Welcome
FROM DIAMOND T

It is a huge honour to be able to welcome you to our 2026 Matrons of Mountainview Open House & Sale; the 2nd annual is as exciting as the inaugural with fun genetic matings, exciting potential show heifer and herd matrons looking for their place in a new operation. We are happy to host an Open House on October 25th with A DLMS Farmgate close out on October 26th.

We are continuing to do elite embryo work allowing us the opportunity to offer a larger number of females for sale while building the future of our own herd. Bred females, preg-checked and safe in calf; with due dates listed in the catalogue.

We are often asked why we sell females? Why not keep all your top-end ones and sell a few older cows. Don't get us wrong, we do that as well, but we have worked extremely hard to increase the genetic diversity and high-end quality, which give us the opportunity to share the "top end" ones with you. We would be thrilled to keep them all but the feed pile and our manpower at calving time, tells us we can't do that. We have gone over and culled our replacement pen; those have gone to town; these heifers are 100% what we would love to keep in our replacement pen if we had the feed and ability to calve them all out in the winter of 2028. Now we will get to witness these incredible females work in your incredible herds.

Bred heifers are always hard to part with, when we spend so much time and energy getting them to this point. This year without a cow offering that we felt fit in well, we decided it was time of offer more than just the pick of the heifers. These 5 bred heifers are no doubt ready to make another breeder a Herd Matron.

Over the years we have culled hard for temperament, structure, fertility and honest production; we remark each spring at the bull sale that we can't afford to creep feed all the bears in the west country; so, the cow herd is culled that way! We are proud of the cattle we raise; honest and hard working. No extra management because we spend too much time driving to 4H, cattle shows and hockey arenas to over manage the cow herd.

The cattle industry seems to remain strong; profitability in our business is bringing a new level of excitement to the forefront. Making the investment in strong, dependable and proven genetics is an easier decision than ever before. So, let's make that investment into our cowherds with that new donor prospect, foundation breeding piece or significant building block.

Please come join us on October 25th for our Open House where you can tour the sale lots, cow herd and 2027 Bull Sale pens. We look forward to hosting you at our own yard, just a couple miles southeast of the sale yard. Plan to come for the day where we can host you with what everyone has come to know as Diamond T hospitality!

Welcome FROM BOHRSON

On behalf of Bohrson Marketing, welcome to the Matrons of Mountainview Online Female Sale. We are proud to work alongside Brody, Justine, Calynn and Hiller Gardner as they share a set of females that represents the heart of their program. The Gardners are the epitome of a family run farm. They work alongside one another every day, have each other's backs and are genuinely each other's biggest fans. Every member of the family plays a part in building the Diamond T brand. That dedication was on full display when they travelled to Red Angus Junior Nationals with cattle they bred and raised themselves. Breeding and exhibiting your own cattle at the largest Red Angus show in the world is a tremendous accomplishment. The expense, effort and belief in their program that it takes to compete on that stage deserves recognition. They also enjoyed an outstanding show season throughout Canada, and we congratulate the entire family, especially Calynn and Hiller, on their junior show success.

The strength of Diamond T starts with the cow herd. Brody and Justine have built a maternal based program around females that can raise the next generation year after year. They value sound feet, quality udders, fertility and the kind of structure and substance that allow a cow to thrive in a working herd. Those traits matter just as much as pedigree or presence. Their goal is to raise females that can produce calves with performance and market appeal while giving their customers productive, low maintenance cows they can depend on. You can see that philosophy throughout this offering of red and black Angus females. The bred heifers bring exciting cow families, while the young heifers have the look, depth and maternal foundation to become valuable breeding pieces. There are females here that can compete in the show ring, but their greatest value may come in the calves they raise and the cow families they establish for their new owners. Diamond T has selected cattle they believe can make a lasting contribution, including females that would be easy to keep at home.

We encourage you to visit the Gardners, study the offering and ask any questions you may have. They would be pleased to tour you through the female sale group, cowherd and even look down the road at the strong bull pen that they will market next April. Brody, Justine, Calynn and Hiller are close friends of ours, and we have tremendous respect for the way they care for their cattle, support one another and stand behind their customers. It is a privilege to represent their family and this impressive group of females. Please reach out to the Gardners or anyone on the Bohrson Marketing team if we can assist you with your selections.

Best regards,
The Bohrson Marketing Team

A coveted highlight in any operation is to be declared a "Lot 1" and that honor is reserved for prowess, pedigree and phenotypic standouts. Gloria 25112 is exactly that with brood cow dimension, a set of papers that is chalked full of breed legends and more eye appeal than your wife. This great footed sweetheart's momma is a maternal sister to the $114,000 valued breed-icon Red Six Mile John Wick 882E who's offspring have revolutionized bone, design and presence. There is also a full sister to the dam at Six Mile that is starting to turn heads and that is Gloria 699H so there is so much maternal merit in the leadoff feature. She is due early in January to the outcross calving ease specialist Red LWNBRG Cartel 87M and she will lay that typical Gloria that is so sought after. This female couldn't be a better representation of a Matron in Mountainview.

A maternal pedigree to drool over with greats like Dracary, Elysium, Reckoning, Sakic, Bank Note and Max, you'll build a cow family that your kids will grow with for generations. It is hard to genetically modify one much soggier middled, sappy designed and functional in terms of being built to pound the hills at your pasture for years to come. The Elysium cattle have started to set themselves into a unique category in the breed for muscle mass, foot quality, fertility and pounds of calf and live pay weight. The gorgeous dam of 25104 comes from the great Windy Willows Red dispersal where Roger Peters bought her for us and stated she was the most attractive cow offered that day. This young female is going to have impressive ROI when you look back in a few years and see her raising heavyweight bulls and front-end replacements.

This event is going to be something that we pour our heart and soul into for many years to come. We want to share our females with breeders, youth and cattle enthusiasts across North America and we feel that there is demand for high quality, productive, low maintenance cattle. When we are selecting females for this sale, we want to offer the ones that are hard to part with because those are the ones that people want to put into their herd. Spera 2620 is the epitome of one that should be staying around and building a special name for herself here. Believe me, after already claiming a couple Calf Championships this summer with our kids, I would most certainly want to own and show this one next summer than have to run up against this stud!

Here is a showstopping set of Annie daughters from the same cow family that will stop you dead in your tracks. Annie 2642 is the soggier, big middled, bold designed option that is an exact clone to her stunning mother Annie 2463. Henry Ford, Crysler Canada or a Nascar pit crew couldn't bolt on a nicer udder than she possesses with a tidy attachment and gorgeous teats. This is one of those creatures that would hunt at junior shows all spring and summer but her best days are being a momma cow with productivity and generations of longevity built into this cow family. If this one doesn't have marks in your catalogue on sale day, the rum is on me all night long!

We intimately refer to this sweetheart around the barn as "Mack" which is short for Mack Truck. This doll stems from one of our true highlights when we purchased the package of "G" bred heifers from Six Mile in the 210G cow. Ms.Lemay2628 is as wide as she is tall, huge footed, massive timbered, square chested and more pin width than most. She also exemplifies that rich cherry color that is so sought after. An absolute sweetheart from day 1 of halter breaking, this gem would make an incredible 4H or junior heifer prospect. I predict she'll be a breeding asset for years to come.

The good ones hurt to sell, in fact, she should never leave this place. I swear that when you and your family come to the Open House and walk through the sale pens, Bardolia 2656 will be one that stops you dead on site. She is sexy as your wife in yoga pants and has better running gear than a 737. This will be one of the most unique females to sell anywhere in the Angus breed this fall with her stunning pedigree. When you construct your next donor you would always like to see things like 1. A predictable sire (how about SAV Density, one of the most elite female makers around). 2. Stems from a donor cow herself (can I interest you in a 12 year old, CAA Premier Dam that has generated in access of $100,000 of direct progeny sales). 3. Has that look that catches your eye and commands your attention from every angle (I think the picture is doing enough talking) Take our words for it, travel to Olds and see this special female for yourself, we know she's worth the trip.

Many of you will remember Hiller's show cow last year, Barb. Her and Hiller went everywhere and were quite dominant. Here is Barb 2.0 and she couldn't be more of a spitting image of her gorgeous mother if she tried. Easily the quietest heifer in the pen, this show heifer prospect is flawless in her center body cavity, beautiful headed and more relaxed in her movement than a kid on skates doing the moon walk. Every person in the family is kicking themselves for not showing this pair this summer. The sire is our $15,000 leadoff LFE Best Answer son from a few years ago that sold to our great friends, the Mcdermid's.

What a royal pedigree with 878, OCC Legacy, Sitz Upward and the great U-2 Rosebud 157C. Now let's add to that and Bardolier Lass 2608 is a maternal sister to our leadoff and $28,000 high selling bull this spring to JPM Farms, this lady is going to be special. Above average growth, WPDA and volume, she is a massive breeding piece. The dam udder is ranked as one of the 5 best on the entire ranch. Not everyone was having their best days on picture day and 2608 was certainly one of them as she was fighting the halter a wee bit but come to the Matron's event and she'll leave you with a smile on your face.

Tremendously short gestation, eye appealing, show-stopper here cowboys. I mean it kids, if there is a little sweetheart in the pen and you are an active 4H'er or keen youth livestock enthusiast that wants to show one this fall and next spring, Edella 2612 is your dance partner. This gal is plum full of all the look and phenotypic prowess to demand attention but she is also backed by a momma that is rapidly climbing the ranks here at Diamond T after raising a $19,000 Smoke Wagon son to the Cox Family on her first attempt and now this gem!

This green conditioned gal is really starting to turn up the heat since weaning and is going to make a whale of a cow. The Deuce progeny here are calving ease, refined, extremely vigorous and loaded with Angus character. A maternal sister sold in this sale, last year to Spencer Mcmillin for $7000 and he loves that Smoke Wagon female. Udder quality on this one will be second to none.

Breed-leading calving ease data on this little honey. Stemming from our second largest and prominent cow family, Bardolier Lass 2623 is longer than a Brody Gardner footnote and stouter than most. When we had this vision 3 years ago to start this sale and share our genetics with the industry, this is the type of female we were hoping to develop and put into for years to come.

If you want one to blow your skirt up and give you a little tickle in all the good areas in terms of cow power, broodiness and ground pounding mass, Missie 2667 is your lady. The pen favorite in terms of that soft, easy fleshing, fault free cow look that raises cattle with longevity, practicality and power. We are building a very profitable group of Peak Dot No Doubt 1019G daughters that are weaning some of the heaviest calves every fall and isn't that what it is all about...they are the real-world, hard-working, ranch-oriented kind.

This will be the last of Payweight calves from us as we lost him last year. We also wanted to conclude the sale with a stunning representation of our replacements. We want to show off cow power, maternal attributes, low input cattle, easy fleshing, broody and fertile cows. There might not be one in the entire offering that sums up our program any better than the Merle 26101. She stems from a cow family we got in the Crowfoot dispersal and we are all aware of how profitable those cows were.

Here is a model Angus female in terms of great skull, wicked feet, sogginess and barrel while being docile. This moderate statured gal is sensibly sized and built for a low maintenance life and she'll be a profit driven producer. We have retained all 5 of her maternal sisters in our herd and we cleaned up the bred heifer pen this year with a maternal brother. The proof is in the pudding.

The calving guy definitely slept through his check or watched to the end of the Yellowstone episode instead of going out to get this girl in but in fairness, it hasn't slowed her down once. The No Doubt daughters will leave a lasting impact on our program well into when the kids take over so this maternally driven sweetie will do the same. A younger heifer who's cow family is built around fertility, udder design and moderation.

To watch our kids take the lead on this set of females and almost single handedly halter break 24-25 heifer calves, it helps when some are as quiet as Lassie 2697. You and your 4 year old granddaughter could take this one to the county fair this afternoon she's so bombproof. Aside from that feature, she is bold sprung, deep middled and cowy in her design.
