

Welcome to our third on-farm bull & female sale. In terms of diversity, yet maintaining consistency, we feel we've upped the ante when it comes to the bulls and heifers on offer this year. On the bull side, we've got calving ease prospects with a bit more performance compared to previous years, as well as some real powerhouse-type bulls. Our purebred and commercial heifers are strong groups. We've got a good mix of both the showy, stylish, ultra-feminine kind as well as the powerful, broody, herd-builder kind.

This years' offering of Fullbloods are consistent, thick-made, heavy-haired, powerful and stylish bulls that really have a lot to offer. We encourage you to take serious consideration in these bulls for your cross-breeding programs, as we feel they offer a lot of heterosis gain and a boost in yield on your calf crop.

The Red Bulls are performance-driven, solid built bulls with pen presence and style. Many of them having that shot of fullblood in the pedigree, sure adds that extra boost that we've come to appreciate and expect within our red division.

The Black Bulls are a sight to see with the Wheatland Dimensional 1147J leading the pack. They're stout-made and extreme in thickness, rib, and style. They're powerfully unique and we feel they offer a level of versatility that we haven't delivered from our black bull offering before.

The markets have been doing well and we've seen new highs reached within the industry. Take careful consideration in securing herd bulls that are going to help you capitalize on the upward trends and set those new records. A good bull can pay dividends on a calf crop in a short period of time!

We encourage you to contact us or any of the sales representatives anytime if you have questions.

*All bulls were pictured the first week of December, and videos of all sale lots will be available on www.cattlevids.ca and our website www.redwillowranchltd.com by mid-late February.

Scott Bohrson Taylor Richards Robert Voice Darryl Snider Jaxon Payne Martin Bohrson Nate Marin

Cody Haney Riley Bohrson

We are thrilled to welcome one and all to the 2024 Red Willow Ranch Bull & Female Sale at the Ranch near Cut Knife, SK. The Tyler family are some of the real good, hard working cattle people in the industry that dedicate their lives to their cattle operation and we are proud to work alongside them. On behalf of the Bohrson Marketing Team, we invite you to join us on March 4th to take in one of the most impressive sets of bulls the Red Willow Ranch program has ever assembled.

The fullblood bulls have always been the staple here at RWR. This years offering is as consistent in type and kind as ever seen before. Soggy, hairy beef bulls that will add pounds and performance to your calf crop. They are highlighted by the Mogul and Boone sire groups and they will absolutely impress.

The Red bulls on offer are real world bulls that are a commercial cattleman's delight. Many are fullblood factor and certainly offer many great traits purebred and fullblood cattle are known for. This is a really neat opportunity to step into a set of bulls that will offer equally as much maternal upswing as they do feed conversion and yield to a calf crop.

The Black bulls are the strongest set of this colour they have ever had and are impressively deep ribbed and powerful. The steer calves sired by these black bulls will be the type to top the market and the heifer calves will be the front end replacement type.

The purebred heifers available are your once a year chance to acquire a female with the RWR prefix. These females are carefully selected to represent both the powerful sire groups that mate to the bulls and the proven and consistent cow families that back the program.

The pens of commercial heifers are some of the very best you will find anywhere in Canada each year. The large commercial cowherd at RWR provides them the availability to sort together groups of consistent and uniform heifers that are extremely powerful, hairy and attractive.

We recommend planning now to be in person for this exciting set of Simmental cattle. The bulls, females, people and atmosphere are not to be missed. We highly encourage you to reach out to Darren or Josh to visit about the sale cattle and have them help point you in the right direction on some options that will work best for your operation. If any of us listed from Bohrson Marketing can be of any assistance, please don't hesitate to reach out as we would be pleased to visit with you on this stout set of cattle and represent your bidding and buying needs.

DEVON WHITNEY

joined us in October and quickly became a huge asset with the day-to-day workload around here. Thank you, Devon!

DELIVERY

OPTION A: Bulls picked up at the sale will receive \$100 off per bull.

OPTION B: Free delivery in Alberta or Saskatchewan. Cost shared to any other destination. Delivery will begin approximately April 1st. Bulls staying at the farm must be insured.

HEIFERS: Purebred heifers will be delivered if needed. Commercial heifers should be picked up sale day or shortly after sale day.

SIGHT UNSEEN

If you are unable to make it to the sale, and are interested in the bulls or females, give us a call and we can discuss. We will be more than happy to discuss your programs and try to answer any questions about our sale animals. We will refer you to our sales staff to represent you on sale day. For sight unseen purchases we guarantee satisfaction upon delivery.

IN HERD SEMEN INTEREST

Red Willow Ranch reserves the right to collect 100 doses of in-herd semen from every bull in the offering. This is to be done at the new owner's convenience and the seller's expense.

BREEDER'S GUARANTEE

No guarantee is given that semen collected from sold bulls will freeze.

Wetilionist Tole

Heifers and bulls alike represent a great investment into the future generations of your herd, as such they are animals that we want to perform for many years to come. Similar to bulls, heifer development relies on proper balances between natural proteins and carbohydrates. This promotes maximum lean protein accretion (muscle development) which not only enhances the expression of the animal's genetic potential but builds the underlying foundation of muscle that will carry the animal through lactation and successful breeding seasons. To further optimize vigor and immunity of the animal, it is the balance between trace minerals that affects absorption and maximum cellular function. Macro minerals such as calcium, phosphorus, and magnesium are also adjusted for interactions with other minerals such as potassium, and balanced in ratios for optimal bone development. Additionally, these bulls were placed on a biotin program to ensure healthy hoof growth to ensure that he will walk the pastures and work in all situations.

A smooth transition from one operation to another as your new sire begins to work is important for his longevity as he performs in your herd for years to come. Thus, proper nutrition for the bulls when they get home is critical. We recommend that bulls are put on to a similar ration as the lactating cows they will be breeding for at least 40 days prior to turn out. For heifers we recommend increasing the plain of nutrition (by giving slightly more grain for instance) 21 days before breeding and again when the bulls go out to optimize reproductive success. We recognize that this is not always possible as animals may be breeding for early January or even on grass.

Therefore, Red Willow Ranch bulls and heifers will be on a high forage diet to match with breeding conditions as much as possible allowing for a smooth transition.

At Red Willow Ranch, all animals have been developed on balanced and monitored rations from calves on the dam through to what you see today. Hard muscle, under a layer of conditioning is required to sustain both bulls and heifers through this breeding season and many more to come. We want satisfied customers to recognize the time and development that goes into making good seed stock animals, and come back for many more in the future. It is the careful monitoring of these animals' development in cooperation with the nutritionist that makes them last.

CE BW WW YW MCE MWW Milk API TI 7.2 3.7 73.2 114.0 4.8 70.1 33.5 97.90 65.24

Mogul is everything we look for in a fullblood herd sire and after seeing his 2nd calf crop develop, it's proof of what he brings to the table in terms of style, colour, and overall consistency within his progeny. The group of bulls sired by him is the most uniform group we feel we've offered on the fullblood side of things in a long time. They are similar in pattern to Mogul. They're sound, come with some stretch, and of course have that heavy haircoat and deep colour we strive for. They're incredibly useful bulls that calve like a dream. We've really enjoyed watching these Mogul bulls and heifers develop over the last couple years. Mogul has matured into an extremely impressive herd bull. Pictured here as only a 3 year old, it exemplifies the sheer thickness and muscling he possesses.

Sterling's calves have thoroughly impressed us, exceeding our expectations. We purchased Sterling in hopes he would add his colour, length, and thickness to our fullbloods, and he did. He has a clean, extended front end and added that to his bulls as a bonus. We feel his calves are very versatile and right for the times. His females are fantastic!

SAJ **BOONE** 84J

Finding a fullblood heifer bull that checks all the boxes and then some is a feat, but boy we were happy to find Boone. He's a powerful bull but built right and knew he'd work on our heifers. We couldn't be more pleased with his first calf crop. Not only did he calve well for us, he also threw incredible colour, style, and mass into his calves. We appreciate this bull and his progeny for the balance, smoothness, consistency, and overall completeness of the entire group. Boone really adds an impressive loin and top to his bulls. If there was ever an award for "best behaved in the picture pen," his sons would win first place.

Calves will be registered early February.

A bull that needs no introduction around here, but deserves one anyway, RWR 16B. Back by popular demand, are a set of sons that reminded us just how great of a sire he is. The past 16B sons have been so well received, throwing growth, tons of hair, dark red colour, and solid structure. RWR Outstand 16B is an absolute tank of a bull, a heck of a breeder, and has been an incredible asset to the herd of females we've put together on the ranch. Many of our high selling bulls go back to 16B females.

POLLED PG1280749 SBMC 19G CE BW 116.9 55.4 15.5 124.99 7.7 79.7 4.2 77.80

Another veteran around here, Heritage did it again with the group of bulls and heifers he sired this past year. Extremely good-footed, powerful, deep, thick, and probably one of the best breeders we've had on the place, he's done a fantastic job. His calves are repeatedly some of the heaviest, highest performing, while keeping the females feminine and highly productive.

POLLED PTG1342238 BORR 327H MAR 22.20 CE MCE MWW 127.7

We purchased semen on Cinderella Man to greatly influence our red program. His dam, WFL Sage, has done great things within the breed and we wanted to add more of her influence into our program. After seeing him at stud we were quite impressed with his structural integrity and appreciated his width of top and the performance he possessed. The Cinderella Man progeny are stylish, clean-fronted bulls with great hair and a prominent hip. His replacement heifers carry eye appeal and pen presence. The first daughters we've calved are truly exceptional.

WHEATLAND **DIMENSIONAL** 1147I

POLLED FEB 9, 2021 BPG1382130 LER 1147J CE BW ww YW MCE MWW Milk ΤT 4.2 99.8 149.4 2.4 69.4 19.5 107.79 80.59

Given the opportunity to buy in as part of the semen syndicate on this incredible bull has been advantageous for us. His calves are something we've never seen, with their profound depth, bold look, and off the chart performance. The bulls are a very consistent group, offering incredible style, mass, and easy doability. His females have left us speechless at times, with their capacity, depth and femininity. If you're in need of something unique, or "extra," look no further.

IPU **HIGH ROLLER** 25J

JAN 14, 2021 POLLED BPG1370002 IPU 25J CE MCE 121.3 6.4 68.9 26.0 124.38 78.64

We are excited to bring the first set of calves to sale off our purebred calving ease herd sire, High Roller 25J. We really appreciate this bull for his hair - every calf is born with incredible haircoats and as I write this in -45 degrees, it sure is a good thing they are! 25J is built right, smooth fronted, soft shouldered, and clean in his lines. His females are some of our top end heifers, and we've decided to part ways with a couple of them in this year's sale. He will be used heavily again in our program.

Calves will be registered early February.

3.0

80.9

We purchased 185D a few years ago from the Erixon program and he's worked in both our purebred and commercial herds. Impact 185D throws easy doing, functional cattle that would compliment just about any program. His females are solid structured, great milkers that are just coming into their most productive years.

• Dilutor free

- Kicking off this year's bull offering with a standout fullblood off Mogul 42H
- Structurally sound, full of power
- Long bodied, deep red, stylish and hairy
- Thick across the top and impressive to the analyzing eye
- Big footed, great disposition
- Dam is a moderate framed, tidyuddered female that stems from one of our most productive cow families
- Happens to also have some maternal 'greats' in his pedigree such as Rio Grande, Country, Smithbilt Molson, and Anchor T Impact
- Tough to fault, he'll do well for the industry
- A top performing Mogul son born at 86lbs with a WPDA of 4.02
- He is worth your time!

10L is long spined, fancy, and clean

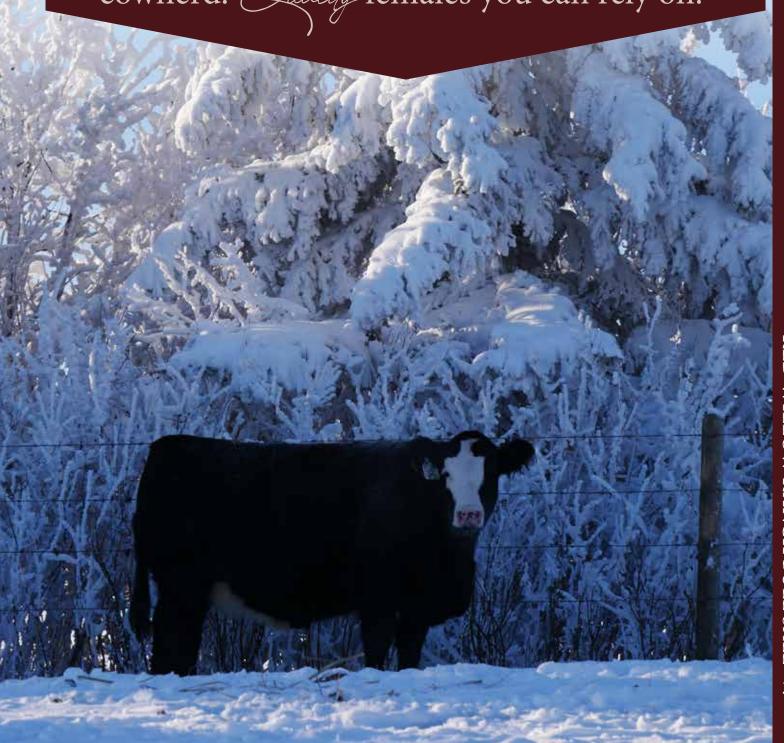

He's great on the move, structurally sound and covers ground

Raised by a haired up, fancy dam with a great udder, she's got a bright future here

Purebred & Commercial

HEIFERS

"The foundational building blocks for a profitable cowherd. Quality females you can rely on."

· Hetero Black, Homo Polled

- The only Dimensional heifer on offer this year and the first one to sell in Canada, she's a showy one!
- Raised by a super feminine black baldy cow that we purchased from Wilcox Simmentals, she's got the recipe to become a very fancy, productive momma cow
- Angular, supreme neck extension, feminine boned, and structurally sound, she's one you'll want to take a serious look at, especially if you're hitting some halter shows
- The Dimensional heifers have blown us away with their depth of body, capacity, style and overall 'dimension'

· Homo Black, Homo Polled

- A real sweet Caliber daughter has us wondering why we are parting with her
- The Caliber females have been extremely well received within the industry, consistently making their way to the top in the show ring, but also setting themselves up as foundational herdbuilding females
- Lady 89L is capacious, soft-made, has tons of style, great teat placement, and a pen presence that demands your attention
- Born to one of our favourite baldy Beast Mode 305D daughters, 89L is worth a serious look!

Homo Black, Homo Polled

 Another fancy black beauty we aren't sure we should be selling, but really wanted to bring some special ones to sale, and so here she is, Wish 11L

 Mothered by a powerful McIntosh cow we purchased as a bred from the Border City Sale in 2022, they're a pair we probably should have hit the show road with

A twist on pedigree, sired by CLRS Guardian 317G, the \$85k selection in the 2020 "Bred For Balance" sale, she will no doubt add something special to your program

Balanced, soft in her make, great hair

She's pear-shaped, feminine and smooth in through her front

Hit the show road with this girl!

- Youngest heifer on offer, don't overlook because of age
- She's super coloured
- Setting up to be very productive
- Dam is a powerful cow, blood red in colour, and has given us some really great progeny over the years

Maternal Sib JJT 53J

- Functional cattle that work, she should add length and pigment
- Maternal brothers have sold to Spring Lake Simmentals and Bar Crossroads Ranch
- Lot 83 is a maternal sister to Lot 16's dam, **RWR 101F**

Commercial Heiters_LOTS 84-94

This year we have decided to once again incorporate some commercial females into our sale. We feel the females on offer are a very strong, powerful set of heifers. They possess big-time volume and capacity, great haircoats, and should develop into very productive females with a bright future. They are sired by top end angus and simmental bulls. Heifers are on a full herd health program and will be palpated for breeding soundness prior to sale. Heifers will be sold in pre-sorted groups on sale day.

If you wish to stop receiving catalogues from BMS, please email jodi@bohrson.com or call/text 403-519-3515 to be removed from the mailing list
