4504 42 St, Innisfail, AB T4G 1P6 • 403.227.3166

SCHEDULE OF EVENTS

Tuesday, February 13
9AM Bulls available for viewing

Wednesday, February 14
2PM Future Legends Simmental Bull Sale

ACCOMMODATIONS

Days Inn By Wyndham Innisfail
5010 40 Ave, Innisfail, AB T4G 1Z1 • 403.227.4405

TERMS & CONDITIONS

Cattle will sell under the standard Canadian Simmental Association Sale Terms & Condition, these are available on request.

FEEDING COSTS

Bulls will be kept for free until March 15th. After that, the bulls will be kept for \$5/day.

SEMEN TESTING

All bulls over 12 months of age will be semen tested prior to sale day.

DELIVERY

Free Delivery at the Seller's convenience within a 200km radius of the farms, further distances will be charged according to cost. A \$100 discount will be given to anyone who takes their bulls on sale day.

CATALOGUE PRODUCTION

Catalogue production was done by Bohrsen Marketing Services. Online catalogue can be viewed at www.bohrson.com

CATALOGUE INFORMATION

EPD's are current and up-to-date as of publication date. Information in this document is believed to be accurate but any updates at the sale by the owners, auctioneer or sales management will take precedence over the information provided in the sale catalogue. Pedigrees in this document have been supplied by the Breed Association and all other information has been supplied by the seller.

ONLINE BIDDING

Online bidding will be available through the sale with www.DLMS.ca. Important information on how set up your account and bid can be viewed on their website.

DLMS
www.dlms.ca

WELCOME FROM BOHRSON MARKETING

Future Legends Simmental bull sale has quickly become one of the must attend events of the spring bull sale season for your source of elite Fullblood and Full Fleckvieh genetics. The opportunity to come into one sale and purchase bulls and females from 3 like minded operations with quality throughout is exciting. As you tour through the cattle it's not obvious to see where one string of bulls starts and another ends, these are consistent, evenly matched cattle that are all raised and developed responsibly with longevity and athleticism at the forefront. All three operations do a top of the line job sourcing some of the most elite herd bulls that come available. The acquisition of powerful walking bulls and utilization of industry leading AI studs has left all three operations some of the stoutest and most marketable bulls we annually see. The Future Legends group made up of B Bar C, Spruce View and Starwest bring you some of the most powerful, high performing bulls each spring in both yearling and extra age packages with a great blend of cow bulls and calving ease bulls available. All three programs work hard on pigment and colour and it certainly shows as you flip through this book and there is something for everyone. Again this year we will have top cut commercial open heifers and new this year some exciting, top of the pen registered heifers to compliment the stout set of bulls. We highly encourage you to make plans to join us on sale day as the hospitality is second to none and the impressive, deep set of bulls are sure to excite. Make plans to take advantage of the beautiful weather and go to each farm to preview the bulls before they move to Innisfail. Be sure to reach out to any of the ladies with questions regarding the offering, they will be pleased to answer any questions and just talk cattle with you. If any of us listed from BMS can be of any assistance, please do not hesitate to reach out.

We look forward to visiting with you about this elite offering and hope to see you on sale day.

Best regards,
the Bohrsen Marketing team

SALE WELCOME

As I sit here writing this, we are in the season of gratitude and spending time with family. Man, what a year to be grateful for! Record breaking cattle prices, enough forage for the next couple years, and an extremely mild winter. I find it rather rewarding to look back at previous catalogues to see not only our progress but to analyze the industry's trends and the growing seasons and this is a year I find quite pleasant to reflect upon!

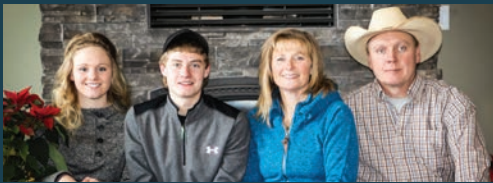

Another year where Chris, Tracy and I are extremely proud to offer our best progeny with each of us having diverse programs that complement the next to put together a strong, successful sale. For the first time in our sale history, we will be offering registered heifers directly out of our replacement pens. These will be in addition to the packages of commercial heifers that are paternal siblings to the bulls on offer.

Generational differences between us often make me chuckle when I ask "what's new and exciting this year!" Excitement doesn't always have to come from big events such as buying land or getting married but can come from stability and continued success. The old saying goes something along the lines of "It's the little things that count the most." For myself personally, we had another exciting year with Lance and I getting married on August 26th and buying more land for us to continue with our cattle addiction. Chris's excitement was having a healthy calf crop during astonishing cattle prices along with a 130bu/ac barley crop. Tracy's excitement was growing the herd again to right around 200 head. If you haven't noticed, all of our excitement is fueled from being a part of the Agriculture industry.

With that, I warmly welcome you to our Fifth Annual Simmental Bull Sale! As a group, we offer a wide variety of genetics; whether it be calving ease, performance, polled or horned, we have it all. We continue to deeply thank our repeat customers and welcome those who are new. All our programs reflect our support systems whether it be friends or family, and for that we are eternally grateful. We continue to make it our goal to build long lasting relationships based on trust that will lead to continued business, adding value to your program.

We look forward to seeing everyone again on February 14th at the Innisfail Auction Mart! As we all say, only half of this industry is about the cattle, but rather the people. The coffee will be hot, the whiskey strong and the smiles always welcoming. As always, you are more than welcome to stop by any of our farms to tour the bulls at your convenience.

Christel Harold

Shared Footnote of Full Siblings

We are extremely hard on twins but when they're equally as impressive as "Karson" and "Kian", we couldn't resist to offer not one, but both brothers. These full siblings are identical, not just by their pigmentation, but their performance as well. Take note that their yearling weights are within 30lbs of each other. Tremendously long spined, deep ribbed, and just downright impressive, "Karson" and "Kian" both will be the leading herd sires in any program. Their dam, SBV 268E has been a top producing donor cow for Mark Land & Cattle and has a renowned reputation for her bull producing abilities. When the opportunity arose for us to purchase as a cornerstone donor, it was a no brainer due to her bombproof and powerful pedigree. She currently has one of our best polled bull calves of this year's calving season, sired by our new herdsire, JB CDN Sarcee. "Karson" and "Kian" will have a large impact on any herd and will be the type of bulls that will take any program to the next level.

Starwest Lance is a smooth made, attractive bull with eye catching colour. I personally don't think you can make them much darker than him. His small head and smooth shoulders combined with his moderate birthweight makes him a great candidate for the heifer pen. His dam has been an honest, solid producing cow with a proven pedigree that works with every breeding with her last year's model being purchased by Pinto Cow Ranch. This is the type of pedigree we think will be a perfect blend of calving ease while still producing marketable calves. His easy-doing temperament and attractive look makes him a visitor's favourite.

Starwest Pol Kapel deserves to have a long list of friends on sale day. He is big topped, stout, and deep through the middle while still being soft made. He, as well as his paternal brother, "Lance" both have that sought after blood red colour and have turned heads every single tour. He's out of an exceptional young cow who's proving to be donor quality in just her first two calves. "Kapel's" maternal sister just sold for \$21,000 at our Simpover heifer sale and now calls Anchor D Ranch her home. We've talked about the FSMB Mulan cow family many times before as she is one of our leading cow families and has continuously produced superior offspring, including a proven herdbull in our program, "Starwest Pol Eagle Eye." Polled, well balanced, performance, colour; all valuable attributes that should make the purchase of "Kapel" a no brainer.

"Kash" is the perfect definition of a steady and consistent developing bull who always looks the part. A more moderate framed bull, Starwest Pol Kash is a heavily pigmented Kalibre son whos out of a dark red Shooter daughter. I really admire the pedigree of this bull and have no doubt "Kash's" daughters will land themselves in the replacement pen. His dam, Starwest Pol Hayden is a large framed, extremely hairy, brood cow with a beautiful udder. I cannot reiterate udder quality enough when it comes to this cow family and the Kalibre females we have in lactation are no different. Top it all off with the fact that he's homozygous polled, "Kash" will be a quick ROI when it comes to high performing steers and herd building females.
Homozygous Polled.

Starwest Pol King will be our last Kalibre bull to sell as we recently sold Kalibre to Pine Creek Simmentals. Kalibre was a reliable breeder and was our go-to bull when we didn't know what to breed a cow to as his pedigree is one of the most outcrossed in the industry. We have over a dozen Kalibre daughters in the herd and just wait till you see their sons in the bull sale next year! Not only have the Kalibre daughters earned their keep on our farm, but his sons have been a hit in the commercial industry. Just recently, a Kalibre daughter sold to Ferme Gagnon at our Simpover heifer sale for \$15,000. I genuinely could go on and on about Kalibre but the real gem in his pedigree is his dam. A full sister of Starwest Pol Edelweiss lives at Ferme Gagnons and just ask Francis how high he is on the Barberella cow family! Starwest Pol King will be a more moderate framed bull with longevity written all over him. He'll work on any set of cows and still stamp his calves with consistency, growth, and muscle.

A couple years ago, we decided to purchase a horned herdsire who's goal was to stamp his calves with unbelievable power and SBV Rambo 708G did just that. "Koren" is out of a young, polled Fort Knox female who caught our eye in Dan's sale seeing as we own her maternal sister as well. One thing we really admire about the Rambo progeny is their temperaments. We have really focused on the temperament of our cattle the last couple years and have never had to cull a calf of his due to attitude. "Koren" is the perfect representation of how pleasant the Rambo calves can be. He will be a larger framed, easy fleshing bull who will produce market topping steers in the fall.

My favourite part of breeding season is having good old sires like LFE Inscription klicking around. A maternal brother to the renowned, SBV Reputation, LFE Inscription is one of the best footed herdsires on the farm. His calves are vigorous at birth, and have tons of hair. We have successfully used him on cows that threw a bit too much birthweight in the past and he has moderated them perfectly without sacrificing performance. SBV Ida 866B was part of a package of cows we purchased several years ago from Mark Land & Cattle and we have retained every single daughter that she has produced. "Kyran" comes to you in a polled package and will be a very honest bull who will increase your bottom line.

You know those bulls that walk around the pen just knowing they're attractive? That's Starwest Koralo and man is he just darn right exceptional. He too is quiet as a kitten just like the rest of the Rambo offspring not to mention his dam, Starwest Pol Feebee is one of the biggest pets on the farm. A maternal sister of "Koralo" currently resides at Blazin J Simmentals and she has a son selling in their first annual bull sale on February 17th. Another maternal brother of "Koralo" was purchased by our good friends and neighbors, Darren & Tammy Glubish. Feebee has done an incredible job proving her worth in her young career and will be a cow to continue to watch for. "Koralo" is a top performing bull with unlimited potential, making him an easy bull to pick out on sale day.

Don't let his age fool you, Starwest Pol Levi earned his page in the catalogue for a reason. I think this bull is just downright cool. His striking pigmentation, his dark colour, he's just got the look and he's doing a fine job keeping up to a pen of bulls some of which are several months older than him. "Levi" comes from an excellent young Spitfire cow. If you are at all familiar with our program, you'll know just how much we admire Double Bar D Spitfire and his progeny. This young bull has a bright future raising big time steers and him being polled is just a bonus. By the time you turn bulls out, he'll really be a head turner with "stud" written all over him.

Bistro is a bull that I proudly showed off when he was a calf to anyone who came through the pens. When he was about a month old, he looked 3 months old. He had exceptional growth at a young age. However, as life throws you curves as it did for everyone this past summer, even though he had a good weaning and yearling weight, I'm sure it would have been much higher if the conditions were ideal. I was tempted to keep him at home for my own use, but as it turned out we kept back a 7/11 son. Deep and soggy best describes this calf out of a cow with a phenomenal, picture perfect udder and feet. Pictures of bulls were taken early December.

Missouri comes to you from one of my favourite cow families. Going back to one of our matriarchs, Lizzy, who not only raised some top females for us but produced one of our top bulls ever selling to the Erskine Colony in our first Future Legends Sale. We retired Lizzy a couple of years ago after she got stuck in a creek and was placed to rest a couple of weeks ago coming up to her 18th birthday. This was Valentina's second calf and we can tell already she is going to follow in Lizzy's footsteps. With 7/11 in Missouri's pedigree as well, I can only predict good things to come out of this fella. Our top selling bulls in last years sale were 7/11 sons going to Short Grass Farms, Plain Lake Colony and Welch Farms.

Tremour is out of our old, dependable Mission bull that we used forever on heifers, and a good Beechinor cow we bought as a heifer and was one of two high sellers we got that day at their sale. Bee2 has given us a bull calf every yer and this current calving season is no exception. Her calves are usually one of the soggiest in the pen. I wish she would give me a heifer or two as she is a strong uddered female. Coming out of Mission, Tremour is one of her more moderate framed bulls and with an 87lb birth weight he should have some good calving ease. One of my favourite Bee2 bulls sold to KSL Simmentals a couple of years ago.

When I look at Armour I sit back and think what a terrible error I made when I forgot to register his dam when the crunch was on to get the paper work in. Armour, in reality is a purebred bull going back years ago to a Bodybuilder son we owned. In cases like this, I will keep the male offspring if I know the cow family has proven itself to me. Armours granddam has given me numerous fancy heifers and I have kept them all so it was a no brainer to retain Armour and put him in the sale. His dam is a direct daughter out of Mission and is solid red to the toe with large facial goggles and a strong foot and udder. I'm watching his dam on the camera calve as I'm writing this and it looks like another awesome bull calf out of our new herd sire Black Gold Reputation 149K or as we call him Young Rep. If paperwork isn't a big issue for you, you will get one heck of a bull for probably a reasonable amount of money. No guess work here.

Unregistered half blood.

SIMMENTAL

Even though I love all my 7/11 calves I have been really, excited to write the footnotes on Governor. This is a bull I think is going to develop into a real meat machine and will get noticed in the pasture. His granddam is another favorite cow who surprise, surprise goes back to the Lizzy cow family. I have only sold one heifer out of all the females in all of these Lizzy cow families to Virginia Ranch a few years ago and she now has a new home at Sky-west Simmentals. They're too good to give up. I'm in the business of producing beef and these cows do it with 5 stars in my opinion. I can only imagine his potential if the feed situation was different. Governor is dark red with a ton of hair and a good set of testicles.

Senator comes from a cow family loaded with pigment. His granddam was solid black red except for a small band of white at the top of her foot. His dam is one fancy looking cow. If your're looking to increase milk yield, this is the family to do it. Going back to Haldor 910A he produce some very feminine females and it was unfortunate we only had him for a short time before we lost him. Senator is another dark red bull with lots of hair and large testicle. Calves should stay on the moderate side as his dam and granddam were moderate sized cows.

Nearly all of our sale bulls this year are out of second calvers and what a good job they did when thrown into the year they endured this past summer. 82K's dam, Lexus, is a dark red, sweetheart of a cow that came from a dam that I ended up selling to my brother who wanted a tame cow for his kids to be around with. I'm thinking of buying her back when I see the calves she and Lexus are raising. Long spined cattle raise more beef and these cows have that and with 7/11 in the mix only sweetens this deal. I can see Lexus continuing to bring her sons into future sales and her daughters becoming top females in our herd. She has a bright future with us.

Ok. You are going to hear me repeating myself a bit with these 7/11 bulls. I have said over the years that there were many bulls that we owned were ones I thought a lot of, and still do, but if I only had one that I could use for the rest of my calving days it would be without a doubt in my mind 7/11. He has impressed me with his calves so much, with both the bulls and the heifers, I truly feel blessed to have owned him. He leaves his calves with a tremendous amount of thickness, quick growth, tons of hair, big feet and his dam has a picture, perfect udder. I feel it's unfortunate that because of the difficult year these bulls don't get to show their full potential. Trust me when I say you will be happy with the calves from these bulls. Although Cyanide is a bit smaller than the other 7 calves he is about a month to a month and a half younger than the rest but that didn't stop him from having one of the highest rate of gain for yearling weight.

TWO YEAR OLD

Chonky was actually catalogued in last years sale to be the lead off Sterling son. However, he ended up getting his foot caught in the corner of our feeder and ended up pulling the horn shell off of his outer digit. Even though AT NO POINT after this incident did he ever go lame, we didn't want to take a chance for that to happen for his new owner while breeding and decided that it was best to leave him at home and let the horn shell regrow. Most ranchers who looked at him had no idea there was even an issue. We have 100% confidence that he will go out and work for his new owner. Chonky was a favorite calf last season because of his friendly attitude and natural thick, thick hind quarter. Once again Mission shows up in the pedigree via Sterling who had taken over for him as our new heifer bull. Even though Chonky has calving ease built in and is out of a heifer, because of his 92 pound birth weight we feel he would be best suited for second calvers. You'll love the "get up and go" attitude these Mission calves have. It's built in them to want to live after birth. His dam has a keeper 7/11 heifer in the pen.

This is the first time we've offered registered open heifers at our bull sale and these two come to you right out of our replacement pen. With having such a heavy heifer year, our heifer pen has gone through four rounds of culls so you know when we're selecting out of that pen, we've dug deep. Starwest Khloe is a maternal sister to the donation heifer we offered in memory of my late husband a couple years ago. That heifer, "Heaven On Earth" has landed in the loving hands of Bovey Family Farms and is doing a tremendous job. "Khloe" is also the maternal brother to Starwest Pol Mojo who has had quite the impact at Langer Fleckvieh with some of his first daughters fetching over \$10,000. Because of this, "Khloe" has a bit of a sweet spot with me and I feel she'll turn out to be a dependable producer.

LFS Pol Swag was strong in the hair and pigmentation department and taking one look at "Koffee" will show you just that. Her dam, V5 Espresso we purchased as an open heifer from Lacombe Farms which began our great friendship with Pierre Lacombe. Koffee is a stylish, deep bodied female that has brood cow written all over her. Not to mention, check out Koffee's impressive weaning weight! Swag's Sire, Raptor and Espresso's sire, Bravo were notorious for their tremendous female making abilities which should give insight on the future "Koffee" has. She's wide topped, deep bodied and is as honest as they come with a sweet disposition. We strongly feel that this heifer will be a very profitable investment.

B BAR C **COMMERCIAL** HEIFERS

6 select heifers right out of the keeper pen. Horned and polled. Sisters to the bull pen.

43

STARWEST **COMMERCIAL** HEIFERS

A select group of polled and horned commercial heifers out of our replacement pen. Two black baldies will be offered this year that are fullblood influenced sired by our new homozygous polled black herdsire, Anchor D Rayzar. Other heifers are paternal siblings to the bulls on offer. All animals coming from Starwest are fully vaccinated, palpated for breeding soundness, and are given a trace mineral injection prior to breeding season.

44

SPRUCE VIEW COMMERCIAL HEIFERS

10 select heifers out of the keeper pen. Siblings to the bulls on offer. Polled and horned. All heifers will be palpated, and are vaccinated with covexin, cattlemaster 4, treated with ivomec and safe guard.
