

JAYMARANDY LIVESTOCK

BULL SALE

April **3-4** *2023*

ONLINE WITH DLMS FARM GATE TIMED AUCTIONS

JAYMARANDY LIVESTOCK

the **MOTTO**

Committed to excellence in beef cattle production.

the **PLAN**

To continue to make a daily decision to improve our cows based on soundness, structure, udder quality, mothering ability and phenotype.

We transitioned to the Angus breed because I have always wanted to make cows look and function a certain way. Specifically, the cows. I wanted a herd of beef cows that I can look at, and appreciate what I am looking at regardless of which cow family they originate from. The herd is getting there, and I appreciate the opportunity to work at it every single day. This includes when they have big healthy bull calves at side. A large contributing factor in our selection criteria, to execute THE PLAN, is a Dam that checks all the boxes.

WELCOME

from
JAYMARANDY LIVESTOCK

Greetings cattle producers. Again, I would like to thank you for taking the time to read and view through our 2023 Online Bull Sale catalogue. I am pleased to say that we have grown in offering size and I believe we have also maintained the high standard of quality that you have come to know and trust. The sire groups we have available are plentiful, group sizes are smaller yet the feeling is as individuals they are simply great. The lead off bull, The Lion, has found numerous friends this year at the 2 outings he had in the show ring. Shown twice receiving the Reserve Champion Bull at the Manitoba Angus Gold Show and a Division Champion at Canadian Western Agribition. He is truly an impressive individual and the viewership from several countries and many different breeds let us know this with many being very complimentary toward him. From the first lot to the last lot I believe they have plenty of positive to offer. Our female focus is on phenotype, calving ease, soundness and udder quality, a maternal focus. Make no mistake, we do our best to maintain the muscle shape, the center mass and the power that has been our focus for 40 years. I believe if you make the females right, the bulls will come the right way. The bulls are good and stout with balanced profiles, are sound at the ground as an entire group and will be talked about more in their individual write ups. To maintain this maternal focus we occasionally reach deep into the past and pull out sires that are known to be a great cross of female maker and commercial pound producer as seen in tag 132K. And, occasionally we get the opportunity to offer really neat and new pedigrees into Canada that few others will offer, as you can see with tag 127J. You will also see several bulls raised in our program that are being returned into it. It is very intriguing when we see just how well that they can produce in comparison with the sires of past and present.

This past fall we began our own online female sale dubbed Jaymarandy Livestock Finest Female Sale. We put our best stock into it, bred the way we like them and were very well rewarded. We sent females into reputation programs on both sides of the border and into several Canadian provinces. We are appreciative of the attention the live cattle and embryo

lots received. Several of those same females are siblings to the bulls and went on to be very well received at Canadian Western Agribition with stall traffic and show ring success. Of course this is highlighted by the Jaymarandy Georgina 103J female being Reserve Division Champion of the Senior Yearlings. Tags 128J and 129J extend from this very cow family and are really neat individuals.

The industry is down in numbers as a whole in North America, the market is strong, is riding a really nice high and it is still as important as ever to keep your quality at the top. Be aggressive in your breeding approach, own the “fancy” and big ones at the stock yards. Or, if you dare, spread your wings and take on new farm direct beef sales. There is a demand, people want a trusted food source. People want to know the face of their food suppliers. Be aggressive, feed a few, hang some carcasses, find out how your product measures up. We are and it is a very eye opening experience. Look into new opportunities with Genomics, EPDs etc but never, never forget the true stockman’s tool that you have had all along, your eyes.

Respectfully,
Mark Angus & Family

TERMS AND CONDITIONS: All cattle sell under the terms and conditions of the Canadian Angus Association and Canadian Simmental Association.

If you have any complications please contact Mark immediately. I will do my best to get you a functional bull in a timely fashion or have a credit applied to our next sale if it is resulting from an origin based complication.

SIGHT UNSEEN PURCHASES: If you are unable to make it too the farm prior to the sale we can discuss your needs for bulls and the bulls will be as we discuss them to be or you will not be required to follow through with the purchase. However, we do provide photos, videos and a Management and Consulting company to assist with any purchases. All bulls will have hoof photographs available upon request from Mark.

SEMEN TESTING: All bulls will pass a semen test by 14 MOA. Jaymarandy Livestock guarantees bulls to not only pass a semen test but to also mount and service cows and heifers. Fertility testing is provided by a member of the Beausejour Animal Hospital large animal staff. If you have any questions or concerns you can contact them or Mark directly.
Beausejour Animal Hospital: 1-204-268-2177

CARCASS EVALUATIONS: Ultrasound service provided by Windy Ridge Ultrasound, Raymond AB. 1-403-330-3000
will be provided on a supplement sheet prior to sale day
Contact Mark with inquires.

GENOMIC EVALUATIONS: Provided through Angus GS and CAA

FRAME SCORES

All bulls will be put through the chute and measured twice and the average will be used and is calculated with the American Angus Association Frame Score Chart.

PERSONAL SCORES AND EVALUATIONS

DAM'S DOCILITY AT CALVING

We have developed a dam's docility at calving score as we pride ourselves on breeding bulls with highly maternal pedigrees and as such expect customers would want to understand what the potential replacements will be like to deal with as cows at calving time. Personally, I will cull a cow based solely on temperament regardless of how well she produces. Our children are often in the pen with cattle and the cows had better behave or the cow is gone.

- 1/5 - Poor demeanour and sells with the calf in the fall.
- 2/5 - Best managed in a later calving interval and best managed out of a barn.
- 3/5 - Cow is respectful but calf is best managed on its own.
- 4/5 - Regular handling of calf in presence of mother but aware of her.
- 5/5 - Regular handling of calf in presence of mother with no concerns.

CALVING EASE SCORE

- * Cows only
- ** Cows and larger framed heifers
- *** Heifers

Feed and exercise program: I have a fairly simple philosophy when it comes to feeding. They are fed for longevity - Grass hay with oat silage and moderate supplementing with energy based textured ration from Trouw Nutrition. This combined with 3 weeks of creep feed whole oats pre-weaning to assist in maturing the gut lining. Post weaning, the bulls are hand fed whole oat grain while on grass to continue to mature the gut lining. After 30 days the bulls are moved into a 6 acre paddock and fed for the winter. This provides a sensible volume of feed and allows for the bulls to have plenty of ground to exercise.

VALUE ADDED PROGRAM:

- Free board of animals until April 15/23
- Fusoguard (foot rot vaccine) x 1 shot plus 1 booster.
- All bulls vaccinated with Bovi-Shield One Shot and Covexin Plus in spring with a fall booster of Bovi-Shield Gold and Covexin Plus. Again, Bovi-Shield Gold and Covexin Plus prior to delivery,
- Longevity fed bulls

TRANSPORT SERVICES

Transport of live cattle in Canada: Jaymarandy will assist with logistics of all live lots selling. Please make arrangements with Mark after the sale.

Transport of live cattle in USA: Jaymarandy Livestock will perform all appropriate testing with Beausejour Animal Hospital and coordinate export to a central point in North Dakota. Cattle going into Eastern States will be coordinated with H.S. Knills Transport of Paris Ontario.

WELCOME

from
BOHRSON MARKETING SERVICES

On behalf of the Angus family of Jaymarandy Livestock, all of us at Bohrson Marketing are pleased to welcome you all to their DLMS Farm Gate Timed Auction bull sale held the 3rd-4th of April 2023.

The Jaymarandy program has focused heavily on the mother cow and built on a sound set of fundamentals that have put fourth this strong set of bulls on offer. The Angus division is highlighted by a special two-year old bull that gathered a tonne of attention last fall at his two showings and a group of yearling Angus bulls that are bred to last and get out and work. The two Simmental bulls on offer are a great compliment to the set of bulls and offer an exotic option with the baldy face advantage! Be sure to make plans to link up with Mark to tour the bull pen, the cow herd and the operation at Jaymarandy Livestock. Mark loves to talk cattle and would be proud to show you his bull pen. If any of us at BMS can help answer any questions you may have about the bulls on offer, please feel free to give us a shout anytime.

Best Regards,
The Bohrson Marketing Team

HOW TO

Bid ON DLMS FARM GATE TIMED AUCTIONS

HOW TO BID | WWW.DLMS.CA | FARMGATE TIMED AUCTIONS

HOW TO PARTICIPATE IN A FARMGATE TIMED AUCTION

After you are at the FarmGate Timed auction site click the LOGIN/REGISTRATION button.

FIRST TIME FARMGATE USERS: First time users will select the REGISTER button from this page. Fill out the registration form to sign up for a free user account and it allows you to select a username and password for use on all Farm Gate Timed auctions. (please note due to some of the text notification features the FarmGate Time Auction Site requires a new account separate account from your DLMS Live sale site)

- After you create your FarmGate account you will receive a txt message with a pin code to verify your account.

- On your first log in to FarmGate Timed auctions we recommend you go to your profile and confirm your notifications are set to YES. This allows the site to send you text and/or email notifications when you are out bid and if there is activity on your favorite lots.

RETURNING FARMGATE USERS: If you have used Farm Gate Timed auctions in the past simply enter your user name and password to continue. After you have logged in you are able to browse the timed auctions on DLMS FarmGate Timed Auctions.

HOW TO BID IN A TIMED AUCTION: Now that you are logged in and your account phone number / email is verified you are able to bid on an upcoming sale. Simply find the lot you are interested in bidding on. After you have found the lot there are 2 options for bidding on the lot.

PLACE NEXT BID – to place the next bid on the item, you see the amount in the first box, you simply click the “Place Bid” button and after you review the bid and agree to the terms and conditions your bid will be placed.

MAX BID AMOUNT – to place a max bid you put your max bid in the second box listed as “Max Bid” on the item, and then click the “Place Bid” button and after you review the bid and agree to the terms and conditions your bid will be placed as the next bid. With the Max Bid placed the computer will then keep you as the high bidder to the max amount you have placed. This can be a great feature if you are not able to give 100% attention to the sale close out and protect your interest so you do not miss out on any lots you want to purchase. The Max Bid amount is completely confidential from the seller during the sale process.

EXAMPLE OF HOW THE MAX BID WORKS - If the lot has a \$2000 bid on it and you place a proxy bid of \$3500 into the system, the computer will bid \$2100 for you but if some one else bids \$2200, the computer will again bid for you, this time at \$2300. The system will look after your interest to a maximum of \$3500. If another bidder is on at \$3600, your proxy will no longer be effective and you will no longer have the winning bid on this lot without once again logging in and bidding again or moving your attention to a second lot of interest. Please note that in some cases a lot value can change very quickly if 2 max bids are placed on the same lot competing against each other.

WATCH LIST FEATURE: If you have items in multiple auctions or only a few from the same auction that you want to watch with out having to scroll through the entire list you can add the lots to your watchlist. On each lot you will see the “eye” button beside the bid button, by clicking this “watchlist” Icon that item is added to your personal watchlist for easy viewing of just your favorite lots in this sale or on the entire site.

SALE ENDING / CLOSEOUT: Most FarmGate Timed Auction sales close racehorse style with extended bidding.

WHAT IS RACEHORSE STYLE CLOSE? Racehorse style sale close is when the entire sale stays open in extended bidding. This type of sale allows you as the bidder to change to a different lot within the same sale if the bidding has gone in to extended bidding.

HOW WILL EXTENDED BIDDING WORKS? When we get to the close out end time the clock for close extends with any bid placed with less than 5 min on the clock. This type of extended bidding turns the end time to more of a soft time. Extended bidding allows bidders to compete in lots like a real auction and give all bidders the same time to make a decision. Always follow the clock to see how much time remains in the sale you are interested in.

BIDDING CLOSE & FOLLOW-UP: After the clock has gone to “ENDED” and no bidding has occurred for 5 min the computer will declare the sale finished. Following the close typically within 24 hours of the sale close the sale consignor will contact all winning bidders to arrange payment, transfer of pedigrees and delivery/Pick up of your lot. Or as the winning bidding you can contact the sale consignor / sale manager to confirm payment instructions.

-Please make sure that your account info is up-to-date and correct if you are the winning bidder of a lot as this is how the billing is sent to Sale manager and/or Sale consignor.

MATERNAL BROTHER

MATERNAL SISTER

When naming this bull so many reasons for his name are so fitting, the timeline and many for what he is exactly. He is an absolute beast of a bull, a king in his domain type of bull, a bull that makes you pay attention. And it would be cool if any of those were the main reason. The true reason is to pay homage to my late Father, Leonard Angus. Leonard: origin of name - Lion Hearted, Brave, Lion. I wanted to put it onto a bull I believed would be a great one! If you knew my Father it just fits. He never had to say much, he could just be and people respected it and few ever challenged it.

The Lion is one of the more interesting bulls to be made available as of late and we are proud to say that we bred and raised him. He is stout, deep and balanced. On the move The Lion walks directly forward with all four legs, straight out to the shoulder with no swing, just flexion and extension as it should be. On his rear legs he flexes each individual joint as it should and when he extends those joints to the appropriate limit he does so without any internal or external rotation at the hip. He just moves like a big cat. Another bonus is that he does so on a great set of feet - symmetrical, square, steep and lots of it. He has never been trimmed even through the super wet spring, summer and fall we experienced, with show bull type care, he just maintained and had zero over growth. The females on the bottom side of this pedigree have a commitment to bettering the breed with every mating we have thrown at them. The Dam and Grand Dam were shown twice together resulting in a Reserve Champion Female at Manitoba Ag-Ex and a 2 Year old Division Champion at Canadian Western Agribition. Even with his own show ring success, the show ring is not the end all be all, it is a manner for us to interact with Purebred and Commercial Producers. When it goes well it is really nice to be there, and when it doesn't it is equally important to have been there. It is a useful marketing tool of our livestock, regardless of a single opinion. We show our breeding stock, we don't breed show stock. That said, harping on the bulls phenotypical excellence is not absolutely necessary when the pictures and videos are available. More importantly the bull is a meat wagon with an adjusted Ribeye measuring 15.71 sq/in and having a 63.2 LMY, with less than 1 mm of back or rump fat. Lots of good end product for a bull that was bred with maternal in mind and conditioned with sale as a 2 year old in mind. Both dams are donor cows, getting there by their own actual production merit.

When you address the sire you will find a cowboy bull. A feet, legs, calving ease, maternal focused pedigree from a large cowboy program at Severtson Land and Cattle. Unfortunately I did not fully appreciate what I had until it was a bit too late. He offered calving ease and his daughters are now lactating and they are simply amazing females. The udders are large with perfect teat size and placement. Their body dimension is massive and the frame is still moderate. Every single offspring of the G-man bull have had excellent, zero maintenance feet.

Selling 3/4 interest and Full Possession: Call for details

I feel that this bull has the opportunity to represent the our program and that of the new owners well in exhibition and am willing to continue to show the bull for or with the new owners

War Cry is a really interesting bull, one that will up the frame slightly and will most certainly drive the performance. This product of a first calf heifer is a fortunate result of a purchase at Wagon Hammer Ranch in Nebraska and is a product of my 2 favourite animals in their 2020 Spring Sale. Interestingly enough I ran out of money when attempting to buy his sire, glad to say I stayed steady and bought his dam that day instead. She has turned into more than just a pretty cow. She has plenty of milk and does exactly what I want a cow to do - look good while raising some pay weight. I have heard it said in the past, "they are sold by the pound, what they look like is a bit irrelevant". I disagree. I want to look at them every few days for sure and I want to damn well appreciate what I am looking at. War Cry will do that for you. He will make them weigh right and look right at the same time. This is certainly a bull that could and should see service in our program. Incidentally, we have loaded up on some really good bulls and now offer this powerful, outcross sire in our sale. He is truly an excellent phenotype bull and ties it together with incredible power to be unique and complete.

Lot
3

Another cow that hit a home run on production on an annual basis. Raised by their own dam without any type of grafting onto another dam. To describe one of these bulls is to describe the other. Both are incredibly stout, have excellent feet, perfect hair for the Canadian winters and they are the result of a really sneaky/opportunistic/enthusiastic bull from our 2021 sale. We do normally like to utilize our own home raised bulls to sample the product that we want to put into the industry. However, we would rather be able to make that decision on our own. The Night Sweats bull was an excellent calving ease prospect with exceptional foot and structure and on last report has been a perfect calving ease bull. Purchased by Swynar Farms in our 2021 online sale, Night Sweats was sampled, whether or not we made the decision or he made it for us is irrelevant when the results are this good. Their dam calved in mid January the prior year, making her move 60 days earlier. Another pair of bulls that will make excellent replacement females with fertility clearly built in. Our 2022 Finest Female Production Sale high selling female and CWA Reserve Division Champion female, Jaymarandy Georgina 103J stems from this very same cow family.

The very first Jaymarandy Lights and Sirens son that we will sell by public auction, and we couldn't be more appreciative of the quality of this bull. Lit up is long bodied, stout yet mellow bull with a beautiful dam that has plenty of milk and puts son's into excellent commercial programs with one son working at Sliworsky Ranch and another at Shorenberger Farms. His dam is another female that we have flushed and put back into production base solely on her first few calves. We will be adding more of her into the ET program this year. A quality bull through and through, that is equally as good at the ground.

An absolute heifer bull by design and on paper. His dam is wonderful Hard Evidence daughter that stems from the Young Dale Grace 102Z family. Not only is he a really well made heifer bull, with our #1 BW ratio, he then came in with a WW ratio of 104 with a YW ratio strong enough for a life ration of 103. He has the makings of calving ease bull but without doubt he can definitely bring in some pay weight. His dam is a beautifully made female with an excellent udder and the quality phenotype of a 2nd in class show heifer at the National Angus Show. Again, here is a bull that will be a strong female producer in the future with excellent foot quality. His maternal sister by Firebrand was the \$9250 high selling bred female in 2021 Keystone Klassic selling to Rockytop Cattle Company.

DAM

MATERNAL SISTER

Here is a bull that if I was strictly buying based on the quality of dam I would start and end right here. His dam is none other than a farm favorite, Young Dale Grace 102Z. This is her first bull calf ever produced. She has 4 daughters now lactating here, 2 working in purebred programs and another at an excellent commercial program. A highlight of those selling being Jaymarandy Grace 101J selling at The Rose Bowl Sale to Lyseng Land and Cattle and Kueber Farms for \$10,500. When I made this mating I had really hoped for a female that I could bank on being a donor with 102Z getting along in age and Juneau females exhibiting some of the best cow look I have seen. Fortunately she had a bull with an absolute herd bull look. Not ending there, he boasts a Life Ratio of 112, WW Ratio of 102, YW Ratio of 114 out of a cow that has a YW ratio of 105@9 and a Life Ratio of 101@9 head. If it is really important for your bulls to have excellent mothers than this should be a bull that is high on your short list. She is also the Grand dam of Tags 131K, 133K and 205K.

Lot
8

Big Freight is another bull extending from the Young Dale Grace 102Z line and we don't ever need to even think about their ability to produce results. Simply put, they work. His dam is a female that we have been holding out hope to get another female from and had hoped that all these Payweight calves were going to come as females. We won the female lotto on a 3/4 sister to this bull and Tag 131K so will need to be patient and hope the old girl gives us another female soon. This is great opportunity to get into a fresh pedigree for Canada from a cow family that is an absolute lock. You will be able to retain every female from this bull without hesitation. Big Freight is exceptionally long made with a great profile and excellent feet. He has a maternal look to him that I value highly and will be a nice addition into a Purebred program wanting to continue to push the maternal which made the Angus cow famous.

Roundtable is a calving ease prospect in weight and design. His dam is a female that we included into our show string in 2021 and his paternal Grand dam serves as a donor cow for Michelson Wheatland. He is smooth and angular in design, small skulled and has a bone structure ideal for calving. He again is a Grand son of a very special cow in our herd, Young Dale Grace 102Z.

SIRE

DAM

Lot
10

Another moderate made, powerfully constructed Lights and Sirens bull by a Charlo cow. His dam is flushmate to the dam of Tag 130J making him a full sib in blood to 130J. Not only similar on paper but similar in construction. This super stout bull is excellent footed, gets out well on the move and has the muscle flare that Lights and Sirens transmits into every single calf that he sires.

Here again is a fabulous ET calf from our Jaymarandy Grace 640D donor cow. He is a complete made bull that has the same foot quality as all the cattle from this cross - exceptional. His docility is excellent as he is a very manageable bull, which is similar to all the bulls produced by 640D. Every animal that 640D produces is robust in their muscling and many of his flushmates have found favour in purebred programs working here and at Prime Ridge Stock Farms and Wagonhammer Ranches. His flushmate female was the high selling heifer calf in our Finest Female Production sale, selling to 4G Angus. This was the last of the Banknote x Grace 640D embryos that we had and it was definitely a top shelf flush without a single questionable calf. Here again is an excellent opportunity to get in on a no holes bull with a fabulous dam.

SIRE

MATERNAL SIB

He is an exceptional individual. He is one of the largest bulls available and has a very deep and unique pedigree with a top side that is outcross too many mainstream pedigrees and many sires available in semen catalogues. That said, his sire is a Semex bull that has shared service with Hamilton Farms and is a 2 time high selling bull in Denver. Once as the Syndicated high selling bull in the Angus Bull Sale as a calf and another in the Denim and Diamonds Sale as the 2 year Old Division Champion. It is hard to put together a greater ownership and set of achievement endorsements. His dam is best described as a larger framed, long made, roomy middled female that has an exceptional hoof structure. Our only WMR Timeless daughter and she makes me wish I had a more. As an individual Big Star has a WW Ratio of 103, YW Ratio of 126 and Life Ration of 113 from a cow with a YW Ratio of 108@4 and Life Ratio of 103@4. If we weren't already strong on bull power this bull would be making this place his forever home. A maternal brother sold to Funk Farms in our 2021 online sale.

DAM

MATERNAL SISTER

Atlantis is a combination of elite calving ease cattle and should work well for heifers when you assess this pedigree and epd profile. His recip dam is a big roomy performance cow with a traditionally long Limousin gestation that normally exceeds the 289 day continental gestation length when having a natural calf. Which is why she was turned into a recip. This is no doubt what brought about a bit of extra BW. His dam is none other than our cornerstone donor that is owned with Beaman X6 Ranch and C Bar L Cattle Company. She is presently down in Colorado at Trans Ova and is continuing to be a highly productive donor. She carries a \$50,000 US valuation and has produced in excess of \$245,000 in offspring and embryo sales. His sire is Square B Atlantis who is seeing heavy use by numerous Purebred operations in North America. 216K is well structured, has a calving ease skull and frame, lots of muscle, eye appeal and plenty of good Canadian shag hair coat.

The Simmental bulls are new to our offering. I felt the need for the farm to diversify and as such felt the Simmental breed was the direction best travelled. With the inclusion of the Simmental we decided a slower paced development was our best approach and found a couple of really nice cows and some embryo lots to launch with. This baldie bull has a very unique set of markings, is muscular, has a beautiful Red dam and is sired by one of my favorite Canadian born herd bulls, Merchant. His mother's first few udders have been quite nice and she is definitely a cow that is built with longevity in mind - moderate framed, roomy middled with excellent structure and hoof composition. Stout made with muscle, excellent movement and perfect feet.

Here is powerfully outlined ET bull that is the largest framed bull in the offering. He is long bodied and powerful with a great set of feet on a well made skeleton. Look for Broker to make pounds of profit for his new owner. He has one flushmate working as a donor cow for Canadian Donors and Rancier Farms and was bred in the respectable and reputation program of Indian River Cattle Company. 2 female flushmates will be working here in the near future. Very Unique in his markings for those that love a little colour.
