ANGUS • CHAROLAIS

It is with great excitement that I am writing this welcome. Over the last few months of pictures, videos, and cataloging, it became very evident that our Charolais herd had reached the benchmarks we were striving for. Looking at cow families and remembering our goals for each, stirs a great deal of emotion. The Southland herd achieved exactly what I had envisioned and it fills me with great pride to put them on the auction block to both further the breed, but also as foundational females for their new homes. Of course, there is the mixed emotion of watching years of hard work and devotion be sold off, but with the overwhelming work load and cost of running three purebred breeds, something had to give. We will still remain adjacent to the Charolais breed as Claire has a soft spot for those white heifers in her junior showing career. As well, we will continue to use white bulls on the majority of our commercial cows. The cattle & bull selling market are at an all time high, and opportunities to buy females selected for this market seldom come around. Take advantage of the opportunity to further your genetic base, and from all of us at Southland, welcome to our beautiful herd.

Shane & Lexi Cadieux & Family

Southland Cattle Co.

@southlandcattleco

WELCOME FROM BOHRSON MARKETING SERVICES

Welcome to the Southland Charolais Complete Dispersal, it is our privilege to welcome you to what promises to be one of the most significant cattle events of the fall.

There are certain programs that become more than simply a herd. Through years of vision, discipline, investment and an unwavering commitment to quality, they become recognized names within a breed — and, ultimately, within the broader beef industry. Southland Charolais is one of those programs.

The opportunity to offer the complete Southland Charolais herd is an extraordinary one. Built by Shane and Lexi Cadieux and their family, Southland has assembled a powerful collection of genetics through the development of cow families, the acquisition of proven females, and the strategic use of some of the breed's most influential sires. The result is a herd that is not only impressive on paper, but one that has consistently demonstrated the ability to produce cattle that perform, compete and create value.

Throughout this catalogue, the depth of the program becomes increasingly evident. From the Ruplemintz, Berkly, Wilma, Rowana, Go Go Girl, Good By Girl, Queen B, Nakita, Butter Tart, Golden Girl and Lady families, there is an incredible concentration of proven maternal genetics. These are females with the feet, udders, disposition, productivity and longevity required to build a cow herd for the future — while maintaining the phenotype and performance that have made Southland cattle so recognizable.

The herd bulls are equally impressive, highlighted by cattle such as PCC Husk 218K and SVY Stillwater 312L, alongside a deep selection of bred

females, young females, herd-building cow families, embryo packages and semen opportunities. The offering represents much more than the purchase of an individual animal; it represents the opportunity to acquire pieces of a program that have taken years to develop.

What makes this event particularly important is the rarity of the opportunity. Complete dispersals of a program with this level of genetic depth, reputation and consistency simply do not come along often. For Charolais breeders, commercial cattlemen, show families and progressive seedstock operations alike, there are numerous avenues to participate and build upon what Southland has created.

As sales management, we are honoured to be involved in presenting this historic offering to the industry. We encourage you to study the catalogue closely, tour the cattle, visit with the Cadieux family and our sales team, and identify the genetics that can have an impact on your program for years to come.

On Tuesday, October 27, 2026, at the Bohrsen Marketing Services sale facility in Olds, Alberta, an important chapter of Southland Charolais history will come to the auction block — and a new chapter will begin for breeders across Canada and beyond.

From all of us at Bohrsen Marketing Services, thank you to Shane, Lexi and the entire Cadieux family for entrusting us with the marketing of this exceptional set of cattle.

Welcome to the Southland Charolais Complete Dispersal.

LOAD OUT AND CANADIAN DELIVERY

Load out and delivery is the responsibility of the purchaser and will begin immediately following the sale. Contact Riley (639-213-7777) or Kyle (613-848-9150) at Bohrsen Marketing if you require assistance in getting your cattle hauled after the sale. All cattle must be picked up by November 1, 2026 unless prior arrangements have been made.

USA DELIVERY

Southland will deliver US cattle to Billings, Montana, at which point it will become the responsibility of the purchaser to make further arrangements. All females are guaranteed exportable and Southland will incur the cost of health work.

TERMS

The terms of the sale are cash, cheque, or E-Transfer payable at Par. The right of property shall not pass until settlement is made. Every animal sells to the highest bidder, and in cases of disputes, the auctioneer's decision will be final. Announcements made from the auction block will take precedence over the printed matter in the catalogue. All settlement is made with the clerks of the sale before any cattle will be released. Current exchange rates will be announced sale day. All monies are in Canadian Funds.

HERD HEALTH

Cows: All cows are vaccinated annually in December. At this time they receive Cattlemaster Gold FP5, Tazvax 8, ScourBos 9, and Bimectin pour on. They will not have received their December vaccination prior to the sale.

Bred Heifers: All have received their first dose of Vibrin in March of 2026. Their calf vaccines in 2025 are the same protocol as our 2026 born calves.

2026 Born calves: Nasalgen-3 PMH at one week of age.

Spring 2026: Cattlemaster Gold FP5L5, Vision 8 Somnus with Spur, and ivomec injectable.

August 2026: Cattlemaster Gold FP5L5, Vision 8 Somnus with Spur, and Bimectin pour on.

All cattle have been 100K tested.

Sells open and ready to flush

I can't say enough about Rumplemintz. From the day we picked her up, she has touched all of our lives with her incredible personality. Her show record proceeds her, being the reigning National and Agribition Reserve Grand Champion Female. A Charolais female's worth is only truly measured by whether she can raise a big, stout bull calf. Minty did not wait around to show the world what she can do! She laid down an absolutely perfect udder, calved a beautiful bull calf, and the pair has been turning heads ever since.

This was a strategically planned no breed so that we could acquire a bank of embryos, which sell as Lot 84 and 85 plus recipients Lots 82 and 83. This spring we did a conventional flush and Minty knocked it out of the park with 14 #1 embryos. Next, we did a no-stim flush and she froze 17 embryos. Being that her last flush was a no-stim, she will not be full of hormones for the next owner.

Inheriting his tremendous personality from both his parents, Junior Mint exhibits the length, thickness, and quality of the Stillwater calves. A great breeding bull should always be backed by a great cow. Well, between his dam and Stillwater's dam, amongst the many other great females in his pedigree, Junior Mint should be a breeding great.

We will guarantee Junior Mint 64P to pass a fertility exam by May 1, 2027, upon an approved wintering program.

The pair has already qualified for the Agribition Supreme by being named Supreme Female at the Perdue Cattle Show. They will be entered to both Farmfair and Agribition. The bull calf must remain on the cow through Agribition.

A bull who made a pile of friends last fall out on the show road. His easy going nature and length of body, all while adding that super cool look, is what drew us to him. His calves on the ground are what is making him a breed legend. Backed by a tremendous cow and cow family at the famed Serhienko herd, it's not an accident why many of his daughters have risen to the top. Stillwater is very consistent in his birthweights and there is a set of bull calves off of 2 & 3 year olds at home that will turn a lot of heads this winter and spring!

Selling full possession and 100% semen interest

She is coming 12 and looks like she's 4. All the basics must be there to last this long. We purchased her out of the Moose Creek Dispersal in the hopes of getting a few daughters and flushing her when she finally came in open. Well, that day has never come! She's coming to the sale with a tremendous set of daughters and granddaughters. Check out the power in both her heifer calf at foot and her bred heifer.

THE HARD TO GET ENOUGH FAMILY

LOT 14

Exposed April 20 to June 22 to Southland Boomtown 69N. Observed bred April 27.

One of the most complete females. A definite feature bred heifer. You can see brood cow with style written all over her. The unlimited potential of these Stillwater daughters is second to none. Bred to an outcross calving ease Padra son, her first calf could be your next herd bull!

LOT 15

Exposed March 24 to August 4 to PCC Husk 218K. Observed bred April 23.

A good young daughter of 7H who keeps cranking it out of the park with bull calves. A hard working cow with one of the top bulls in the bull pen this year.

Exposed March 24 to August 4 to PCC Husk 218K.

There's a lot that can be written about the Buttercups that all started with 307H. She's the hairy, loose hided kind that the industry seeks. At Southland she is the most influential cow through her many daughters and granddaughters. When feet, udders, disposition, and productivity are right, daughter and granddaughter retention just happens.

The original Adele, who has become our resident cash cow. She has a big boned, powerful, hairy bull in the bull pen this year. Her 2024 bull was one of our high selling bulls and a Player's Club finalist. A great, sound female with a great pedigree.

Southland Fame 33M
Son

THE ADELE FAMILY

LOT 40

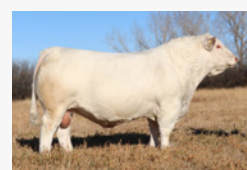

LOT 40

Exposed March 24 to August 4 to SVY Stillwater 312L.

Can't say enough about the Tri-N Arctic Blast daughters. The sons always sold well and were extremely popular with commercial cattleman. The daughters are big, broody, loose hided females that milk extremely well with good udders. Lot 40's first calf is in the bull pen and I encourage people to make the trip to Shaunavon to see him. He's an 84 lb. birth weight, PA free, homo polled bull who should be on every breeder's radar. This female absolutely is already donor material. Only in a dispersal do you get an opportunity at females like this.

Tri-N Arctic Blast 2158J

LOT 10

Exposed March 25 to August 4 to SVY Stillwater 312L. Observed bred April 1.

Here is a bred heifer we halter broke to show last year. Due to a little injury at the time she never made it to a show last fall. She is halter broke and quiet and truly a sale feature. Looking at the production of her dam and sisters, 13N is about as safe a bet as you can take. A truly unique buying opportunity as a show prospect with an interesting pedigree.

THE ROBERTA FAMILY

LOT 42

LOT 42

Exposed March 24 to August 4 to PCC Husk 218K.

A great buying opportunity. 16K's first bull calf, Southland Boomtown 69N, was one of our high selling bulls this spring to the Quinton's in Cardston, AB. Due to a slight breeding injury this spring, we offered to bring him back home and heal him up. In no time he was hand breeding heifers for us and made a full recovery. With the feet and udder on this cow, and looking at her current heifer calf, this female is donor material. Her first calf, Lot 43, was our top heifer calf in 2024 and is a feature female for this sale as well. This is the ground level of the Roberta cow family.

LOT 42A

Exposed March 25 to August 4 to SVY Stillwater 312L. Observed bred April 1.

If you want to make a name in the show ring, here is your heifer. Made right in every way. Many people who toured the herd this summer picked 28P as their favourite. Sound, attractive, feminine, and out of a productive dam. No one should be sitting on their hands sale day with this female. She'll have lots of friends.

What a trio of flush mates. Like peas in a pod these 3 girls pack a lot of punch with a little extra frame like their donor dam, Medonte Divine 20G. The productive history of 20G on both the bull and female side is second to none. The Holy Water cattle offer a no nonsense type that the commercial industry demands. These flush mates, all bred to Stillwater, are going to be foundational for their new owners.

THE SHEILA FAMILY

LOT 51

LOT 51

Exposed March 24 to August 4 to PCC Husk 218K.

A young female already making a big impact. Her first bull calf made his way into the lead off pen at our 2026 bull sale. This year her heifer calf made the show pen, but sustained an injury, therefore the decision was made to scratch her from the sale. But, what 76L has done on her first two calves proves what she'll do in the future. Truly a good young cow to find at the sale.

LOT 52

Exposed March 25 to August 4 to SVY Stillwater 312L. Observed bred April 13.

A maternal sister to Lot 51. What a powerhouse of a heifer here. Out of the outcross Padra bull, this heifer will make a lot of friends. Performance, bone, hair, and coming from a great uttered dam who stifled herself this summer. Do not miss this genetic masterpiece bred to Stillwater.
