WELCOME TO
PREMIUM PICKS
SIMMENTAL FEMALE SALE

ON OFFER **PREMIUM** PUREBRED & COMMERCIAL SIMMENTAL GENETICS

DECEMBER 11, 2024
AT AG-LAND FARMS KENTON, MB

Welcome to the first annual Premium Picks Simmental Female Sale. Now that summer is over, and fall is into full swing, it is time to look at selling some females. Over time we have been building up our numbers and now the plan of hosting a female sale is about to happen. I would like to thank Scott and the Bohrsen Marketing Team for working with us and making the dream of hosting our own female sale a reality. We are very excited about this sale and very honoured to host a great group of consignors. We feel there will be something on offer for everyone.

For our first sale we have dug deep into our program and have a very nice set of bred heifers on offer. All these heifers we would gladly keep in our program, but we just cannot keep them all. We strive on keeping only the best heifers from when they are calves and make sure they have good strong feet under them, nice teat development and they must have nice dispositions. You will find with all our bred heifers that they are easy to work with. The heifers are bred to well known, proven, easy calving bulls and should fit into anyone's program. The heifers are fully vaccinated and have had both of their Scour Bos shots. Be sure to check out the videos of the heifers on cattlevids.ca.

We would like to thank all of our past bidders and buyers that have invested in our program and promise you there will be some females here you will like! We invite people to come to the farm and have a look at the heifers for themselves. They really are an impressive group, and we would love to give you a tour! Please join us on December 11th before the sale for lunch and some hospitality. Hope to see you there!

Sincerely,
Dana, Megan & Terron
Greg & Allyson

MEET OUR
CONSIGNORS

AG-LAND

SUNRISE

Welcome to the Premium Picks Female Sale for 2024. We are very excited for the sale. Grandpa Evan and myself, Duncan, have been selecting females out of current elite cow families such as Sammie, Hayleigh, Brooke and Tara, to build a small herd for the future. We look forward to sharing these genetics with you in coming sales. Thanks to Dana and Megan Johns for letting us be part of Premium Picks. Contact Evan with any questions at (306)745-7431.

Grandpa Evan Cuss and Duncan Kueber

BIG SKY

Our family here at Big Sky are very excited be part of the new Premium Picks Sale. Being the inaugural sale we did not hold anything back. We have consigned 2 bred females that definitely represent our program. A polled bred that comes out of one of our main donor cows and a horned bred that is a grand daughter out of same cow family. Again, proves how important cow families are to our program. We run a pretty busy lifestyle with both Amy and I working off farm as well as all 3 kids in hockey again this year. Austyn is in her final year of highschool with plan of attending college!! Taylor has toured the females offered and was super impressed and can answer any questions you have on them. Amy and I have no problem touring you or answering any questions you may have. The heifers will be fully vaccinated and will have their first shot of scour guard.

We really look forward to seeing and visiting with everyone at the sale! See you sale day!!

Trevor & Amy Peters

METSKE

Crooked Creek Farms of Rorketon, Manitoba and Lucknow, Ontario would like to welcome you to the First Premium Picks Sale. First off, We would like to Thank Ag/Land Farms for allowing us to be apart of this exciting new sale. We just moved to Manitoba last fall and wanted to bring out our very best heifers and we feel Cody has done just that. We feel these heifers will strive in whatever environment they are turned out in and make great herd cows. We look forward to seeing and meeting all on sale day. If you have any questions in regards to our offerings please don't hesitate to call Colton, he would be more than happy to answer any questions and show the heifers off.

Colton Metske

JOYNT

On behalf of myself and my family, I would like to welcome you to the Premium Picks Female Sale. Most importantly, I want to thank Ag-Land Farms for the chance to be a part of this sale. We are a family run, commercial Simmental herd located north of Alexander in the Assiniboine Valley. We strive for functional, productive cattle that will thrive in any environment. We do not creep feed, so the weaning weights are strictly a combination of mother's milk and good native grass.

We're very proud of the three bred and seven open heifers we have on offer. I believe these females will go on to do great things for their new owners. All the females are sired by our proven herd bulls. The three bred heifers are all exposed to Oakview Kahuna, who shown himself as a calving ease specialist that adds a lot of growth to his calves. While we are a commercial herd, we are also big believers in cow families. When asked to be part of this sale, we wanted to showcase this belief. The 45L and 18M females are maternal sisters off our great 65E cow family. Our 65E cow family has, and will, stand the test of time.

If you have any questions about our females, please don't hesitate to call and ask. I would be happy to answer any questions and talk about the females we have on offer.

Joynt Cattle

GERRARD

Welcome to the Premium Picks heifer sale! When Dana & Megan said they wanted to do something different this year to market heifers we couldn't help but jump on board and join them. We are excited about the group of heifers we have brought. The heifers Cody picked for the sale are right off the top of the bred heifer pen. Backed by a cow herd that we have built and has worked well for us over the years. Don't hesitate to call if you have any questions. Looking forward to seeing everyone sale day!

Darryl Gerrard & Family

Lunch will start at **11:30 am**

Sale Time **1:00 pm**

WELCOME FROM BOHRSON MARKETING

Please accept this as your personal invitation to join us for this new, exciting sale as a real highlight of the 2024 fall female sale run. On behalf of the Ag-Land Farms program and their consignors, all of us at Bohrson Marketing welcome you to the Premium Picks Simmental Female Sale near Kenton, MB. This new venture is sure to be one of the must attend events in Manitoba this fall and will have a little bit of everything for everyone.

The Purebred bred heifers on offer have a tonne of pedigree behind them with phenotype to boot. These females are easy doing, with a real "cowy" look to them. They are bred for production and are the kind to build around. The papered Fullblood bred heifers are small in quantity but extremely high in quality. One polled, one horned, both bred early to the polled Ferrous bull. These females are big bodied with a great look to them. The offering proves diverse as we even have a powerful production cow on offer in the prime of her life with similar patterned heifer calf also in the sale. The group of open heifer calves are at the top of their contemporary groups and are a result of some exciting proven and

new genetics. The deep set of commercial cattle on offer both bred and open are as good as anywhere as you'll come across this fall. They uniquely have pedigrees behind them that are recognizable and in many cases carry the same blood as the purebred cattle on offer.

We do know if you make plans to join us for sale day December 11, 2024 at Ag-Land Farms you will not be disappointed. The cattle, people and hospitality are top notch. Be sure to give any of the folks selling cattle a call prior to visit about the offering. If for some reason you cannot join us, feel free to contact the staff at BMS to help if your selections. We would be pleased to give you an accurate, unbiased appraisal of the offering. We hope to see you near Kenton!

*Best Regards,
The Bohrson Marketing Team*

lot 1 – Homo Polled Hetero Black
 – A DMJ War Zone 13H daughter we are really excited about and one that is really hard for us to sell.
 – Nicely made from front to back.
 – Great head, cleanly made through her front 1/3 into a big sweeping barrel with lots of length back to a big rear quarter.
 – Udder is nice and square with ideal teat size.
 – Ag-Land Farms would like the right to flush this female at the new owners convenience and our expense.
 – DMJ 15L has a great set of EPDs for those who are interested in numbers.
 – 100k tested and parent verified.
 – In vets opinion 15L is carrying a heifer calf.

AI bred March 27/24 to SRH Hannibal 5H (Safe)

DMJ GOLD RUSH 2H **DMJ MISS 17D**
BEE NYDAM 836F MRL MISS 2416Z

\$7,000
Chris Moore

lot **19** – Homo Polled Non Dilutor
– A DMJ Gold Rush 2H daughter with really good natural muscling yet is still feminine.
– 147L has great udder development.
– Gold Rush females are all very similar.
Observed bred March 26/24 to MRL Rip Zone 42J (Safe).

lot 20 – Polled
 A female like this does not make it to auction all the time. Physically and genetically, she is completely stacked, then add her being polled the positives just keep rising. Analyze 1L and take a look at the length of spine and barrel that she has then step back and take note of her feminine front end and neck. Examining her pedigree, you will have a hard time finding a fault. Her sire is a homo polled son of Champs Bravo who so many breeders had success with and still find females going back to him. 43B is in our donor program and every year, whether natural or embryo, her calves come to the top of the pen. A direct daughter of the great Laredo out of a Jeremiah dam, this combo has worked wonders in our herd. Being bred to the amazing calving ease homo polled Keet's Ferrous just tops everything. His calves come easy, have lots of vigor and are marked up dark cherry red with lots of pigment. Take this opportunity to take your fullblood program to the next level with this top-notch female.
All Bred to Keet's Ferrous 26F on March 27 (Safe).

 BIG SKY BALLY 43B

lot 21 – Horned
 If you check out the pedigrees in both females you will start to notice some similarities and will show you why cow families are so important to us here at Big Sky. 27L is a granddaughter to the great 43B cow described in our other lot, 1L. 27L Braddock dam is just coming into herself here at Big Sky having her 3rd calf this coming Jan and she has impressed us all through her development. 27L is guaranteed to bring you top end bulls and females that look just like her. Lots of muscle, length and middle, and a sound set of feet and legs. Being bred to the homo polled Ferrous bull guarantees you a polled calf that should come with the pigment and cherry red the ferrous tends to throw. It will be either a marketable seed stock calf or something for the keeper pen. Don't pass her up.
All Bred to Keet's Ferrous 26F on March 24 (Safe).

Dam Big Sky Jocelyn 17J

lot 22 – Polled
 Acquired from Bonchuk's Fall Female Sale in 2021, where she was one of the high sellers, and has turned out to be a moderate framed, highly productive cow with a good udder. This year's calf weaned at 800 lbs at the end of August. It appears that she will follow in her dam's footsteps. When asked if we could add her to the sale it was tough to let her go, but we want to keep our herd small. She was bred on April 24th to Sun Rise Everest 32F. This pair won Reserve Champion Female at the Manitoba Simmental Field Day this past summer, which hosted approximately 70 females. A special thanks to everyone's hard work in organizing this well done event! Great job!
