Gold Coliseum. 113J is a unique female who is flawless on the profile. Extremely attractive up front, and blends back into a powerful rib shape and maternal sweep to her lower rib. Another heifer that could have a halter hung on her if the buyer so chooses, but I would be excited for what she could do in production. It's a unanimous decision right now in our bull pen who our favourite is of any colour, and a full brother to 113J is winning that race.

We couldn't be happier with how Relentless clicked on both of our Soda donors. 95J is another good looking, good haired, long bodied, heavy muscled heifer that is built good at the ground. We think this female gets better every day and would look good at the lead of a Junior member in the future. Aside from Relentless's countless high sellers and winners, he himself was impressive in the flesh and near perfect footed. His daughters have gone on to make awesome cows too, as one was the dam of our \$50 000 Friday Night Lights high seller last fall.

We were very excited when we had the chance to partner up with Lewis Farms and purchase the Canadian Semen Rights on the \$230,000 Countertime bull. His sire, Right Time, has taken the breed by storm. This past spring he sired another \$230,000 son for Hartman/Freking/Effling and a \$45,000 3/4 blood from Effling's, all while his exclusive semen has brought upwards of \$800/dose. His dam is a full sister to the powerful KCCI Exclusive and one of Kearns most powerful donors. What really intrigued us about this unique stud, were his awesome performance numbers and EPD's. He reads with a yearling weight of just shy of 1500 lbs and a 41 cm yearling scrotal. Under the ASA, he ranks in the top 55% for 15/17 traits; we find that hard to replicate on a bull with this kind of phenotype. We look for Countertime to add performance, muscle, and a rugged build all in a complete outcross pedigree and stellar cow family. Very few straws were used last spring so this is your chance to get it on the ground floor of this exciting young sire. This will be the only semen sold for the 2022 breeding season, semen is stored at Alta Genetics.

Coliseum 140H was the past high selling purebred bull in our sale this spring for \$50,000, selling to the great people of Southpaw Cattle Company. We were fortunate enough to retain an interest in Coliseum and we are sure happy we did. It wasn't a shock to see this bull grow and mature as good as he did, as he's out of our prolific 532C donor who's nearing \$300,000 in progeny sales just off her bull calves alone. Structure has probably sired more high sellers in the past year than any other bull in the Simmental breed. Coliseum himself is a big footed, long bodied, attractive bull who is very fluid on the move. He catches your attention with his up-headed presence, and the way he blends smoothly into a flat shoulder and still powerful rib shape. Throw in an awesome hair coat and there's a good chance that Coliseum will be hitting the show road this coming fall. This is the first and only semen to be sold on him for the 2022 breeding season. We have a lot of confidence in this bull, as he will sire our largest set of black calves this coming calving season.

DSFF COUNTESS 357D
LLSF PAYS TO BELIEVE ZUI94
K-LER/RC MISS HOYA SAXA

A very exciting opportunity here to purchase a heifer calf pregnancy on our triple-crown winning female, Hoya Hayleigh. We are confident Hayleigh is the most unique and impressive Simmental female we have ever owned in on. We find it awfully impressive to possess the kind of added power, mass, and muscle shape she has, but handle it with such accuracy and grace on the move. There is no doubt that we are proud and more than excited about all the winning Hayleigh has done at the end of the lead, but what makes us really excited for her future are her brood cow credentials. She steps down on a very large square foot, and is extremely ideal when you study her feet and udder size and shape. We find her mating to the past \$200 000 high selling Rebel awfully exciting. In the fall of 2020, Udell's sold a 3/4 blood Rebel daughter for \$76 000 that was a favourite of many. We are confident these will be the only Rebel progeny in Canada, and we don't plan on marketing many of Hayleighs genetics for a couple years so take a look at this opportunity! Resulting calf will result in a 7/8 Purebred Heifer Calf. Recipient was sourced from Trans Ova Genetics.

Lucy 1H is a female that has impressed visitors all year long. That probably has to do with her such easy doing fleshing ability, as this one seems to never have a bad day. 1H is a moderate framed, huge bodied brood cow prospect that looks to be setting down a near perfect feet size and placement, just like her dam. Lucy 7E was Chelsie's pick of the heifer calves at Angus Collection in 2017. She grew even more fond of her when she raised a \$10 000 son her first year in production. A maternal sister to Lucy 7E topped the Agribition sale in 2019 selling to Ter-Ron and Wilbar for \$22 000. The early service to Renovation should make for an exciting first calf.

A pair of ET sisters that we have been high on for quite some time. So much rib, body, and mass are found in these sisters who step down on a solid foot and ideal structure. Division 86A has been consistent in raising cattle with the kind of power, look, and build that these sisters possess, and does so with an awesome udder underneath her. We don't have too many angus cattle around here but we have sure tried to be critical in choosing the genetics we use. If we were positive we wanted to grow our Angus "division" we would be keeping this pair of sisters. But for now, we just enjoy being around quality cattle of any breed, and think these two sisters fall under that category.

GREENWOOD CATTLE

We've all heard the stories of what the Greenwood production sales used to be, now whether these stories were about quality cattle or quality entertainment we're not sure... regardless, this year we've decided to offer an elite group of Angus females to leave the same lasting impact.

As Toby mentioned, the discussion of this sale has been a long time coming. We truly could not be more thrilled to partner with the Noble family for this event. After convincing each other to venture into each other's breeds, we decided the next step was to start a sale and offer up what we believe is the best we have. It is difficult to offer females of this caliber while still improving and building our own programs from year to year. Extensive embryo work with breed leading donors makes this a possibility.

We back our program 100% and believe that we have an offering with something that could fit anyone's program. All of our open heifers are nicely halter broke and ready for a junior member to hit the show road as well the bred females are tie broke. The cattle have not been pushed on feed and come in a realistic package.

While it is a busy time of year for everyone, We encourage you to come to the sale or visit us prior too. We are 5 minutes from Lloydminster if you're passing through and Blackgold is just 20 minutes further down the road. Please contact us with any questions you may have on the offering or the sale, we're more than happy to talk cows and would like to help you find what you're looking for. Thank you to everyone who makes this event possible and to our customers and friends. We hope to see as many of you as possible on sale day.

AI Bred to Brooking Sooner on May 13, 2021 (SAFE) // SELLING 2/3 INTEREST. NO POSSESSION.

Since it's the first Evolution sale and we want to make it a memorable one. We let Scott and Taylor go into what we might consider the untouchables. We like to offer our best but we always said we'd never sell a daughter of 28Z until we had at least 25 of them milking. Now here we are with 3 milking and somehow one for sale. 51G has been a standout from a young age. Had we sold a pick of our heifer calves, breds or now cows I assure you she would have made the top of the list. She's always had "the look". She's elegantly designed through her front third, massive in her depth of rib, stout from the back over her hips and overall powerfully constructed. She has the picture perfect udder you'd expect from Charlo and 28Z. We took this picture the day 51G came in from pasture for weaning on a less than ideal year for grazing.

For a 2 year old to raise a calf and maintain body condition like this is ideal. Her dam, who has become the anchor of our growing Angus herd, hasn't done anything wrong in her breeding life. She has averaged \$19,000 on her first 6 sons sold; including the \$31,000 Game Night to Lewis Farms, the \$30,000 Honor to Vee-Tee Angus and the \$25,000 Gunslinger to CMT Farms. If you're looking for the donor that can take your breeding program to the next level this is one you will want to study hard. Direct Charlo daughters aren't in abundance in Canada and 28Z is a true matriarch that anyone would want to be a piece of.

The new owners will receive 2/3 of embryo production with split costs. Natural calves will be split 2/3 to Greenwood. 1/3 to the new owner with no expenses.

A fault free type of heifer, this picture probably doesn't do her justice. She's square made with a big hip and ideal back leg. She's awesome headed and maternally focused. Her dam has been a knockout from a production standpoint averaging over \$10,000 on 5 daughters. This one was part of the keeper pen but we are digging deep for this offering to create some excitement around this event and truly offer our best.

A big time donor prospect with a pedigree built of Maternal Royalty. The Natural Law X Density combination takes out any guess work of what kind of cow this will be. 6R is one of the great angus donors of her time with numerous daughters backing many programs including 5 direct daughters here that give us the opportunity to offer a female of this caliber. Her udder development is near perfect, her ideal head and sleek neck make for an elegant design. It took a matter of two minutes to capture this picture as she always has your attention and moves around the pen with ease and confidence. Her full sister sold as a feature lot in last year's Angus Collection for \$17,500 to Indian River Cattle Co. and Darbie Angus. The service to the rare Sudden Look is an added bonus and ideal combination.

Here will be one of the first Tex Playbook daughters to sell in Canada. An attractive made female in a moderate package. She has great feet, she's developing a square udder with short teats and has an attractive look about her through her head and front end. Her dam was our selection from Merits as their high selling female in 2018. She's turned into a sweet young cow with a wicked udder. This is her first progeny and one we feel will make a very profitable cow for her new owner.

Here's a moderate tank in an elegant package. Sired by the 2018 double supreme champion DMM International. 6H is deep ribbed, smooth shouldered, and developing a sweet udder. We purchased her dam out of the Brooking invitational for the same traits we see in 6H. Her dam has been an awesome herd bull producer with a granddaughter selling in the sale for Chelsie Christensen. This one will make for a quick Return on Investment with the early service to Sooner.

These Attractive daughters are shaping up to make great cows. 53H is a female with lots of style and power. She's clean in her lines and comes out of her shoulder into her neck and head very sweet. The Dam of this heifer is a cow we admired enough for her udder and milking ability as well as her perfect feet and maternal qualities that we had to flush her. The progeny from the flush exceeded our expectations giving us 3 bulls for our bull sale and more for this years sale as well as 2 awesome heifer calves. Now we get to offer these calves as impressive bred females and give someone else the opportunity to own a hard working cow like 91W that will make you money.

One of the first Powerplay Daughters in Canada out of the high selling female from the Krebs Ranch dispersal. This is a big power female with a huge amount of volume. She sells alongside another maternal sister that compliments her very well. She's gonna be a herd bull producer with a sweet udder. Her dam is praised for ideal feet and udder structure as well as being a phenotypic gem. 65H's epd tabulation is as good as you will find in Canada and crossed with Sooner makes it even more interesting number and pedigree wise.

Another Showman x 22C that's got everything going for her. She's tremendously long bodied, big topped and heavy muscled. The neck extension and front third of this female is hard to obtain while having this much power. Her full brother; Greenwood High Class, who we plan to campaign this fall was the \$54,000 high seller of our bull sale to Nordal. Another full sister was the high selling heifer calf of Angus Collection this past fall for \$25,500 to Black Gold Simmental. We plan to work together with Black Gold, where she will become a feature donor for our program. Showman is etching his way into the history books at a young age after one of the most ever talked about set of sons to sell in a spring bull sale season. Now here's an opportunity to own a high caliber daughter that will be a part of the first group of milking daughters.

This female falls into the big leagues category. She's one most would never consider selling but we're laying it all out for the first ever Evolution. This is the kind you can confidently build a herd around. She's a full sister to two of our past high sellers and part of the same flush that's been as successful as any for us. 82H is powerfully constructed front to back while remaining feminine and fresh looking. She's got very good feet and is developing an awesome udder. If you wanted to show a bred female or cow/calf pair this is one you'd hope to bank on. She carries herself so well on the move and demands your attention with every pose. Her sire, Showman needs little introduction as he is one of the hottest bulls in recent years in Canada. His semen has averaged over \$1500/straw. Her dam 22C was a favourite Donor of ours and Hamilton Farms before we sadly lost her too young. 22C was a highly fertile, impressive uddered tank of a cow that grossed us over \$125,000 in progeny sales in only a few short years. This daughter has all the components to do that and more. Here's a big time donor prospect that's worth your time to come see.

Here's a lethal combination of cow power with the likes of Black Angel 1299, Rose 918 and Madame Pride 0151. This bred is a tank with a massive swoop to her belly, plenty of muscle shape and an overall attractive package. She's developing a perfect udder just like her dam's. This is the kind of female you wish you had a 100 of, easy doing, easy to look at and easy to market. A maternal sister sold in the Angus Collection to Piechel Farms for \$8500 and a maternal brother is a top calf in the bullpen this year. Here's one we feel you could really build around and find her a place in the donor pen.

These 3 full sisters have been standouts of our calf crop from the beginning. We are going to let you pick and choose and happily keep the heifer that isn't taken in the first two selections. Their dam 373A has been a no miss producer since we purchased her as a feature lot from the Power and Perfection sale at Agribition. A 3/4 sister to these heifers sold for \$23,000 to Ter-Ron and Wilbar. Two more maternal sisters were feature calves in the Angus Collection selling for \$14,750 to Dudgeon Cattle and \$10,500 to Chelsie Christiansen. 373A is a power cow with a big top and tons of depth; while still remaining attractive and pretty through her front third. Range Boss has been proven time and time again to make very correct females with perfect udders. His semen has commanded upwards of \$900/dose. These calves are long bodied, sweet in their lines and ideal fronted and headed to make very maternal cows. You could hang a halter on any of the 3 and be very competitive and better yet you'll have a big time production cow at the end of the day. We all pick these heifers a little different so we will let you decide come sale day.

Sooner was one of the top calving ease sires to sell in Canada this past spring. When we had the opportunity to Partner with Lewis Farms and Rocking Heart Ranch we had to get him bought. The demand for a power calving ease bull like Sooner was obvious after commanding \$45,000.

His pedigree twist on the top side along with a beautiful renovation daughter on the bottom made him even more intriguing after seeing him in the flesh. He is very long in his skeletal design while remaining thick and full from front to back. He's really smooth in his lines yet powerful and expressive in his muscle shape. His actual data compliments his impressive epd spread and puts this finishing touch on a package we consider to be a big time herd bull that will work on both heifers and cows.

This will be the only semen offered for the 2022 spring breeding season.
