It is our pleasure, on behalf of Bohrson Marketing, to welcome you to the 10th edition of Quality Control — a sale that has become one of the most anticipated events of the fall cattle calendar and a true destination for progressive cattlemen, junior exhibitors and seedstock enthusiasts.

Ten years of Quality Control has created an impressive legacy, and this milestone edition is a fitting reflection of what the sale has become. From the very beginning, the vision at Indian River Cattle Company has been to offer genetics capable of building programs, winning in the show ring and, most importantly, making a lasting impact in the pasture. That philosophy remains at the forefront of Quality Control X.

The 2026 offering is as diverse and exciting as ever. From elite show heifer prospects and proven bred females to herd-building cows, donor opportunities, a unique herd sire prospect and valuable embryo packages, there is an opportunity here for virtually every type of cattleman. The catalogue is filled with recognizable cow families, proven genetics and cattle that have already demonstrated their ability to compete and produce at the highest level.

What makes Quality Control particularly special, however, is the depth behind the cattle. The influence of cow families such as Darlin, Xcella, Sheila, Soda Pop, Hayleigh, Dream Lady and so many others is evident throughout the offering. These are families that have proven themselves in the show ring while maintaining the maternal value and functionality necessary to build the next generation of great cattle.

The consignors have once again dug deep and brought forward cattle they believe can make a difference. We are proud to work alongside the Elmhirst family and the entire group of breeders that make Quality Control what it is. The combination of people, cattle, hospitality and genuine passion for the industry is what keeps this event growing year after year.

We would strongly encourage you to make the trip to Indian River and experience Quality Control X in person. Come for the cattle, stay for the hospitality and enjoy what has become one of Ontario's great fall cattle weekends. For those unable to attend, the entire offering will also be available through DLMS, and any member of the Bohrson Marketing team would be pleased to assist with selections, evaluations or bidding.

To the Elmhirst family and every consignor involved, congratulations on reaching this 10-year milestone and on assembling another tremendous offering. We look forward to seeing friends, customers and cattlemen from across the country gathered at Indian River for Quality Control X.

Best regards,

The Bohrson Marketing Team

JUNIORS WE ARE HERE TO HELP!!

The YCS Classic is next door in Quebec and we'd love to help a young junior or a breeder young at heart experience the thrill of the hunt with an IRCC heifer. The National YCS Classic has become one of our very favourite summer events when it's in the east and in 2027 it will be again. Our track record at past YCS Classics is unmatched and we like nothing better than watching kids enjoy success with heifers from IRCC. We also have our junior incentive program to encourage youngsters and offer boarding options that include preparation for the YCS show as well as delivery. There is also an opportunity to work with our fun living team at the show that often involves initiating an intense and refreshing cooling off session (aka water fight) and perhaps helping our neighbors with their stall display. We are here to help with your next junior project and if you've never felt the hair on your back stand up, your palms sweat and the excitement of leading a dialed in contender towards the ring, give us a call.

Welcome...

Quality Control X is shaping up to be the biggest and most exciting sale yet as we celebrate a decade of offering herd building and breed changing genetics to the industry. A lot has happened in those short 10 years and it seems like just yesterday we were raising a couple of kids and then just like that Juanita's a Grandma. Then suddenly we have a graduate from Black Hawk and OSU in the show barn that has seen more livestock operations than you can imagine. Owen has a huge year of snow, hay, house building, vow swapping and Wade raising ahead of him. Somehow 100 cows went to breeding 285 this spring and thankfully this cow market has stayed vibrant and strong in recent years. And Quality Control has changed the face of the industry as well. It's extremely rewarding to open sale catalogues or check show results to see IRCC somewhere on those pages. Of course, there's a beloved red cow responsible for much of that but many others accompany her as well. Starting with the Bombshell who kicked off the inaugural sale (her niece starts this one), Cherry Bomb, Foxtrot, Fantasia, King George, Kaboom, Legit, Debutante, Hot Tomale, Hula Dancer, Glass Slipper, Delicious, Mesmerize and of course Darlin herself have all impacted the breed and will continue to influence future generations. The Angus division from QC IX has in the short time since blazed an impressive trail of success as Lifeline, Rose 508N Shedaisy 530N and RMCC Black Lady have all brought glory to their new owners. And that's always been the plan to offer competitive, high quality, functional seed stock that can hunt for championships but more importantly leave a lasting positive impression on the programs that support QC. Flip through the pages and see for yourself why the sale name holds true and recognize the opportunities available from front to back. Plan to participate in QC X, be it in the Junior Judging contest, the always entertaining presale gathering, online through DLMS or right in the front row for true auction excitement. If we can assist you in any way, feel free to reach out to any of the Elmhirst family, trusted sales staff or consignors and we will gladly help you out. Great time to be in cows. Hope to see you on October 4th at IRCC.

The much anticipated arrival out of the 2025 QC Lot 1 and \$88,000 valued high seller, this heifer calf was expected to be extraordinary and has not disappointed. Bold and buxom from end to end, she is packed full of red meat and still with a beautiful bald faced, maternal skull. Her dam was the elite standout in last year's sale with numerous contending bidders deep in the count, which truly is a testament to the quality appreciated on this stunning female. A huge caged, wedgy made long extended cow with tremendous power, femininity and a nice udder. .

We plan to campaign the pair this fall, have already successfully flushed and planted embryos out of Mesmerize. Enhanced by a shot of Darlin and backed by one of our original cow families that also produced the Lot 1 \$37000, Bombshell female 10 years ago that made a name for herself at Rancier Farms and Canadian Donors, expect this super stout, baldy to follow her dam to the donor pen after she kicks off QC X as Lot 1.

Owned with S4 Ranches.

This will be only the 3rd bull offered through QC behind King George and Legit so you might want to truly investigate the extraordinary opportunity looming here. A standout since birth even as a low birth weight 82 pounder, he always had that stout, boxy build and cool, cocky presence. Likely the very first son of the newest breeding sensation; Tokyo Rose, he is also backed by the famous Hayleigh cow family. Actually his beautiful, awesome uddered dam with 617P on side was the very popular YCS National Classic Champion Purebred Female in Nova Scotia. A herdsire that checks all the boxes for an impact sire with a fresh unique pedigree and impressive structure while being a low birthweight burly one, he could be the next go to sire for the heifer pen everyone is always looking for. actual BW 82lbs. Owned with Anita Doktor. Terms to be announced.

RIGHT TO FLUSH THE CANADIAN JR NATIONAL CHAMPIONS!

We are offering the right to flush 2 of the up and coming donors in our herd that are also the reigning YCS National Classic Champion Purebred Female and Champion Percentage Female. Two cows that with their bull calves were dominant and very popular at the Classic in Windsor we thought it would be appropriate to offer an opportunity for a progressive program to capitalize on the impact that either of these two cows have made and will make in the breed. The bull calves that helped these females also be declared Supreme and Reserve Supreme of that great event in the Maritimes will anchor our first ever planned Denver Pen of Bulls as we are confident that these guys need international exposure. Both cows calve in early January and we already have plans to IVF them ourselves to replicate greatness.

65M is owned with Anita Doktor.

The star of this year's show team at her first show at just 4 months old she was selected All Breeds Jackpot Champion. She followed up as Champion Simmental a month later at the Tweed Qualifier and was also Reserve Supreme Overall that day at a very high quality show. All of the dams in this heifer's family have Royal Banners for 5 generations, which is hard to top and I wouldn't bet against this fancy lady adding the 6th. Sired by the \$700000 world record high seling bull at Hartmans, these two Alpha daughters in this featured choice lot are the absolute cream of the crop. Katie has 80 head and 4 breeds in the show barn, calving barn and sale lots this summer, and guess which one she says is the best one. Sells on Choice.

Heifer Calf Champion a couple times this year including at the National YCS Classic in Nova Scotia, the sisters to this gal have all been standouts. And with 8543U as their maternal grandma what else would you expect. Her last 3 sisters have averaged over \$22000 at auction and include the NYR 'Pick of the Crop', who was also the Junior National Calf Champion for Matt Albrecht, the Intermediate Calf Champion in Toronto for the O'Reilly family, and the QC IX, \$32000 high selling calf and Trillium Classic Calf Champion in both Ring A and B that now resides at Double Trouble in Nova Scotia. Promqueen is obviously of that same elite quality, is one of the first Datelines to be offered, and is an absolute pet as the 'Little Lewis' experienced in lobster country. 3/4 percentage female.

Betts x Broker x 8543U. What more would you want. This soft haired, soft made favourite red head is the combination of 3 of the most significant Simmental cattle in history. Her beautiful dam was the 'Pick of the herd' for Matt Albrecht out of NYR and mothered a bull sale feature last year as a first calver. The cow family history, glory, marketability and straight up greatness is documented earlier in the lot 5 heifer, that also testifies that this family just doesn't miss.

LOT 6A 3 Embryos out of Lace and the insanely popular Tangleflags also sell to capitalize on this potent and productive cow family. Owned by Matt Albrecht.

Very special lot on offer here as the first Hay City we are aware of to sell at auction and a super nice one with a stunning 2 year old dam. Funny story actually. The 'Behnke' girls all like good cattle and at Bohrsen's inaugural sale last December they all had the dam of this heifer circled as 'the one'. Katie, who had been working on her, verified it and the never ending family battle was on. Luckily we had Anita on our side and landed that female to add to our donor battery and boy she started her career with a bang on this one. Study the family, the data, the pictures, the structure and symmetry of this calf and tack on the sweetest personality and wicked hair coat to make this heifer, hard not to love. Owned with Anita Doktor.

Study the coolness available here in this moderate, chiseled, eye catcher that is awesome haired and a real pet. Her similar sister sold to Inspiration Farms as one of the fancy young baldies like this one last year. Just a March with a ton of upside and more proof that good things come in small packages.

Owned with Whiskey Lane Livestock

Bold structured, stout made junior prospect backed by the most prominent cow family at IRCC. Her 2 year old dam exemplifies the kind of mother cow we strive for with a tidy udder, sweeping rib and attractive balanced design. Plus she can raise one. Painted up how we love them, with extra power and mass for her age, she too might make the bus ride to Toronto later this fall.

This April born Kaboom female is attractive from the side, deep bodied and stout featured, putting together a well balanced look while still being sound and functional. What really sets her apart is her disposition. She is puppy dog quiet and would make an outstanding 4-H project for a young exhibitor. Her fault free milk machine momma is the kind I really appreciate as she is excellent footed, phenomenal uddered and trouble free. Whether you're looking for one to have some fun with next summer or a female to develop into a productive cow I think she has a lot to offer. We would be happy to take her to the Royal .Owned with Stevensons Show Stock, Adam Black & Bill Down

INTRODUCING THE HAWK TUAH

IRCC BOOMSHAKALAKA 434B

IRCC HAWK TUAH 409M

IRCC FLYING COLOURS 805F

The most recent IRCC raised stud to enter the bull battery, Hawk Tuah stems from what must be considered the most productive cow family on the place. His Stepping Stone dam has mothered 3 Bull Sale high sellers as well as the fabulous Agribition Xtreme Champion Hot Tomale who is actually his full sister and also the dam of Kaboom. (** and Promise Land 643P**). Hawk has always stood out with his cocky presence, extra flair to his muscle and tremendous balance. A many time Champion, Supreme Champion and already a Qualifier for the 2026 Royal Supreme challenge, judges often marvel at his foot size and shape. Valued at \$52000 when we sold half interest to Derrer Farms in Illinois, we expect he will be an impact sire on both sides of the 49th .

Big, Bold and Beautiful Baldy here! The lead-off heifer calf in our 2026 show string and the the most explosive heifer calf to ever come out of Black River!.. Over the past couple of years, the 'Caliber' females across the country have taken the breed by storm. This is no exception here with Black River Lexi 3P being a maternal sister to the 2024 Royal Reserve Grand Champion bull, Black River Lexor 5M. Her mass and phenomenal shape are sure to develop into a true bull maker. The striking baldy face and cat-like pace across the ring, put this heifer calf into a 'class of her own' as described by the judges at the recent Sutton and Barrie Fairs. Her dam, Barlee Lexi Lou 92G has produced numerous powerful progeny since day one and this bombshell will continue to add to the future 'Lexi' generations.

CE BW WW YW MM**3.8 5.5 95.2 142.4 12.9**

Here's a female that checks a lot of boxes. This powerful extra-age bred heifer is sired by NGDB Structure and backed by a tank of a cow that stems from our Captain MorganXLinne 33R herd bull. 33R being the mother of Olympian and the high selling mature cow when we teamed up with Rancier's and Canadian Donors. She brings plenty of power, depth and substance, with a calm disposition. She is setting up a beautiful udder and has all the makings of a productive, long-lasting cow. Bred to R Plus Mandate, this mating offers the opportunity to add even more performance and maternal value. These extra age females flat out work and should pay dividends for her new owner. Bred March 20 to R Plus Mandate

When we laid eyes on Hoya Saxa 215K in the fall of 2023 at the infamous Evolution Sale we knew she was destined to become the next exclusive donor for us and our partners at Dunmac Farms & Donovandale Simmentals. She was put straight into embryo production and has proven to be a prolific donor with an average of 19 embryos per flush. Hoya Saxa displays an unmatched phenotypical design. Her full sib KDP Miss Hoya Hayleigh has proven herself with a triple crown win south of the border and becoming a notable donor cow in Black Gold's program surpassing \$1M in progeny sales. 215K's first and only offering to date commanded \$2500/embryo in the World Simmental Sale in 2024. Here is your unique opportunity to create one of your own Hoya's paired to the \$210,000 outcross Tangle Flags, the red \$45,000 WFL Mountain View 4J or the popular show sire SO Remedy 7F. We truly believe any combination will leave a lasting impact on your herd. Consigned by Fusion Livestock. Stored at the farm. Guarantee one pregnancy

Great feet, an awesome udder and exceptional structural soundness, combined with look, balance, fertility, production value and sheer quality, best describe SVS Soda Pop 45M. She is an exciting young female with the pedigree, power and maternal presence to be a cornerstone donor. Soda Pop 45M is a full sister to the great SVS Justified 62K, a model beef bull admired throughout the industry for his impressive presence and ability to consistently sire structurally correct, big-bodied and attractive progeny. She is also a full sister to SVS Soda Pop 75K, an Agribition Division Champion. Soda Pop 45M carries the same power and design as these accomplished siblings in a feminine, maternally driven package. Her dam descends directly from one of the original Soda Pop flushes, representing a proven cow family responsible for high-selling females, influential herd sires and elite donors across North America. Four exciting matings are offered from this tremendous genetic package. The embryos by SWC Newsline 299N represent the first opportunity to acquire genetics from the \$150,000 Newsline, while the mating to Black Gold Will Power 11N provides the first-ever opportunity to invest in genetics from the \$370,000 Will Power. These two breed-leading young sires offer tremendous exclusivity and unlimited upside. The JWC Western Feel 354M embryos combine two highly intriguing pedigrees with the potential to produce progeny loaded with power, quality and marketability. The mating to Next Level should complement 45M exceptionally well, blending her overwhelming shape and maternal strength with his added look and presence. These exclusive matings offer a rare opportunity to invest in the proven Soda Pop cow family and one of its most exciting young donors.

KK JARR Missy 491M is one of the most unique and impressive Next Level daughters we have encountered. Exceptionally long-fronted, angular and elegant, Missy remains bold in her rib, big-hipped and equipped with the mass and dimension demanded in elite modern Simmental females. She combines femininity, power and flawless structure with added presence from her striking blaze face, making her a female we will be building around and promoting heavily into the future. These four matings offer something for every progressive program. This is your first opportunity to get genetics from the \$370,000 Black Gold Will Power 11N who adds an exciting pedigree with the Hayleigh cow family and tremendous potential to complement Missy's look and maternal strength. The sexed-female RF Caliber 014G embryos represent an opportunity to create daughters by one of the breed's most proven producers of high-selling, show-winning females. Mader Walk This Way 224B brings proven predictability, power and maternal value, creating a mating built for consistency and marketability. Ultra Tokyo Rose 17M is the most exciting up and coming bull in the biz and offers another exciting genetic combination designed to generate stylish, high-quality progeny with added presence. Missy's first calf crop has strengthened our confidence in her ability to produce with a handful of ET daughters that look impressive. With four distinct sire options, these embryos provide access to one of our admired young donors and the opportunity to build around genetics combining phenotype, pedigree and earning potential.

The "High-Stakes" Choice Lot: CNS Princess 2683P vs. CNS Dana 2679P

CNS Land and Livestock is thrilled to offer your choice of CNS Princess 2683P or CNS Dana 2679P. Both are sired by the renowned Brooking Radville and backed by two of our greatest, most established cow families. In the First Corner: CNS Princess 2683P

An elite show prospect with a super-attractive profile and an ultra-sweet front end. The Princess daughters always find a way into our own show string, and this heifer is no exception.

Note: If Princess is your choice, CNS Land & Livestock is retaining show rights until after the Royal Agricultural Winter Fair 2026, as she is currently Jackson's 4-H project.

In the Second Corner: CNS Dana 2679P

A true powerhouse female. She is out of a hard-working, two-year-old Reckoning daughter and traces back to the legendary Dana 2B—who, at 12 years old, remains the fleshiest, most fertile, and heaviest-milking cow on our farm.

Bid with absolute confidence on sale day. Whichever heifer you take home, you are adding elite genetics to your herd. If you can't decide, we won't blame you if it comes down to a coin toss! Both heifers vaccinated with Triangle 10HD and Tasvax and Parent Verified

MURRAY INCREDIBLE 82M

Selling pick of the “Incredible” heifer calves!

We were looking for an Angus herdsire in 2025 and that search led us to Murray Ranches. A very impressive cow herd and amazing pen of bulls to pick from. 82M was our selection. We used him heavily on all our best cows and we couldn't be happier with the resulting progeny! They are hairy, quiet, long hipped, great footed, and stunning on the profile. These 3 calves represent the leading cow families in our angus division. Lady Sandy's are highly maternal females with so much capacity and longevity. The Lucys are gorgeous, perfect uddered and low maintenance cows. The Eilizane's are from the Bar S herd in Kansas and out of their leading donor female. They are moderate, fleshy, good footed, long necked beauties.

We couldnt pick which heifer we liked the best so we thought we would leave that up to you! One for each Royal Winter Fair Division.
 The choice is yours!

8P is from outstanding cow family and sired by the number 3 bull for registrations in 2025 (Prolific). There are a few great females in the Angus breed that have the ability to be prepotent, predictable and just don't screw up and Persephone 8P comes from that kind of family. This calf has a little more jam and scope to make a show heifer for a few hours or a brood cow for years

This beautiful Black Angus heifer calf is flat-out FANCY! She's got that killer profile — gorgeous framed, extra long from end to end, and that awesome neck extension that gives her a striking, feminine presence. She's smooth made, balanced and carries herself with the kind of style that demands attention every time she walks into the pen. But don't think she's just another pretty face — there's some serious cow power behind this one! Her dam is one of the powerful females we believe in so strongly that we've put her into our flush program. We think this one has BIG-TIME future written all over her. The kind you'll be proud to lead out on sale day, even prouder to put in the front pasture, and one you might wish you had two of when she hits production. Don't sleep on this one — she's special!

RSKY 6540 MS INSTINCT 0065

Here's a solid-built Angus heifer calf that brings some serious substance to the table! She's stout made, deep bodied and packed with the kind of natural thickness, rib and capacity we love to see in a young female, while still maintaining the balance and femininity to make her stand out. Loaded with pedigree, she's a daughter of Bohrsen's donor female, putting a proven donor-quality cow family right at the heart of this young female. Then stack Coleman Mendoza on the top side — an exciting, big-futured sire that we believe has a tremendous amount to offer. Stout. Deep. Powerful. Donor backed.

This is the kind of female you buy with the future in mind. She's got the build and genetic backing to develop into a big-time brood cow and the kind you'll be awfully glad to have working in your program when her first calves start hitting the ground. A serious cow prospect here — don't let this one slip through your fingers!

Talk about a pedigree on this gal! Sired by our walking bull who is siring ultra thick big boned progeny with the right amount of look to make your neck sore. Her dam is a favorite around here, our first purchase from the infamous Griswold Cattle program, she never has a bad day! 9P's dam is sired by the bull's name who is so nice you say it twice "Moto Moto" and out of a beautiful Style cow. Hard not to admire this female for her overall thickness and dimension at this stage in her life, I can't wait to see her as a heavy bred! Take a look!

Being raised by a first calver, needless to say her momma got the job done! This is one that has the structural build and integrity built for the long haul. Sired by many time champion sire Bruno, she has all the look and refinement that we expect him to produce. For being greener at picture day, she reads to have the right kind of center body shape and the right kind of maternal muscle shape. I think her best days are next fall as a big bred. Take a look here she'll be sure to turn some heads next fall on the halter!

Upper Glen Queen Latifa is a very well made individual. Her great Grand dam is a donor at Lazy JB ranch in CO. And the dam is easy to spot at Upper Glen with a flawless phenotype. This one will make a cow as well as be a very competitive show heifer for any junior looking to do so damage next year. She has the showing look for sure and her pedigree is stacked with great Sires Roundtable, Style, and now Conley A1. She is a 4H project this year so show rights are reserved until after this year's Royal Winter Fair

UPPER GLEN REBBA 13W

I do love the Reba's and this one is very cool. She is a mid March calf that maybe the quietest individual we have ever had. She is a very exciting showing prospect that will get you away from the heavy hitting January calves. She is perfect for a junior that maybe a bit nervous in the showing because this one is gentle. Just because she is docile doesn't mean she doesn't have the look she sure does. Reba's have extreme hair growth those cool fuzzy ears.

Show rights are reserved for this year's Royal Winter Fair.

Red Burnham Ridge Bayberry 19N has been a favourite since the day she was born and one that hurts to sell. She has excelled in every stage of her young life. A stunning profile, super feminine female that combines balance and power. Her maternal sister WFX 17M was the first Red Angus female to walk through the IRCC sale ring last fall, proving the maternal worth of her gorgeous young dam 541K. We believe 19N holds all the pieces to produce performance and elite quality, making her an asset to any herd she joins. Don't miss a great opportunity here!

Here's the power punch right off the top of the bred heifer pen at Walsh farms. 60N is long, big bodied and highly maternal. She has impeccable teat size and placement, a great attribute her sire stamps on all of his daughters. Hudson 156H was the \$32,000 high selling bull from Six Mile Ranch in 2021. His daughters don't leave the replacement pen here, making this a great opportunity to grab a female that we know will make an impact.

Few cow families in the Angus breed carry the history, consistency and championship credentials of the famed Proven Queen lineage, and PVF Proven Queen 3127 represents another exciting generation of this powerful maternal line. A daughter of STAG Good Times and the highly proven PVF Proven Queen 8256, 3127 combines tremendous look, body, structure and maternal quality in an impressive young donor. She was successfully campaigned by Gracie Bohrsen, highlighted by standing second at the National Junior Angus Show to the eventual Division Champion. The maternal strength behind 3127 is exceptional. Her dam, PVF Proven Queen 8256, was a many-time champion including Reserve Grand Champion at the NAILE and has developed into one of the most prolific donors at Prairie View Farms. Her grandam, PVF Proven Queen 5250, was Reserve Grand Champion at the Atlantic National, while her full sister, PVF Proven Queen 3034, was a \$55,000 sale feature. Generation after generation, this family has produced champions, high sellers and influential donors. Two exciting matings are offered from 3127. The UDE New Heights embryos combine one of our favourite young Proven Queen donors with an exciting sire, while the sexed-female Gateway Follow Me embryos offer an opportunity to create daughters specifically designed to carry this legendary cow family forward. These are the kind of genetics built around predictable maternal power, proven show-ring success and long-term donor potential.

Coleman Donna 4160 represents our very best as she is of elite quality and is backed one of the most valuable and proven cow families in the Angus breed. She is a direct daughter of the remarkable \$750,000 Coleman Donna 8146 and granddam is the legendary \$290,000 Coleman Donna 714, stacking two of the most influential females ever produced in the Coleman program. The strength and consistency of this genetic combination are further demonstrated by Coleman Donna 4161 and Coleman Donna 2462, full sisters in blood to 4160 that commanded \$140,000 and \$100,000, respectively. The sexed-female embryos by SAV 004 Density 4336 offer a timeless mating that combines the maternal excellence of the Donna family with one of the breed's most proven and respected female-making sires. The sexed-female mating to Rose MC Encore 0463 provides another exciting opportunity to build around the predictability, quality and earning potential of this elite cow family. Coleman Avalanche 487 is one of the best in the business and brings added power, substance and performance to a pedigree already loaded with maternal strength, while Conley DS Clear Cut 0510 offers a fresh and highly marketable genetic combination with the potential to create cattle with added look, balance and presence. With four outstanding mating options backed by generations of proven production, these embryos offer the opportunity to create elite donor females, powerful herd sires and the kind of high-value progeny capable of making an impact in any progressive Angus program.
