IN-HERD SEMEN

LA Ranch & Bar M Simmentals retain the right to collect semen for in-herd use on any bull in the sale at the buyers convenience and sellers expense.

CATALOGUE PRODUCTION

Catalogue production by Bohrson Marketing.

TERMS & CONDITIONS

Cattle will sell under the standard Canadian Simmental & Canadian Angus sale terms & conditions, these are available on request.

SCHEDULE OF EVENTS

FRIDAY MARCH 22

Bulls will be at the sale grounds for viewing

SATURDAY MARCH 23

Lunch will be served at 12 pm

Sale starts at 1 pm

POLLED STATUS & COAT COLOUR CHART

SIRE	DAM	CALF
Homo Polled - the bull carries 2 copies of the polled gene.		
Homo Polled	Homo Polled	100% Polled
	Hetero Polled	100% Polled
	Horned	100% Polled
Hetero Polled - the bull is polled, but carries 1 polled gene and 1 horned gene.		
Hetero Polled	Homo Polled	100% Polled
	Hetero Polled	75% Polled, 25% Horned
	Horned	50% Polled, 50% Horned
Homo Black - the bull carries 2 copies of the black gene.		
Homo Black	Homo Black	100% Black
	Hetero Black	100% Black
	Red	100% Black
Hetero Black - the bull is black in colour, but carries one black gene and one red gene. Black is dominant to red, so the red colour is not expressed when it is paired with a black gene.		
Hetero Black	Homo Black	100% Black
	Hetero Black	75% Black, 25% Red
	Red	50% Black, 50% Red
Red - the bull carries 2 copies of the red gene. This example assumes the bull is diluter free.		
Red	Homo Black	100% Black
	Hetero Black	50% Black, 50% Red
	Red	100% Red

WELCOME

from Country Roots

On behalf of Bar M Simmentals and LA Ranch I would like to welcome you to the second annual Country Roots Bull sale. I can't believe it's already been a year since (with a shaking hand) I wrote the introduction to our first ever sale. I tell you those were some stressful weeks leading up to that sale. Little did I know I had nothing to worry about. Our loyal customers truly are the best customers we could ever ask for. The support we had last year for our first sale is something we will never forget and are truly grateful for. It is because of our great customers and our true passion for the breed that we continue to strive to bring you the very best product possible. We literally spend 365 days a year thinking about cows, planing matings, sourcing new genetics, and researching pedigrees it truly never stops but I love it.

We are sure proud of this set of bulls we have put together once again being our biggest and best set of bulls to date. As always our bulls do not see any creep feed through out the summer. The weaning weights you see are just from moms milk and the little bit of grass we had this summer due to the severe drought we were all faced with. Once weaned the bulls go onto a TMR ration, that is designed with the bulls longevity in mind, we have made up by our nutritionist that is a blend of Silage, Hay, Barley and Pease. Our bulls are bred to be easy doing fast gaining cattle and always seem to way out perform the projected rations so we are able to keep the amount of grain in the rations at a low %. We defiantly feel as though there is something for everyone in this offering from herd bulls to shear performance bulls to some of the safest heifer bulls you'll find anywhere and everything in between.

WELCOME

from Bohrsen Marketing

The Muehlen families of LA Ranch and Bar M Simmentals are some of the most progressive young operations in North America. Their dedication to their cowherd, their product and their customers is very apparent and we couldn't be more impressed to see the strides they have made in their operations the last number of years. The strict process they put cattle through when selecting new herd sires and females is the same as when they sort bulls to make the sale pen, so you can rest assured only the best of the best will be offered March 23rd.

Luke, Amanda & the girls of LA Ranch along with Pat & Kennedy of Bar M have done an outstanding job building programs around functional, easy doing, low maintenance cows that work. Their criteria of females that can raise big calves, contain flesh, and look good while doing so is their motto along with perfect feet and udders. The sires they use are always amongst some of the best in the industry with many top ai sires represented as well as sought after herd bulls such as the black \$90,000 No Limits who has done a whale of a job breeding across the country and on the Fullblood side, the homo polled Griffon bull has left a set of sons you'll want to pay attention to.

Luke & Amanda Muehlen
250.567.7375

Pat & Kennedy Muehlen
250.567.8135

As I said in last years write up we, both LA Ranch and Bar M Simmentals run large numbers of commercial cows and there for understand the importance of calving ease, longevity, easy doing cattle, soundness, and also that pounds pay so these calves need to be able to grow both for the cow calf producer but also for the feedlots because if they don't make money then we don't make money.

We always enjoy giving tours wether its summer or winter we welcome you to stop in for a visit and a tour. We encourage all to try and come by and look through the bulls at home before we move them up to the yards. It gets hectic up there and we enjoy being able to visit and go through the bulls at a slower pace at home. We hope to see everyone at the bull sale on March 23 where we will buy you lunch and have the bulls ready for your appraisal.

The bulls on offer both Simmental and Angus are sound structured, athletic, easy going bulls that are built and fed to go out and work and last. New this year we are excited to have a select group of open replacement heifers selling and they are sure exciting. Industry leading sires and cow families are represented and these females stem from the most prominent cow families at the LA Ranch and even include an embryo transfer daughter. We know you'll be impressed with the cattle and can't recommend doing business with Luke and Pat enough. The Muehlen families are some of the real good people in the entire industry that stand behind their product 100%.

We hope you take the time to get to the ranch before sale time to evaluate the bulls and visit with the Muehlen's on the sale cattle and source an option that can fit your needs. Be sure to join us in Vanderhoof for sale day for their great bull and select female sale on March 23rd, you'll be glad you did!

Best Regards,
The Bohrsen Marketing Team

\$30,000 Daughter

When we found No Limits in the spring of 2022 we knew we had to own him. He was in our minds definitely the best black baldy bull to sell that spring and he came with an awesome pedigree that was very outcross to our program and most programs across the country. He is one of the longest bulls out there and still has so much middle to him which is very hard to find. He has a ton of hair and one of the most important things in our minds is foot quality and you can't make em much better then the feet on No Limits and boy can he stride out and travel! We never dreamed of paying \$90,000 for a bull but bulls like him don't come around every day so we knew we had to get him bought. Now two years late we couldn't be happier with our decision that to day to just keep bidding. His calves have passed all expectations. They are some off the top calves all across the country. He is without a doubt the most consistent breeding bull we have ever used. This is a bull that we will continue to use heavily in our program for many years to come.

Warrior is a bull that just continues to impress us. Every year I can't believe how impressive his calves turn out for being such a great calving ease bull. His calves are always up and sucking within minutes! His first daughters calved this year and they are a real nice set with good udders awesome feet and are already doing a great job on there calves. Warrior is coming 4 this year, he stands on excellent feet and is one of the nicest bulls you'll ever handle. We sold a small amount of semen on Warrior last fall where it commanded \$475 per straw. He has unbelievable EPDs and breeds true to those numbers. For some reason we were really heavy to heifers on his calves so unfortunately there are only the two bulls in the sale this year and unfortunately none for next years sale but he will make a strong return in 2026 as we will be breeding a large group that way again this spring!

36L – Homo Polled, Hetero Black

I named this calf home run cause I really feel like we hit a home run on this guy. He has it all. He's so clean through that front end he's nice sculled he's sound he's super stout made he's huge middled, big hiped so much muscle in that hind quarter tons of shape and he's got the perfect temperament, he's dog quite but he leaves you alone, never comes up and wants to rub on you or be a pest. Home Run has been the top gaining bull in the feedlot doing just shy of 5 lbs/day since weaning on our 3 lbs/day projected ration. We are going to retain 100 straws of in herd use semen on this bull that we will hopefully collect before the sale.

14

43L – Homo Polled, Hetero Black

It's hard to write about these bulls and not sound repetitive cause they are just so similar. This guy is probably the longest of these three bulls. He has a great hair coat awesome neck extension, so much top on this guy and again a real quiet easy to handle bull. Real soft made and loose hided, very sound bull just like his brothers.

24L – Homo Polled , Hetero Black

A real beef bull here. He's as stout as they come, hairy, loose hided, soggy made, long spined, deep all the way from his chest through his middle third and flank and right into that hind quarter, big hipped, wide based, wide topped just an absolute beast of a bull and to top it off he's dog quiet.

**31L – Homo Polled, Homo Black**

If you like em soft made check out this guy. He has got to be the biggest middled bull in the pen, a real belly dragger. Awesome haired calf, something we take great pride in, slick haired cattle just don't do well in our climates. Stout made, loose hided, sound structured bull. Look how deep quartered this calf is, he carries that muscle way down his leg. Definitely a top end bull here.

17

**44L – Homo Polled, Homo Black**

I love this calf and have since the day he was born. He might not be quite as stout as his brothers but man he is just so well balanced and so structurally sound with awesome feet, he's deep sided, loose hided, beautiful headed, lots of presence, real hard to poke a hole in this bull.

Real long spined bull here. R Plus Mandate is a paternal brother to our No Limits bull and puts the length in his calves just like No Limits does. This bulls dam is another one of our purchases from the R Plus dispersal and we just love this cow. She will be entering our donor pen this spring. Put 26L on your moderate framed Angus cows with his 90 lbs BW and his length those calves come easy and then that length will pay you back a great deal when they push the scale down and hopefully have that baldy face that the buyers love to see in the ring.

Paternal brother to the three Soda Pop feature bulls earlier on in the book, and like I said then we just love the Capacity calves and is a bull we will continue to use in our program. Pretty incredible pedigree on this guy with the likes of the great Hoc Broker bull that we have just been so happy with and the Flirt cow family that is one of the best known cow families in the breed and for good reason. 8L is so nicely put together, so smooth into his shoulder and so well balanced throughout, very sound, lots of shape, he's stout and hairy, beautiful headed and he's got that perfect blaze.

Homo Polled

FULLBLOOD BULLS

I bought my first fullblood cow in 2019, a bred heifer from the Starwest program in AB. At the time I had no idea what to expect but I can sure say that we have been very impressed with the fullblood cattle. They milk extremely hard they have so much meat and muscle in those bulls and have a great temperament. We purchased a group of fullbloods from the highly regarded Double Bar D program in SK and are sure excited to see what those cows will do in our program. We now run around 25 fullblood cows and also do some embryos as well. It's darn hard to beat a fullblood bull on some angus cows to give you a baldy calf that will blow you away with there performance and the premiums you will receive at the action, and the best part is those F1 cows are about as good of a cow as you can have around.

We know what a pain horns are so we were so excited to find a bull of this quality in a homo polled package. Griffy is a huge middled, soggy made, loose hided bull with great foot quality and an awesome temperament. He has bred so consistently making top end bulls and heifers no matter what we breed him to fullblood cows or red and blacks they are just flat out good. Just look at his sons they definitely speak volumes for the consistency in this bulls offspring, all 4 of these bulls are top notch fullblood bulls. He is dark cherry red and has perfect goggles. His calving come moderate at birth and then grow up beautifully. We have used him on heifers lots with no troubles at all. It is very hard to find a homo polled fullblood bull that is as stout and has as much meet and muscle as this bull does.

ANGUS BULLS

When the Crosbys decided to sell their angus herd they actually sold half the herd to the Ophas family and the other half to us. Then a couple years later we had the opportunity to buy those cows and put the herd back together. I want to say a huge thank you the Ophas family for that opportunity and help in getting that done.

Our main focus in the angus breed is to produce heifer bulls that will calve with ease and still give you a calf that will grow. These short gestation bulls do just that, those calves come early and they come easy and then they grow like crazy. I'm still always impressed just how well they can grow up when they start out so small.

We don't have many angus cow bulls but here is one that we really like. Massive ribbed bull, stout made, chocked full of meet and is deep throughout. Out of a beautiful uddered cow and the Renovations are known for their udder quality as well so this bull is sure to leave some beautiful daughters.

Sire S A V Renovation

CONSIGED BY
LA Ranch

Another nice Renovation son that I'm pretty high on. This bull is huge middled, has so much flank in him, he's so deep quartered just a real well balanced bull that is sure to leave an outstanding set of calves. He was born a twin but that sure didn't hold him back.

Nice fronted bull that has lots of length to him, lots of hair, he's a well balanced bull that is out of a heavy milking cow that raises a top end calf every year. This bull should leave a real growthy set of calves and his daughters should be great producers.

CONSIGED BY
LA Ranch

These Renovation sons are sure consistent. I really like this one as well. Such a nice fronted bull, he's sure to grab your attention, nice and stout, hairy, square hipped, long spined, real well balanced individual that was born a twin but sure grew up to impress.

Well when I decided to sell a few heifers in this years sale I had no intention of letting this one go but here she is. A true sale feature that would be at the front end of any sale. I just love this heifer and everything about her. She has a great pedigree, she is a real power house of a heifer, as stout as they come, huge middled, nice fronted, and has a perfect blaze. I don't know if there is any point in talking about her dam as she is so well known and that picture kinda speaks for itself. 200L has two sisters that are already donors in the Canadian donors line up and I truly feel that this heifer is a donor in the making as well.

Homo Polled, Homo Black.

CONSIGED BY **LA Ranch**

We purchased this heifers dam from Willow Creek Simmentals and she sure did a good job on her first try. She is a nice uddered good footed female. 181L is a real nice heifer, she is real stout and hairy, is so well balanced, and has a real nice front end on her. This is the first calf we've ever had out of the Slider bull and man are we impressed.

Pretty nice pedigree on this heifer. We are sure happy with the Hannibal calves we have had so far and this heifer is no exception, huge middled, real clean fronted, and super stout made. Her dam is a beautiful cow that we purchased from Black Gold Simmentals out of their Evolution sale. We actually couldn't pick between her and her full sister as to which one was the better heifer so we actually bought them both and we are sure happy we did, they have both turned into beautiful cows that will more then likely both end up in the donor pen here in the near future and to be honest I'm still not sure which one I like better.

Well we had said we weren't gonna sell any No Limits daughters cause we just think they are gonna be so darn good that we didn't wanna part with any but when we decided to put some heifers in the sale we wanted to offer up some of the best so here is 71L. She comes from one of our oldest most proven cow families that just continue to produce and we have a ton of confidence that this heifer will do the same. She has the No Limits length of body and sweeping rib cage. She's a real loose hided, sound, correct made heifer in a baldy package.

Sire RF No Limits 1112J

This is the first Warrior daughter to ever be offered for sale and she is a tank. The Warrior cattle just continue to impress us and everyone else that sees them and this huge middled, stout made, well balanced heifer will be no exception. The first warrior daughters calved this winter and we couldn't be happier with them. They dropped beautiful udders, they calved well and were great mothers and are raising some impressive calves already.

Here is a rare opportunity to buy a Pocahontas female. The Pocahontas females have sure made a name for themselves being known as some of the best cows in the breed. She is the result of some embryos we purchased a couple years ago. She is a more moderate framed heifer with lots of middle and a great hair coat.
